The Standard Oil company proposes to lay a grand trunk pipe line from Chicago to New York by way of the Ohio and Pennsylvania Oil fields. The interference of the inter-state commerce law makes this step neccessary, and while the cost of the line will be \$5,000,000, it will also be profitable. This shows how enormous the rebates received by the Standard have been.

The New York World gives figures showing that the Knights of Labor in New England number only 25,000 against 85,000 in 1886, the seeders going into trades assemblies. The cause for this loss of strength is said to be disgust with the Philadelphia crowd, incapacity of the local management, particularly in strikes, and the fact that certain leaders tried to prostitute their offices for private ends.

The canvass of the vote in Virginia has been completed, and it is announced that the democrats secured 119,806, votes and the republicans 119,380, giving the demo-crats a majority of 426 votes. In view of the fact that Virginia has always been considered a democratic state, there is nothing discouraging in this announcement for the republican party. In fact it points very significantly to the fact that the republicans will carry the state in the next general election. It also indicates the growth of republican principles in the south, which is a most encouraging circumstance.
