Cadillac

Keeping Current... For Economy!

In the illustration above, you see a very happy man at a very wonderful moment. The title, on the keys and the car are his—and he's starting out on his first journey at the wheel. Of course, there's not much doubt as to why he decided to purchase a new Cadillac. Like everyone else who selects the "car of cars", he did it to "keep current", so to speak, on all of Cadillac's new miracles of performance and beauty and comfort. But coming to Cadillac, as he did, at this particular time of the year, we also suspect that he was inspired by the added motive of practicality. For in addition to the normal Cadillac economies of modest purchase price, low operating cost and high resale value—Cadillac dealers are, at this time, seasonally prepared to make Cadillac ownership even more attractive than ever. Because of increased production of the Cadillac car itself, the odds are that this gentleman received both a generous allowance on his previous car and prompt delivery of his new Cadillac. Have you considered how wonderful it would be to step into a Cadillac of your own? Then, you should pay your dealer a visit—spend an hour on the highway in the luxury of Fleetwood coachcrafting—and get the facts for yourself. You'll agree, we know, that the car is Cadillac—and the time is now!
