One ride and You'll say:

"That's the Smartest Million Dollars BUICK Ever Spent"

WHEN we tell you that every 1952 Buick rides like a million dollars, we're not just slinging slang—we're talking real money—right-on-the-barrelhead cash.

A million dollars and more were poured into research and testing—design and tools—engineering, production and components—to team up the combination of ride features you'll find on a Buick—and on no other car in the world.

A million dollars and more was the price paid to work out control of end-sway and side-roll on curves—to double-check vertical "throw" with shock absorbers and big soft-acting coil springs for all four wheels—to V-brace the torque-tube keel and X-brace the

frame—to cushion body and engine—and to silk out the whole operation with Dynaflo Drive.*

You may not care how the job was done, or what it cost. But we'll lay you this: You're going to say "thanks a million" to Buick engineers once you get this spirited smoothie under your hands and haunches.

Old familiar roads take on a new smoothness. Gone are the weave and wander, the jitter and jounce that you've felt in lesser cars. You ride with road-hugging assurance and level ease.

All of which only begins to tell you what really great cars these 1952 Buicks turned out to be.

Never before have style and stamina—comfort and character—power, performance and price been brought together with such satisfying skill.

The obvious thing for you to do is come in and look them over. How about taking half an hour off to do that—today?

Equipment, accessories, trim and models are subject to change without notice. *Standard on ROADMASTER, optional at extra cost on other Series.

Sure is true for '52
