NEBRASKA NEWS.

Mrs. Larson, wife of the man murdered near Julesburg last August, died recently at her home in Deuel county, having been demoralized by the effects of the tragedy since its occurrence.

After reaching the depth of 193 feet workmen employed on the town well at Harrisburg were compelled to stop work on account of gas which rendered it dangerous for anyone venturing inside.

Corn has been brought into Gresham until both elevators and all the bins are full, and the corn, both ear and shelled, is being shoveled out in huge piles on the ground. One elevator received 151 loads of shelled corn in one day.

The largest wholesale fleet reported for many days, was the steaming ninety head of cattle from Robert M. Donald near Burnett. The country was reported for miles around, but so far no trace of the missing stock has been found.

A new national banking house has been organized at Albia and will open up for business in a few days with a paid up capital of \$50,000. The officers are: M. B. Thompson, president; Lorin Clark, vice-president; Willard Baker, cashier; D. V. Blatter, assistant cashier.

The village board of Humphrey neglected to pass an ordinance regulating or providing for the sale of liquor, and five citizens who were doing business without the proper authority have been arrested, charged with selling liquor without license. In evidence the complaining witnesses are ladies.

John Lewis, a young machinist of Plattsmouth who, about four years ago sold \$100,000 worth of property in Wichita, Kan., for \$2,000 has instituted suit to recover, entering his claim to the ownership of the land on the ground that the statutes of Kansas do not hold the acts of a minor legal.

While out riding near Wahoo Mrs. William Grafe and her two-year-old daughter were thrown from the Sand creek bridge into several feet of mud and water, about twenty feet below. Strange to say no bones were broken, the only injury received being a severe nervous shock sustained by Mrs. Grafe.

Herman Diers, a highly respectable young man of Crowell, has been arrested on a charge of murder. Diers was the coroner's jury in the late trial and resided in the house of the murdered man. In what way he is implicated is not known but astonishing developments are expected.

Mrs. L. Baker was accidentally shot last week while visiting the home of her parents, Mr. and Mrs. Wells, near Endicot. In a scuffle between the two little sons Mrs. Baker for the possession of a shotgun the weapon was discharged, the entire load taking effect in the mother's abdomen, causing a serious and perhaps fatal wound.

The proposition to divide Custer into four new counties is being warmly agitated. Callaway will be a candidate for one of the new counties and Dr. S. C. Bow is laying plans to retain the county seat at that place. Those in favor of division argue that the county is now forty-eight miles wide by fifty-four miles long and that it is too large to make four counties of the regular size.

The Coker livery man's club was called to order last week in a hardware store and the session opened by a nickel pitching contest between George Sinitzmaster and W. H. Hill. As the game grew so interesting pieces of gasoline stoves were substituted for nickels. Sinitzmaster was master and knocking him down. Getting him there Hill attempted to pound him into the pine plank, but did not succeed. Twenty dollars and costs.

A Fremont man named Powers took his extra shirt to a Celestial wash man and afterwards went to a hotel where he employed a nurse and left the shirt in her care after liberally providing for its keeping. The mother boarded the next train and where she came from and whether she wears it still is a mystery. The sum of money was found in the child's clothing.

A few days ago a citizen of Ainsworth went down to Long Pine and the Pipers, thinking to have some fun with him. He pulled a few of his drinks. They had fun for a few minutes, says the Ainsworth Graphic, and then came him. He pulled a wicked looking pop out of his hip pocket and started on the war path. In fifteen minutes he had the whole town to himself, and it was broad daylight the next morning before the prominent citizens of that burg dared venture out upon the streets.

An affray which ended in murder took place in Covington on Sunday morning about 3 o'clock in M. Tierne's saloon, in which there is also a lunch counter. While talking to some friends, Jamey Toohay, a cook, was assaulted and twice knocked down by a gambler named Ervin. Toohay got up, and going to the kitchen, returned with a long butcher knife. When he came back into the saloon he made a run for Ervin, striking him with the knife and killing him instantly. Toohay was taken to the Dakota City jail for safe keeping.

