Correctly Answered.

Not many days ago a school teacher was talking to some of his brightest pupils, and asked them: . "What do you consider is the science of human happiness?" A beautiful and intelligent little girl of some eleven years said that she had heard that it was to bestow the greatest number of benefits on the greatest number of people. Then whom in this city, for instance, do you consider lives up to that philosophy in the sincerest manner? Without a moment's hesitation the little girl replied:-

RICHARD BROS. OF THE FAIR STORE, the popular dealers in town; their benificence in placing boundless bargains before the people is never ending.

The fair scholar was quite correct. During the last ten days we have doubled our stock of shoes and we have now one of the largest and most complete lines west of Omaha, and have also slashed the price on all that would stand it. We have also just opened a nice line of SPRING JACKETS AN CAPES of the latest styles at moderate prices. Our line of DRESS GOODS must be seen to be appreciated. They are the greatest values that ever reached the city. The reason we are having such a nice trade in this line, as well as in all other lines, is because we mind our Ps and Os-Price and Purity, Quality and Quantitity. People are apt to appreciate the highest in purity when it is associated with the lowest in price. Yours for Business.
