CHANGE OF HEART.

A Texas Man's Heart Moves Over to the Right Side.

SAN ANTONIO, Tex., May 23.—A case of radical displacement of the heart, and the patient still alive and able to do a good day's work, is causing a stir in medical circles here. The patient, a young man named A. L. Kinsey, a young druggist of Waco, Tex., became afflicted with pleurisy, and as the disease progressed his heart was forced from the left to the right side, and it is now located on the extreme right side of the body and so near the surface that the pulsations are remarkably strong. The pressure of the heart against the right lung produces a shortness of breath, but otherwise Mr. Kinsey suffers no inconvenience. He recovered from the attack of pleurisy eight months ago, but his heart still remains on the right side. He has been examined by many physicians, but his case is the only one known in the history of medical science.

The English delegates opposed the amendment and a hot debate followed. One of the French delegates reproached the English for a lack of international sympathy, saying that whenever there was a strike in Northern France English coal flowed freely into that country, and whoever heard of the English miners taking any step to prevent this. The debate was still on when an adjournment was taken.

An hour later a disastrous wreck occurred on the Milwaukee road, and a heavy freight train left the rails near North Evanston, piling the cars upon each other and blocking all the tracks. The last legislature passed a resolution instructing the governor to invite the governors of Texas, Oklahoma, Kansas, Minnesota, Iowa, Missouri and Arkansas to send representatives to a convention, whose object is to make plans for the construction and operation of a line from St. Louis to Galveston, Tex. The intention is to spring the state ownership scheme at the convention to be held at Lincoln early next month.

Jerry Simpson, who heads the Kansas delegation, says the building of this road by state aid is feasible, and that the Populists of the states through which the line will run propose to demonstrate that the government ownership of railroads is not a visionary idea.

ELECTRIC METER KNOCKED OUT.

A Brooklyn Jury Decides That It Is Far From Accurate.

NEW YORK, May 23.—Electric light people have always asserted that meters used to measure electricity were absolutely correct and that customers never paid for more electricity than was actually used in illumination. A jury in the city court of Brooklyn, however, differently, however, and decided that notwithstanding the meter of the Edison Electric Illuminating company said that Lewis Jacobs used \$122 worth of electricity in his clothing store at 353 Fulton street in one month, he had really used only \$32 worth. Lawyer Harris for Jacobs, said an electric light meter was a progressive arithmetical machine, fired by close corporation and sustained by public.

The jury brought in a verdict for \$32, the amount Jacobs had offered to pay. The verdict added the costs of the suit, amounting to \$19, on the company. The meter is an Edison invention.

THE JAPANESE KNOW THE COMMERCIAL VALUE OF POLITENESS.—They Are the Yankees and the Frenchmen of the Orient. Among Some of the Other Exposition Sidelights.

WORLD'S FAIR, May 23.—[Special.]—Every one who comes to the exposition will want to visit the Japanese tea house.

It is one of the prettiest and quietest spots within the enclosure. At the edge of the lagoon, just across from the grand building of the state of Illinois and near the palatial structure of the Brazilian government, it has a little corner all its own. A month ago it was a muddy bank, now it is a garden of flowers. The Japanese know how to do these things, if any people in the world do. The ease and rapidity with which they have transformed an uninviting spot into a garden well for their practical effect. They have been called the Yankees of the Orient, just as the Chinese are called the Yankees of South America. It appears to be a compliment to a people in any part of the world to say of them that they are like the Americans.
