POWER Use Up - Cost Down!

NPPS reports to the people of Nebraska

Electricity is the one commodity you use which cannot be stored or stockpiled until you need it. It must be generated and transmitted to your electrical outlet the moment you flick a switch. If you live in the eastern two-thirds of Nebraska (excluding Omaha and vicinity and certain cities which have their own power sources), producing your power and supplying it instantly to distributors who relay it to you is the task of Nebraska Public Power System. Being ready to serve you sound-the-clock is only part of the job. Total power use during 1956 was 71.7% greater than 1950! Thus, long-range plans must be made so that when you flick the switch, millions of dollars of electrical facilities are ready to serve you. Last year a 12-million-dollar expansion and improvement program was started by NPPS. It is part of a 29-million-dollar program which Central Nebraska Public Power and Irrigation District and the two hydroelectric districts operating NPPS are spending to insure our continuing goal for Nebraskans: Power in ample quantity... and at low cost! Additional facts about your power system are available in the 1956 Annual Report. Write today for your free copy, c/o Department R, Columbus, Nebraska.
