In a brief talk with H. B. Soal, manager of the Cody-Powell Coffee Co., we learn that their plant at La Crosse is turning out 4,000 pounds of Pan Malt each day, but the demand is growing so rapidly that the capacity of the factory will be at once doubled. So far the work of introducing this substitute for coffee has been confined almost exclusively to Wisconsin and Minnesota, but within the next few months agents will cover all the central and eastern states, and later the western field will be reached. Since first beginning to manufacture Pan Malt, improvements have been made in the machinery and the quality now being turned out is much superior to the first. We trust the business may reach large proportions and that it will be found necessary to erect a second factory in North Platte.

The sale consisted of a quarter of a block in the business center of the city and a hotel will occupy a portion of the property purchased."

Concerning the intention to place sugar on the free list the Omaha Bee very truly says: The people of Nebraska are beyond question interested in the attempt to place sugar on the free list. Nebraska is a sugar-producing state in a small way. The work already accomplished at Grand Island and Norfolk has proved beyond a doubt that the soil of this state is adapted to best culture. Nebraska can sustain scores of best sugar factories and this state alone could supply the entire northern Mississippi valley if the industry is properly fostered. It may be too much for Nebraska to insist that the bounty shall be retained for her special benefit, but Nebraska can at least adopt measures to encourage her own industry. The question of state bounty has never yet been given the consideration its merits deserve.

The L. O. T. M. recently organized, is the only lodge in our city that no man can join. It seems that the women hereofore have needed the assistance of the men but I believe the L. O. T. M. will be able to assist exclusively for themselves. However, there are some among them who think the idea of being a member of a lodge must be a novelty, and they have become so elated that they have given some of the signs in the presence of children and the children afterwards have read the signs in public.

The Rainfall at North Platte.

At the irrigation meeting on Wednesday evening Observer Pierce, of the U. S. Weather Bureau, by request, presented data showing the total amount of rain, including snow, which fell at North Platte, Neb., as measured at the U. S. Weather Bureau from Sept. 18th, 1874, to Nov. 25th, 1893. The report was as follows, the table giving the amount by seasons and years in inches and hundredths:

Table with columns: YEAR, Sept, Oct, Nov, Dec, Jan, Feb, March, April, May, June, July, August, ANNUAL. Rows for years 1874-75 through 1893-94.

Remarks on the rainfall of the summer season—The above record shows that our summer rainfall varies from four to thirteen inches. Anything less than ten inches for the month of June and July and August is not sufficient for a good crop.

Ten times out of nineteen we have had less than ten inches in the summer season. Thirteen inches have fallen only twice in nineteen years, in 1883 and 1891. The greatest rainfall in any summer was 13.55 inches in 1891, the year that we had such great crops. This is the greatest fall we ever had in any summer. The least rainfall was 3.81 inches in 1886. In the drought year of 1890 we had 4.87 inches for the months of June, July and August.

Spring season—With the exception of the spring of 1880, when 2.62 inches fell, the spring of 1893 was the driest ever experienced in nineteen years, the precipitation for last March, April and May amounting to only 2.72 inches. The greatest rainfall in any spring was in 1888 when 8.73 inches fell; the next in 1892 when we had 8.61.

Remarks on the fall season—We have had less moisture this fall than ever before. The greatest fall precipitation was 6.02 inches in 1877, against 0.45 this year.

Winter season—Our winter precipitation is always light, but our last winter was the driest since the winter of 1887-88. The greatest occurred in 1877-78 when we had 4.04 inches and the least 0.31 of an inch in 1875-76.

Speakers for the Convention. The following list received yesterday morning is self explanatory: SALINA, KANSAS, Nov. 25th, 1893. Mr. I. A. Fort, North Platte, Neb.

Dear Sir—We had a very fine occasion at Wichita and it was very successful. We will be with you at North Platte on the 19th of December. Put on the programme for a paper. Hon. J. M. Miller, secretary of the state board of agriculture, Kansas; Hon. J. S. Emery, national lecturer of the interstate irrigation congress; Hon. E. R. Moses, president of the interstate irrigation association, and myself as secretary of the interstate irrigation association.

Also put Mr. B. A. McAllister, of Omaha, on for a paper on "The results of irrigation in Kansas and Nebraska." Write and send circulars all over the state advertising your meeting, open the doors wide to delegates and get us as large a delegation as possible.

I am greatly pleased with the prospects and will write to a number of Nebraska people with whom I have had correspondence in regard to irrigation urging them to give you all the assistance possible in making the convention a success. Yours very truly, J. L. BURSTOW.

On account of the crowded condition of some of the rooms the janitor has been required to increase the seating capacity by putting in new seats.