The last crop report of the department of agriculture makes an excellent showing for Nebraska. The average production of corn per acre in the United States is 29.6 bushels per acre. The state which yields the highest is Iowa, 38.3 bushels per acre average yield, then comes Nebraska, yielding 37.3, and Kansas third on the list, 37.5. The lowest average per acre is that of three southern states—Georgia, North Carolina and Florida, each of which yields only 11.5 bushels per acre. In average yield of potatoes per acre Nebraska leads the world, giving 144 bushels per acre, and the quality is the highest. The highest quality is graded 101, as against Kansas, second in the list in yield, 118 bushels per acre, and the best highest quality of that of California graded 100. Among sorghum producing states Nebraska is third. This will be a great eye-opener to some of the sleepy heads in the east who think that Nebraska is a desert, especially as our state also takes high rank in the production of every other kind of farm product common to the North.

GARFIELD GOSSIP.

A short series of meetings have been held at this place by Rev. J. H. Derry, berry pastor of St. Charles Church. This being a busy time with the people, the meetings were adjourned until after the holidays.

R. H. Langford delivered an eloquent address to the good people of Garfield last week.

Miss Lida Campbell has returned home from Lincoln where she has been attending school, bringing with her a cousin.

There will be a Christmas tree here for the benefit of the children.

The charter for the Farmers' Alliance has arrived and the determined farmers are proceeding to organize to the best of their ability.

A handsome crowd from Whitler headed by Gale Harding, paid our town a visit during the recent meetings.

The Smith boys are sitting on barb wire fences chewing the nails from their fingers, as they are at a loss for something to do at present since their thrashing machine has been stored away in winter quarters.

F. G. B.

The effort to tax mortgages, to be made by the Farmers' and Laborers' federation is ridiculous. The taxing of farm mortgages would only make the farmer pay taxes on twice that amount.

There would to a certainty raise the rate of interest. Men who loan money would charge a higher rate of interest to cover the mortgage tax. If a law could be enforced taxing incomes it would be a sensible thing and one we would be glad to see enacted, but there is little use of attempting such a thing in America.

There is something very distasteful to Americans in a set of government spies who duty it is to pry into every man's private affairs, and by a set of spies alone could an income tax be collected. Yet if the farmers and laborers would turn their attention to the enactment and then the enforcement of such a law, it would be very beneficial to the commonwealth. But the taxing of farm mortgages is one of the wildest schemes on record and could only result disastrously to the agricultural community. Then the same convention calls in one breath for the issue of more greenbacks and the unlimited coinage of silver. This in the face of the fact that millions of dollars more are now coined annually than are put into circulation. Inflation is not a wise policy any more than is restriction of the currency. The debtor class may wish a lot of cheap currency with which to pay their debts, but the issue of unlimited quantities of any kind of a circulating medium will do but little to help our country. It seems the demagogues had quite a voice in that convention in the principles adopted in the declaration of the platform.

A preventive for croup. There no longer exists any doubt but croup can be prevented. True, croup never appears without a warning, and if Chamberlain's Cough Remedy is given as directed as soon as the first indication of croup appears, it will invariably dispel all symptoms of the disease. This can always be done if kept at hand. Fifty cents a bottle. Sold by A. F. Streitz and Dr. Longley, North Platte.

