You'll Make Even-Curing Windrows...  
Get Better Hay—  
with a JOHN DEERE SIDE-DELIVERY RAKE

Gentle handling and properly-formed windrows that cure evenly assure you of leafier, higher-quality hay when you use a John Deere Side-Delivery Rake.

The John Deere offers you four-way assurance of gentle handling and proper curing. The floating cylinder follows ground irregularities to get all the hay . . . curved teeth lift it into loose, airy windrows with leaves inside, stems outside for proper curing . . . inclined frame guards against leaf-shattering "roping" or compressing the windrow . . . slow-turning, ground-driven reel does not kick or toss the hay.

See us soon for complete information about a leaf-saving John Deere Side-Delivery Rake.
