### If you've got it—A truck brought it!

How much of everything do you use? Food, clothing, household furnishings—if you've got it—a truck brought it! Trucks carry an astonishing amount of factory, farm, store and home items all the way. Even when rail, water or air transport is involved—somewhere along the line, trucks take over.

Figures make dull reading. So there's no need for you to remember that trucks carry 75% of all the nation's tonnage or 100% of the milk for most of our large cities. Or that 70% of the livestock comes to market by truck.

The big fact to keep in mind is that our trucking industry is essential to our way of life. Recall that big fact when selfish interests try to push through punishing taxes on trucks or cripple the industry in other ways. When something hurts the trucking industry you feel the pain! Nebraska's trucking industry is an important economic factor in the Cornhusker State.