Not only is there great profit in draft horse raising, but there is a profit in other routes. Her careful raisers are ready to practice on and speculate with. The fastest trotting records are those of Axtell 2:13; Palo Alto 2:12 1/2; Stamboul 2:12 1/2; Mayes Cobb 2:13 1/2; G. G. 2:13 1/2; and Phoebe 2:13 1/2. The fastest animals at the trotting game are Mand S. 2:08 1/2; Jay Eye See 2:10 and Sunol 2:10 1/2. The fastest pacing record is that of Johnson 2:06 1/2. There are a great number of horses trotting in 2:30, which was once considered an exceptionally fast gait. America furnishes a good market for these horses and there is a great demand for them in other countries. Her careful raisers are ready to practice on and speculate with. The fastest animals at the trotting game are Mand S. 2:08 1/2; Jay Eye See 2:10 and Sunol 2:10 1/2. The fastest pacing record is that of Johnson 2:06 1/2. There are a great number of horses trotting in 2:30, which was once considered an exceptionally fast gait. America furnishes a good market for these horses and there is a great demand for them in other countries. Her careful raisers are ready to practice on and speculate with.

The Spanish have a proverb: "Woman loves with her ear, but man with his eye." Persuasive wooing captures a woman's heart while other attractions appeal to her eyes. To retain man's affection and secure enduring happiness, a woman should be as charming in married life as in the days of bewitching maidenhood. Her constant presence should be a fair and blooming complexion, soft and spotless hands, freedom from skin and scalp impurities, pimple, chapping, and the possession of the delicate bloom of perfect health. Cole's Carbolic Soap, the perfect medicinal toilet, both nursery soap is her salvation. Price 25 cents. Sold by all druggists.

The Missouri Pacific railway refused to allow the Farmer's Alliance to build an elevator by their track at Emwood. The Alliance took the case at once to the railway commission, which after investigation ordered the road to give room for the elevator. This is the first case of the kind brought before the board and will open the way for many more, for the tyrannical policy of the railroads in their state concerning the building of elevators is well known.

The great national potato growing contest, between women, came to an end last week. It was engaged in by farmer's wives and daughters all over the country. There were 1,000 contestants and 200 prizes awarded. The 1st prize \$100, was won by Mrs. Eliza Day of Johnson county, Wyoming. The 2d by Miss Mary Cook of Madison county, Illinois. The 3rd by Mrs. M. C. Taylor of Iowa. The yield of the potato by the best lady was the rate of 1,015 1/2 bushels per acre, the second, 970 bushels. All yields above 300 bushels per acre received some kind of a prize.

Metbor Flight. The Chinese have records of meteoric showers as far back as 644 B. C.; the Greeks held that meteors were masses torn away from the earth by the violence of the rotation; modern astronomers have discovered that these brilliant fire balls appear in great numbers every thirty-three years, usually during the month of November, the same month that the Union Pacific Railway started the famous fast mail train through from Council Bluffs or Omaha to San Francisco in sixty-one hours.

L. K. Holmes, of Lincoln, lost thirty-eight cows one night last week. They were in a corral for the night but broke away and wandered to neighboring corn field met death by eating too much corn and dry husks. His loss amounts to \$1,000.

The jury in the case of Dr. Kelly, of the Norfolk insane asylum, tried at Wayne on the charge of murder, brought in a verdict of not guilty. The case grew out of a surgical operation performed on Carolina Souther, from which she died.

Dodge county is undoubtedly the banner sheep feeding county of the state. The Fremont Tribune recently published a list of the feeders in that county, numbering twenty-five farms, making an aggregate of 10,000 sheep now being raised in that county. One firm is feeding 13,000 head, and none of them less than 1,000. Turner Brothers were the first to make shipments, and received \$5 per hundred for their sheep in Chicago.

On Wednesday evening of last week Vernon Herbert, a wealthy farmer living about twenty-five miles northwest of Kearney, committed suicide by blowing the top of his head off with a shot gun. Mr. Herbert was one of the wealthiest farmers in Buffalo county, owning a whole section of land and personal property valued in all at \$40,000. He had been drinking quite heavily for several months past and his financial affairs were in bad shape. He leaves a wife and eight children.

The famous Relay House, Maryland, takes its name from changing the relays of horses used on the first passenger railway ever constructed in America— from Baltimore to Frederick—steam not having been introduced in 1827. The Union Pacific with its great system is the outgrowth of these early attempts, possessing the most perfect equipment in the country. The splendid dining car service through from Omaha to Denver and Portland is absolutely unsurpassed.

