**SOLVE YOUR PLOWING PROBLEMS WITH MM WHEATLAND DISC PLOWS**

For plowing stubble or sod, MM Wheatland disc plows do a superior job and often cut plowing costs as much as 50%. They thoroughly mix trash with soil to increase moisture absorption and to prevent soil blowing. They do not leave air pockets. MM Wheatland disc plows have a wide range of adjustments of disc angles from 40 to 60 degrees. Adaptable to any size farm... offered in 4, 6, 8, and 10-foot sizes.

MM Wheatland disc plows can be set to plow at any depth from 3 to 9 inches, and one of their big advantages is that they hold to their work at the depth for which they are set. Electrically heat-treated discs are 26 inches in diameter. MM larger-diameter discs turn soil better. Disc bearings never require lubrication, and a special end-thrust bearing takes all end thrust of the entire gang assembly. See us for complete facts.
