to splendid music. It is simply for at the palatial Administration building affords a good background and sounding board. In one direction is Machinery hall, and farther along the perfect structure devoted to agriculture. On the other side the Electrical building and the mammoth palace. Between these most beautiful enclosures is the grand basin, with its fountain playing, the craft moving to and frower the waters. Add music to a scene like this and one could not be blamed for imagining himself in a sort of earthly paradise. That is the way the lovers look at it, surely, for they find seats in some shadowy spot, or life a large umbrella over their heads more to ward off curious glances than to protect against the rays of the sun, and sit by the hour.

This is not an energetic way in which to see the great World's fair, but it is a happy way. You may not learn much, but you will feel a good deal. This is par-

lamp—the incarnation of incandescence he calls it a little later—and that it was made of 30,000 small pieces of cut glass carefully put together to form one huge crystal. Eight men were employed five weeks at this part of the work alone.
