FHA Credit Is Being Expanded

Recent changes in the laws governing the farmers home administration (FHA) will enable the agency to serve the credit needs of a larger number of farm families, J. O. Walker, county supervisor at O'Neill, said Wednesday upon his return from a meeting at Norfolk where the new policies were explained to county employees of the agency by W. O. Collett, state director.

The new law provides broader authority to assist family-type farmers with loans to improve and operate their farms. It also authorizes, as a part of the rural development program, loans for operating and developing farms where the farmer has part-time employment off the farm. Included in the broader authority are loans for refinancing existing debts and an increase in the maximum amount that can be advanced for operating loans.