Examinations are now in progress. By considering this phase of school work merely as a review of the daily recitations, the common dread felt among pupils is easily eliminated.

Inquiries are already being made for admittance to the high school at the beginning of next term. Should the attendance be larger than at present more room will be needed.

Messrs. Babbitt, the intermediate teacher of the first ward, has found it necessary on account of sickness to be absent from her work a few days this week. Mrs. Forrest acts as substitute during her brief absence from the school room.

At the monthly teachers' meeting Friday afternoon a vote was cast in favor of a two weeks' vacation at the close of this term. This will make it necessary to continue next term without the usual vacation in the spring.

It gives us pleasure to note the general success of the class of '93. Out of the entire class of twelve members six are teaching school, viz: Misses Sarah Ferguson, Bernice Spring, Grace Duncan, Evelyn Grady, Lottie Searle and Geo. McMichael.

The high school literary society expect to have a mock trial in place of the next regular literary session, Friday afternoon, Dec. 8th. The prosecuting and defending attorneys are already making a study of the case which will presumably be one of murder. Witnesses, jurymen and a judge are to be appointed and everything is being prepared to make this representation a success. P. L. M.

To the Poets. If E. W. Crane, the composer of the rhythmic rot in last week's Era, will call at this office and pay up his back subscription we will guarantee that THE TRIBUNE will not gripe or purge him. Or if he will promise to go to work, support his family and thus relieve his good wife of the necessity of taking in washing, we will gladly give him a receipt for the amount he owes us.

No More Garnishes.

The Denver News of Saturday contained the following item which will be of interest to many of our readers: Judge Hallett issued an order yesterday which is of importance to many employes of the Union Pacific. A. J. Weir petitioned the court for leave to garnish the receivers of the road to recover on a judgment, which he holds against an employe. The attorneys for the receivers argued that no garnishes could hold against them, they being officers of the court. Judge Hallett denied Weir's petition, but in order that justice may be done to persons who are creditors of employes he caused the following order to be entered:

"To the end that creditors having judgment against the employes of the said receivers not exceeding \$100 in amount may obtain payment of their claims it is ordered that upon filing a transcript of any such judgment with some local officer, to be designated by the receivers, the debtor named in such judgment shall appropriate at least ten per cent of his monthly earnings to the payment of such judgment until the full amount thereof shall be paid. Failing in such appropriation, such judgment debtor shall be dismissed from the service of the receivers."

There are thousands of garnishes proceedings had every year against a company employing so many men as the Union Pacific and the order affects every one of them. When the road went into the hands of the receivers there were numerous payments due to persons who had filed garnishes. The officers of the company did not know what to do, and referred the matter to Omaha. Since that time the employes and the persons garnishing have alike been unable to get any money. Judge Hallett now lays down the rule which will govern.

Suburban News. W. M. Holtry has purchased a corner of the Whiteside lot and will erect a dwelling in the near future. Thornly & Abshire will do the stone work and Mr. Thurber the carpenter work.

Dr. Powell is doing a good business now that the grippe is among us. A lively altercation took place between two of our best known business men a few days ago. One dared the other out in the street and then they both came to the conclusion that they were making fools of themselves and returned to the sidewalk. That's right boys. Talk if you must, but avoid making a circus for the crowd when there is no money in it. Willis Bobbitt is on the sick list and J. W. Hall has all he can attend to, taking care of the sick at home and doing chores for the whole section; but he managed to shoot a seventeen pound wild goose last Wednesday just the same which is more than most people would have time to do.

It is stated by good authority that the literary society at the Sisson school house has been perfected.

What is the reason that we can't have a Christmas tree in the Nichols school house on Christmas night? All think the matter over and perhaps we can.

There has been over 1200 tons of baled hay shipped from this station so far this season, besides several carloads of grain and potatoes.

About a dozen ladies from this community assembled at the home of Mrs. Chas. Tollison on Thursday last and indulged in a "rag bee." Nearly twenty pounds of rags were sewed and wound into balls. All report a pleasant time.

Mrs. George Sison and family visited relatives for a short time in Iowa recently while on their way to their new home in Michigan.

Owing to the dry weather and high winds which have prevailed to considerable extent of late the farmers are not going to derive much benefit from their corn fodder as the leaves have been blown from the stalks, leaving them in a stubble state.

When that new house is completed a social hop will take place in the same for a fact and the "light fantastic will be tripped" to good music.

There would be more money in this country if the farmer could convert their potatoes into either corn, oats or hay.

It is with regret that we learn that Miss Kate Sullivan who left this place the first of October for a visit with relatives and friends in Wisconsin, has not, owing to lung trouble, been able to be out of doors since she arrived in that state.
