Works for you ...

on the road or off!

The 'Jeep' Truck is time-tested and performance-proved. It works for you 365 days a year, because it's designed to handle the toughest assignments while taking the ordinary ones in stride. With the extra traction of its 4-wheel drive it goes—with a payload of over a ton—up steep grades, through mud, sand, snow or soft earth, where other trucks can't go. Then, for highway speeds it shifts quickly into conventional 2-wheel drive. With power take-off, it supplies mobile power for many types of machinery for business or farm. It's America's lowest priced 4-wheel drive truck.

East Avenue in Holdrege—built in 1925.

THE tremendous yardage of concrete paving listed at the right is an investment that will benefit Nebraska taxpayers for years to come. The two recent pictures shown here illustrate the long service offered by durable concrete pavement.

Concrete is extremely low in cost because concrete pavement is built to last 50 years or more.

Yes, you really save money when your streets are paved with low-annual-cost concrete. Concrete's low cost per year is the result of its moderate first cost combined with lower maintenance cost and longer life than any other types of pavement.

Concrete streets are safer, too—wet or dry, night or day. They are easier to keep clean and cost less to illuminate. They improve the appearance of any neighborhood and enhance its property values.

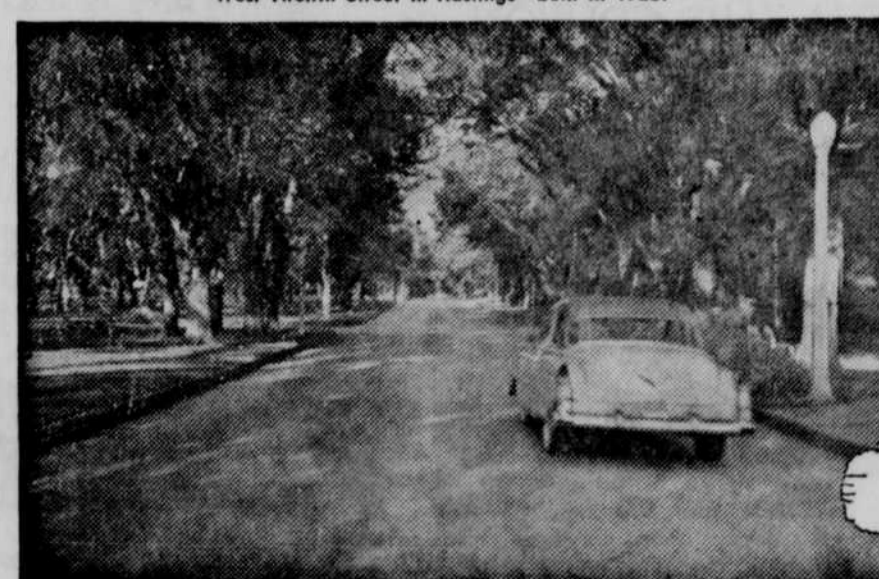

When your street needs improving, ask that it be paved with concrete. Safe, durable concrete saves you money by giving better service at lower annual cost.
