CROCODILE TEARS MAYBE

Mr. Garner thinks Al Smith is a great man, and apologizes for Texas going Republican at the last election. He is said to have shed tears, because of intolerance, it will now be inorder for the speaker to give his views on the attitude of the Democratic Party of Texas in the famous primary election case. As yet, no one has ever heard of him shedding any tears over disfranchising the black citizens of his state.

WISDOM FROM EDISON

"When the government enters business, it simply mixes a lot of POLITICS with a LITTLE BUSINESS." The late Thomas Edison said that.

The experience of the last few years has demonstrated the truth of this. We have seen government in the farming business, the printing business, the paint business, and a multitude of others. We have seen it regulate and restrict others. The result has been a tremendous extension of the Federal bureaucracy-at the taxpayers' expense.

"Keep government to the business of governing"

would be a good motto.

CHRISTIAN SERVICE

Most of our church have missionary departments, through which they administer to the needs of the benighted heathen in foreign lands. Their missionary service is usually the most unselfish the churches perform and, there, the most creditable.

But the storm ridden Negroes of Brazoria offer a better subject for missionary service than any heathen in foreign lands. Every church in this state should take up a collection for the flood sufferers in Brazoria, Columbia, Freeport, and surrounding territory! These sufferers are the ones Jesus had in mind when He said "I was naked and ye clothed me.'

Eighty per cent of the Negroes in that section are in a destitute condition. Many of the houses were blown flat to the ground. Beds, chairs, bedding, clothing, stoves and every article that we count as essential to living were destroyed. The people are sleeping out doors, trying to live off a few potatoes or a bit of bread and bacon that they cook in holes they scrape out in their yards.

A few have tents. But for the most part, they are over crowded and unsanitary. The mosquitoes, produced by the water holes and swamps, finish the job of making life miserable.

Many are sick. Practically none are getting the rest and food one should have after such an ordeal as they went through. The Red Cross is serving as far as it can with its limited means, but it just can't care for these Negroes as it probably would. Negroes must help. One old lady who had to lie under the debris of her fallen house until it could be cut away, was limping around barefooted a week after the storm without ever having had medical aid!

No one who professes to be a Christian needs to be asked to send a donation to aid these people. It is only necessary to say where.. All who read this may send their donations to the editor of The Houston Informer, marked storm relief. Every penny will be listed and published. Every name will be published, except where there is a special request to the contrary. In that case the item will be published as a Christian gift.

Every Negro should strip himself to give to this cause, for Jesus would want churches, lodges and individuals to do that. Don't wait! The need is today! Act now!

SAILS TO STUDY LIBERIAN **PROBLEMS**

Washington-(CNS) - Henry L. West, former commissioner of the District of Columbia and president of the American Colonization Society, last week sailed abroad for three months' study of problems affecting the Liberian Republic. He will first visit Geneva, Switzerland, to confer with the League of Nations International Committee on Liberia and then proceed to Monrovia, the Liberian Capital, where he will hold several con-

kept in constant touch with the prog. | marms" and schoolmasters.

(BY OLLIE LEWIS)

Several months ago there was or-

ganized in this community what is known as "The Citizens' Co-Operative League of Omaha." The purpose of the Organization is to raise the community to a higher economic level, not by demandnig an increase in wages and salaries, but by increasing the purchasing power of its constituency. This is done by co-operating the efforts and power of the consumer. In order to get the organization before the people, several successful public gatherings were held. Namely, a mass meeting at Dreamland Hall, with better than 500 people attending. A splendid program was rendered, music. songs and good speakers who told c. the difference between cooperative bus. iness and Capitalist business, and the history and aim of cooperation. After the program a number of shares were sold. So the meeting was a decided success. On April 9th, we gave a midnite show at the Ritz Theatre, attended by more than 650 people. There were other efforts put on which were outstanding in character, and all together they created a very deep respect for the organization which met weekly, and had an enrollment of 75 members and a following of half this number. Although there has not been one penny of the people's money lost, this popularity was short lived, like other organizations that have been formed in this community, and before we could realize it, in creeped the slimy and poisonous character of selfishness, and very affectively did he do his dirty work. The membership was scattered, its hope was clouded, its enthusiasm swayed; its ambition crushed, in fact the organi. zation was all but killed. However, there was several who could not be liscouraged. They struck to the task. They overcame every difficulty, and ties in mines here by native Kaffir now the storm has broken, the clouds labor.
