

"Stephin Fetchit" Gets 30 Days on 16 Year Old Chicago Girl Charge

CHICAGO, Special. — Lincoln "Stephin Fetchit" Perry was sentenced to a 30 day jail term by Judge Joseph B. Herms in a Chicago Court on Tuesday, July 20th. Perry previous had a statutory rape charge placed against him by the mother of sixteen year old Juanita Randolph. In the complaint, the woman alleged that police had found her daughter clad in pajamas in Stepchin Fetchit's Vincennes Hotel Room here. The girl had been given a six month term by the above Judge a week ago, but on Tuesday, July 20, the day Fetchit was sentenced, the Jurist declared that he believed the girl had been punished sufficient and freed her. "Fetchit" posted a Five Hundred Dollar Bond pending motion by his lawyer for a new trial within 60 days.

The People have A Right to Know

1. No order has been issued by the Securities and Exchange Commission for the sale of the Nebraska Power Company.
2. The Nebraska Power Company DOES NOT HAVE TO BE SOLD AND Omaha is NOT obligated to buy it, even if it were offered for sale.
3. No one is breaking faith with the state legislature if our city decides to leave the Nebraska Power Company as it is, since it does not have to be sold. L.B. 204 was created for the purpose of giving Omaha a way to take over the Nebraska Power Company, if that should be necessary to prevent the property being purchased by Consumers Public Power District. But L. B. 204 makes it impossible for Consumers or any other state project to buy the property. L.B. 204 is an Enabling Act for the City of Omaha. It is not a Mandate.
If anyone promised the legislature that Omaha would buy Nebraska Power Company and put it into political operation even though

it DOES NOT have to be sold and even though the state project (Consumers) CANNOT buy it, who made the deal....Who assumed the authority to make the deal? The people of Omaha didn't vote on it....the people's only representatives, the City Council, didn't make any promises. In fact, the City Council and the Mayor, last summer, signed a public statement in which they said they didn't want the Nebraska Power Company sold.
4. The Mayor and City Council passed a resolution on May 21, 1942, in which they specifically brought out that they preferred to keep Nebraska Power Company under business management, as it is now. The resolution stated: "There is no general demand in Omaha for the sale of the Nebraska Power Company. This Company has furnished our city with splendid service and is a fine citizen. However, if the company is to be sold, the City of Omaha should have a study made by its own civic leaders together with the City Council to ascertain what is best for our citizens."

JEFFERS REPORTS THROUGH CANDY BROADCAST

By the fall of 1944 we can safely forget the rubber problem, as far as essential supply is concerned, Rubber Director William M. Jeffers (left), said in a recent guest appearance on "Washington Reports on Rationing," public service radio program presented by the Council on Candy as Food in the War Effort, an organization sponsored by the National Confectioners' Association. Jeffers was interviewed concerning his tour of synthetic rubber plants by Ernest Lindley (right), host-commentator on the program, which is broadcast every Sunday afternoon at 3:00 o'clock (EWT) over the NBC Network. Lindley is also Washington editor of Newsweek magazine.

You women and girls who suffer from simple anemia or who lose so much during monthly periods that you feel tired, weak, "dragged out"—due to low blood-iron—Start at once—try Lydia Pinkham's TABLETS. They're one of the greatest blood-iron tonics you can buy to help build up red blood to give more strength and energy and to promote a more refreshed and robust bloodstream for women who lack precious blood iron. Taken as directed—Pinkham's Tablets are one of the very best and quickest home ways to get iron into the blood. Many medical authorities state the form of iron used in Pinkham's Tablets is far more readily absorbed into the blood—so is better for you than some other iron-forms. Just try Pinkham's Tablets faithfully for at least 30 days. Then see if you, too, don't remarkably benefit. Follow label directions.'

