KEITH'S BLOCK, OPPOSITE THE UNION PACIFIC DEPOT

### City and County News.

—W. T. Wilcox was in Kearney Saturday transacting business of a legal nature.

—Mrs. J. C. Ferguson, of Fremont, is the guest of her sister, Mrs. Bare.

—A boy baby was born to Mr. and Mrs. H. C. Blickensderfer on Friday evening last.

—Mrs. Armbruster, of Lexington, has been visiting her daughter, Mrs. Blickensderfer, for several days past.

—Messrs. Church and Patterson were in Farnam Saturday, where they addressed a large political gathering.

—Prof. Hicks predicts that the present month will be a very stormy one, and advises people to prepare for the same.

—The lumber for the new bridge at Maxwell is expected any day and work will commence immediately after its arrival.

—G. H. Cutting, chairman of the republican congressional committee spent Saturday in town, having accompanied Matt Daugherty.

—If the care of the hair were made a part of a lady's education, we should not see so many gray heads, and the use of Hall's Hair Renewer would be unnecessary.

—Mr. Federhoof hopes to be able to open the new Hotel Neville the early part of next week. The work of remodeling the building has not progressed as rapidly as was anticipated.

—Syl Friend took his sprinkler off the streets last week, and will now devote his attention to draying. He is well fitted for this latter business, and respectfully solicits your patronage.

—Messrs. Park, Dillon and Barnum returned Friday from their hunt in Wyoming, bringing home the carcasses of nine antelope. THE TRIBUNE acknowledges a liberal supply of antelope roast from Mr. Barnum.

—A. S. Gregg was in from Cox precinct Saturday, and informed the agricultural editor that fields sown with rye and wheat this fall were looking green. They had a fairly good rain in that section ten days ago.

—The permanent cure for chronic catarrh is to thoroughly expel the poison from the system by the faithful and persistent use of Ayers Sarsaparilla. This wonderful remedy proves successful when all other treatment has failed to relieve the sufferer.

—The republican campaign in this county was closed Saturday night by a meeting at the court house at which Matt Daugherty and Judge Hoagland made good speeches. The former was not in voice, but he caught the audience and applause was frequent. Judge Hoagland's speech was one of the best he ever made.

### Blood Poison

THE BANE OF HUMAN LIFE,

Driven Out of the System by the Use of

### Ayer's Sarsaparilla

"For five years, I was a great sufferer from a most persistent blood disease, none of the various medicines I took being of any help whatever. Hoping that change of climate would benefit me, I went to Cuba, to Florida, and then to Saratoga Springs, where I remained some time drinking the waters. But all was no use. At last, being advised by several friends to try Ayer's Sarsaparilla, I began taking it, and very soon favorable results were manifest. To-day I consider myself a perfectly healthy man, with a good appetite and not the least trace of my former complaint. To all my friends, and especially young men like myself, I recommend Ayer's Sarsaparilla, if in need of a perfectly reliable blood-purifier."—JOSE A. ESCOBAR, proprietor Hotel Victoria, Key West, Fla.; residence, 332 W. 16th St., New York.

Ayer's Sarsaparilla

Admitted for Exhibition

AT THE WORLD'S FAIR

1893

### COMPOSITION ON A BOY.

A boy is a man before he is grown up. But his pants only run down to his knees. A boy is a very useful article. His usefulness comes in when his big sister wants him to run an errand; but his principal usefulness is in wearing out clothes, especially pants. Some boys wear out one pair each season. Others wear out two every week. The cut below illustrates a happy boy. Why is he happy? Because his mother has bought from us

This outfit consists of a Double Breasted Coat, two (2) pairs of pants, and the latest style Stanley Cap of same material. (Extra buttons with every outfit.) The goods are of most excellent and stylish fabrics especially adapted for service, and we can sell you the whole outfit as cheap as you can buy the bare suit from other dealers. Buy our Stanley Combination for your boys and make them happy.

### MODEL CLOTHING HOUSE

Max Einstein, Prop.

—The annual dance by the fire department on Wednesday night of last week was largely attended, and the participants seemed to enjoy the affair immensely. At this writing full returns of the receipts have not been made, but it is thought the ball will net the department at least fifty dollars.

John Herrod, the popular grocer, has lately received a fine assortment of china ware, including several handsome dinner sets. His display of fancy plates, cups and saucers, vases, etc., is undoubtedly the most complete ever brought to town. If you have not looked over his stock, do so before the finest articles are sold.

—I. A. Fort has sent in an order for 1,000 maps of Lincoln county 24x28 inches in size which will show the precinct divisions, the school districts, the lines of irrigation canals, the bridges across the Platte rivers, and much other information regarding the county. Mr. Fort has devoted much time in preparing the copy and the map will be absolutely correct.

