NEWS ITEMS. Our ideas of French cooking are derived from the extravagance of restaurants and the salaries of a few chefs who draw more pay than a judge or a bishop.

Seven days in the week we receive letters from parties in the east desiring to locate in the west requesting sample copies of THE TRIBUNE. This is pretty good evidence that a local newspaper is regarded as a true index of a county's prosperity and in the future as in the past this enterprising journal will continue to assist in building up the county.

Hundreds of letters from those using Ayer's Hair Vigor attest its value as a restorer of gray hair to its natural color. As a stimulant and tonic, preventing and often curing baldness, and cleansing and soothing the scalp, its use cannot be too strongly recommended.

Newton, superintendent of bridges and buildings and Roadmaster McGregor. The special object of inspection was the Lockwood building, which has been purchased by the railroad company. One wing of this building will be added to the Pacific hotel. The remainder of the building will be repainted in the spring and used as an annex of the hotel or rented.—Sidney Telegraph.

There is no longer any doubt but that Denver Junction will have a bridge across the South Platte. Perseverance will win every time, and the gentlemen in charge of the bridge matter have an inexhaustible supply of this very essential article, hence the favorable result. At present it cannot be said whether the bridge can be built this winter or not, as the bids for the building of it will not be opened until December 7th, and if the weather is favorable work will be commenced as early otherwise it will be commenced in the spring as the weather will permit. The advertisement for proposals appears in another column.—Denver Junction Gazette.

A case of more than ordinary interest was decided last week at Sutton. A Mrs. Percival obtained judgement for \$2,508 against John Curran, a saloon keeper for causing the death of her husband, Percival, who was about sixty years of age, took in the saloons of Sutton on a winter's day three years ago, and in the evening stayed for home, three miles distant in a heavy snow storm. He was intoxicated, and no doubt fell down and died from cold. He was found frozen stiff next morning a short distance from his home. This decision carries out one of the wise provisions of the Stoum liquor law, which makes all saloon keepers liable for any damages resulting from the sale of intoxicating liquors.

More complaints have gone up from the patrons of this land office, than from all the other districts in the state combined, so we are informed. It now transpires that error after error has been committed by Register Morris—such as will cause the poor homesteaders to lose their lands. Whether willfully or ignorantly done, is not for the people to determine; they are there all the same. Senator Van Wyck may "rise to explain" till dooms day—the fact still remains, that "to dead to skin" is expressing it feebly, when reference is made to his chances for re-election to the United States Senate by the good will and votes of his party in northwest Nebraska.—Valentine Democrat.

Capt. Delancey, the great French weather prophet, predicts uncommonly severe earthquakes and cyclones next year. He also predicts the appearance of a great comet to be followed by an epidemic which will carry away thousands of people.

Many strange religions have been introduced into California, among them Hindu Theosophy and Chinese Confucianism. The growth of Spiritualism there is so rapid as to challenge attention. A local paper, noting these facts, says it is about time for the Christian churches to wake up.

A violent agitation of the Chinese question has broken out in Augusta, Georgia, since the publication of the recent outrages in Washington Territory. For several years the Celestials have been flocking thither. They have prospered in business and now own so many groceries, wholesale and retail, that a large number of the citizens have petitioned the city council to take steps to prevent further immigration. The feeling runs high as the Chinamen have many friends among the lower classes.

The British steamer Greyhound, trading locally in Chinese waters, has arrived at Hong Kong, and her second officer reports that a daring attempt was made by Chinese pirates to capture the vessel. The captain of the Greyhound was inveigled on board a pirate ship and after being plundered was killed. The pirates then attempted to seize the Greyhound, and a desperate fight ensued, in which the other officers and the engineers of the latter vessel were badly wounded. The Greyhound put on a full head of steam and escaped to Hong Kong.

The question raised between the board of public lands and buildings and the governor, as to who had the right to make the appointment of a matron at the insane asylum has been decided by the supreme court in favor of the governor as the appointing power. The question was by the disagreement between the governor and the board on the appointment of Mrs. Matthewson, wife of the superintendent, as matron of the institution, which resulted in the appointment of that lady by the governor against the protests of the board. The board held that as they were responsible for the management of the institution, they should have a voice in the appointment of its officers, and when the salary accounts came in they resolved to test the question by refusing to audit the account of Mrs. Matthewson until they should receive a decision from the supreme court confirming the appointment.

About the greatest of curiosities in building is in Cooper institute, where an entirely new foundation of enormous granite blocks, and considerable of the brown stone of the walls have been put in without disturbing the occupancy of that beneficent institution. The biggest public hall in New York is completely underground here; there is a free library and reading room above, and the gratis classes in various useful branches of art are maintained. The lavishness of the expenditures is indicated in the fact that \$200,000 is being spent in the present alterations, made necessary by the setting of a heavy house into a soft ground. Nevertheless Peter Cooper's perpetual gift to the city is disliked by thousands of earnest Christians, who honestly and devotedly believe that it does more harm than good. Religion is systematically disregarded in its management now as when its founder was alive. The only rule is that morality shall be furthered. The periodicals in the reading room and the books in the library include nothing vicious, but orthodox theology gets no special representation, and as many journals devoted to sports can be counted as there are of those advocating Christianity, while infidel and agnostic publications are there. Professor Zachos, the director of instructions, is a free thinker. The reading matter is accessible on Sundays. Worse than night else, in the estimation of church people, is the renting of the hall to heterogeneous assemblages.