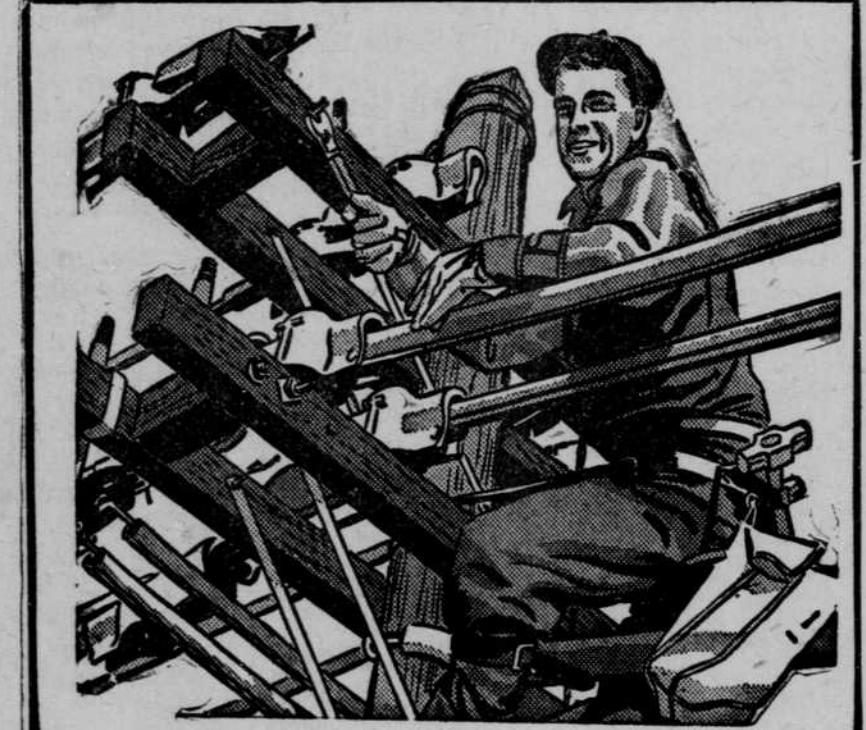

CBS Broadcast Features Willkie in Plea for End of Race Strife

New York, N.Y.—In a moving indictment of race hatred Columbia Broadcasting System presented on July 24, 7:00 to 7:30 pm. EWT, a dramatic story of the Detroit riot. A rebroadcast for the West Coast was made at 9 pm. Called "An Open Letter to the American People," the program featured at the close of the dramatic sketch a post script by Wendell Willkie. Willkie made a plea for racial unity and called for the eradication of racial strife. Dealing with the savagery of the Detroit Sojourner Truth Housing riots and the recent disgrace there in June the radio sketch nevertheless reassured radio listeners of the basic decency of Americans by telling of some of the acts of human kindness in the midst of the riot. Among the incidents reenacted was a Negro doctor's removal to safety of a white pharmacist who had his drug store in a Negro neighborhood and the kindness of two white sailors to a brutally beaten Negro man.

Detroit Strikes to Bar Negroes Lost 3,000,000 Work Hours in 3 Months

Detroit, Mich.... Strikes in this area to prevent employment and upgrading of Negro workers have cost the war effort nearly 3 million man hours, the U.S. Department of Labor revealed this week. In a report, supplied at the request of the NAACP, the Department of Labor stated that between the three-month period of March 1 through May 31, 1,01,965 man days of work in U. S. war plants had been lost to the enemy because of racial bigotry. The Department of Labor lists protests against the upgrading of Negro workers as the chief reason for these strikes. Other reasons recorded are: hiring of colored workers and demand for separate sanitary facilities; placing of Negroes in production department; hiring of Negro plant guards; and refusal to work with Negro tool makers. The War Production Board estimates that an additional one million man-hours were lost by the Detroit riot. In another stoppage during the same period at the Alabama Dry Dock and Shipbuilding Company in Mobile, 23,467 man days or 563,208 man hours were lost in a strike and riot against the upgrading of colored workers to welders.

5c WORTH OF GOOD TIMELY READING

24 HOURS A DAY 7 DAYS A WEEK IS OLD STUFF TO US!

We cheered, too, when the Government called on industry to work twenty-four hours a day, seven days a week, until this war is won. But continuous production is nothing new to the electric industry. We've always worked that way. That's one big reason why we were prepared to power the factories that are filling the sky with planes, the earth with tanks, and the sea with ships. Production schedules that stagger the world are possible only because America is so powerful. America has far more electric power than all the Axis countries combined. And today's power is quickly available at almost any point of need. These things have been accomplished because America's electric companies have been built and operated the American way—by good business management.

NEBRASKA POWER COMPANY