The whisky tax will not be touched in the revenue revision which will be made by the present Congress. The surplus, as estimated by the Secretary of the Treasury, will be but \$44,000,000 in the fiscal year which will close on the 30th of next September. A removal of the whisky tax would not only cut off this surplus, but create a deficit of at least \$45,000,000.

Mr. John C. Bullitt, the eminent lawyer of Philadelphia, has just finished the draft of the largest mortgage ever given in this country—the indenture of the Northern Pacific Railroad for \$100,000,000. To Mr. Bullitt was also entrusted the drafting of the Reading \$100,000,000 general mortgage, three preference mortgages aggregating \$65,000,000, and the \$45,000,000 Norfolk and Western blanket mortgage. In this particular line of work Mr. Bullitt is said to stand at the head of his profession.

The case of Fenlon vs. Palmer was called in district court at Omaha on Tuesday. This is a case in which damages are asked for injuries inflicted by a cow belonging to the defendant, J. J. Halligan and H. L. McWilliams having charge of the plaintiff's case, and Judge, Hoagland, of North Platte, and H. L. Mead are the defendant's attorneys. There were not many witnesses examined, but the case was not given to the jury until 3 o'clock Wednesday afternoon. They returned a verdict giving Mr. Fenlon damages to the amount of \$550.00. This is likely to become a celebrated case as both gentlemen are exceedingly tenacious and will carry the case to the highest court.—Foster Republicans.

Iron rails were first used in railway construction at Whitehaven, England, in 1798, but it was not until 1786 that they came into general use, and this was in consequence of the low price of pig iron. Previously the rails were constructed of wood and horses were the motive power. A wonderful change in a century where the horse has been replaced by the iron engine. The Union Pacific Railway from Omaha to Denver and Portland.

In a recent article in the Youth's Companion, on "How to cure a cold," the writer advises a hot lemonade to be taken at bedtime. It is a dangerous treatment, especially during the severe cold weather of the winter months, as it opens the pores of the skin and leaves the system in such condition that another and much more severe cold is contracted. Many years constant use and the experience of thousands of persons who have testified demonstrated that there is nothing better for a severe cold than Chamberlain's Cough Remedy. It acts in perfect harmony with nature, relieves the lungs, liquefies the tough tenacious mucus, making it easier to expectorate, and restores the system to a strong and healthy condition. Fifty cent bottles for sale by A. F. Streitz and Dr. Longley in North Platte.

NOTICE TO PROPERTY OWNERS. Property owners and others are requested to remove at once all refuse from the alleys bordering on their lots. In compliance with ordinance relating thereto. SYL. FRIEND, Street Commissioner.

LOOK OUT! If you buy one gallon of Paint, I give a good brush to put it on. This refers to any color you may select. FRANK PEASE.

The Press,

(NEW YORK.)

FOR 1889.

Daily, Sunday, Weekly.

The Aggressive Republican Journal of the Metropolis. A newspaper for the masses. Founded December 1st, 1887. The largest daily circulation of any Republican publication in America.

THE PRESS is the organ of no faction; pulls no wire; has no animosities to avenge. The most readable newspaper anywhere in New York. THE PRESS is now a NATIONAL NEWS-PAPER, rapidly growing in favor with Republicans in every state in the Union. Cheap news, rapid sensations and trash find no place in the columns of The Press. It is an expensive paper, published at the lowest price American currency permits.

The Press has the brightest editorial page in New York. It speaks with points.

The Press Weekly Edition contains all the good things of the daily and Sunday editions with special features not to be found in other papers. For those who cannot afford the daily or are prevented by distance from early receiving it, The Weekly is a splendid substitute.

As an advertising medium The Press has no superior in New York. It reaches an excellent class of readers. Rates very reasonable. Full information upon application.
