

A step ahead

Engineered by a 5'4" housewife

(that's the average—we like 'em any size)

It makes sense . . . Why not let the American housewife guide us in designing the perfect range top . . . So, we did. The result you see above is the most comfortable-to-cook-on range in America. The new "Terrace Top"—available only from Westinghouse.

From work-height studies and other experiments, we found that most cooking chores required not one but *two* working heights for maximum comfort. Thus the unique split-level design of the Terrace Top flameless electric range.

The front surface units are lowered to just the right height for

stirring, blending, flipping, beating. (Much less fatiguing than standard-height units.) The back surface units are higher than the front units but still lower than counter height. They're perfectly placed for foods that don't require constant attention.

Note, too . . . Side-mounted controls that eliminate reaching over hot utensils. The timing center that controls the big, roomy oven and outlet for small appliances *automatically*.

Nice and so is the price . . . as only your Westinghouse dealer can tell you. You can be sure . . . if it's

Westinghouse
