

Zinc made this difference in corn.

Molybdenum deficiency did this to cauliflower.

Manganese made this difference in soybeans.

Farmhand Model 25 . . . Rakes cleaner, faster . . . costs less!

FARMHAND'S MODEL 25 COSTS YOU AT LEAST \$100 LESS than most other rakes. Yet it does a far better job . . . picking up all the hay there is to get—light or heavy—on even the roughest or rocky terrain. Since hay velocity is 45% lower than with bar type rakes, you save valuable leaves and seeds. Since windrows are fluffy, hay dries quickly and you have a better chance to beat the weather. Lightweight Model 25 follows tractor easily over any terrain. No PTO, gears, belts, ratchets, pulleys . . . virtually no maintenance.

Today—ask your Farmhand dealer for a demonstration.

HAND CRANK simultaneously lowers all five raking wheels to exact raking pressure you wish . . . raises wheels quickly for fast transport at highway speeds behind car, truck, tractor. Farmhand Model 25 has simple one-pin hook-up and only 10 lbs. drawbar weight—a child could handle it!

FOR WINDROW TURNING, lower the rear two raking wheels. They'll neatly roll the windrow completely over, putting damp hay on top. Another feature: you can offset rake so that tractor wheels do not pass over unraked hay. Optional wheel shields prevent tangling of hay in windy weather.