—While it is generally admitted that leaves fertilize the ground, yet it is not a good plan to allow them to remain on the ground. Blown by the wind into fence corners and against other obstructions they become solidly packed by the rain and snow of the winter season, and in the spring it will be found that the blue-grass and clover under the leaves has been killed. At least some of our citizens found this to be the case last spring.

—A gentleman who does not wish to gain notoriety by having his name published, is willing to bet one thousand dollars against one hundred that next year will prove one of the best crop seasons we have ever had in this section of the state. He has been studying the signs for several months, and his prediction is based on the knowledge gained from that source. We sincerely hope the gentleman's prophecy will come true.

—The monthly weather summary for October issued by Observer Piercy shows the mean temperature to have been 52 degrees, the highest 83 and the lowest 18. The mean temperature for the month for the past twenty-one years has averaged 50 degrees. The movement of wind during October aggregated 7,781 miles, forty miles per hour being the maximum velocity. During the month the rainfall amounted to fifty-nine one-hundredths of an inch which is but little over one-half the average for the month during twenty-one years observation, though a half inch more than we had in October of last year.

## MILLINERY AT RENNIE'S.

New Fall Goods to be Sacrificed.

We offer all our elegant stock at one-fourth off on the dollar.

## Millinery Sale at Rennie's.

### BRADY BREEZES.

G. O. Proctor shipped a car of cattle to Omaha, on Friday.

Paul Myers has been doing surveying in this vicinity for the past few days.

G. D. Mathewson transacted business at the county hub, on Friday.

Misses Burke and Marrcotte visited friends at North Platte on Saturday.

Linn Mathewson, Fred Ericsson and Wm. McIntire attended the republican rally at North Platte last Saturday.

Mrs. Ebersole arrived from the east Friday morning.

Wm. Finch has gone to work on the south side ditch.

Local nimrods report the game in these parts very scarce this fall.

Little Edith James is dangerously sick with the lung fever. Doctor Smith of Gothenburg was in attendance Wednesday night.

Considerable baled hay is being hauled from here by parties over on the B. & M. R. R.

Mr. McKee has his house finished, and will move in this week.

A party of Lincoln sports spent a couple of days last week hunting in this vicinity.

Fred Ericsson has sold his interest in the Brady livery and feed stable to Mr. McIntire.

It is reported that J. K. Stockton contemplates joining a colony that intends to locate on the Grand river in Utah. J. K. will be strictly in it if he gets to preaching "Pop" doctrine to the Mormons.

Halloween night was duly observed by the youths of our village. It is reported that some of them have done nothing since but mine for bird shot in their anatomy.

The Athenian library society's first meeting was held in the Brady school house. A large number of young people were in attendance and an interesting program was carried out. The question for debate was Resolved that Canada should be annexed to the United States. The affirmative side with Prof. P. C. Cullen, as leader, came out victorious.

There were no services at the M. E. church last Sunday morning, but in the evening Rev. Ebersole preached one of his excellent sermons to a well filled house.

### WIGGINS.

The Oxnard beet sugar factory yesterday shipped to the Columbian distillery at Omaha 15,000 gallons of molasses. This is a part of the syrup remaining over from last year's run of beets, which the factory people have heretofore been compelled to dispose of to vinegar factories over the country at whatever prices they could realize. The discovery was made by the Columbian distillery that the syrup could be utilized in the manufacture of brandies and whiskies, an account of which was given in these columns last week. The internal revenue on manufactured whiskies of this character is \$1.10 per gallon, and thus from the product of the Nebraska factories the government would get in return for the same some thing like \$30,000. The entire bounty paid to Nebraska factories was less than \$23,000 last year, so that the government in return gets a handsome profit on its bounty investment. This gives an idea to the bounty fighters what might be accomplished for this state by retaining at home not only the millions sent abroad for sugar, but the building of hundreds of other factories and distilleries that would make this eventually one of the richest states in the Union.—Grand Island Independent.

Studebaker Wagons at Hershey & Co's.

THE Gandy Pioneer, anticipating that the legislature this winter will make a big appropriation for the enlargement of the state university buildings, advocates the establishment of normal schools in different sections of the state, instead of increasing the accommodations of the university. The Pioneer among other things says: "The reason the university is crowded is that many citizens of Lincoln prefer to send their children to the preparatory department of that institution rather than keep them in the city schools where they properly belong. The high schools of almost all the cities in Nebraska cover the branches taught in the preparatory course in that institution, and a graduation certificate from such schools entitles the holder to enter the first year's course in the university, which is next higher than the preparatory department. The catalogue of the university will bear out this statement. The western part of Nebraska pays its share of the taxes to maintain the public institutions of the state, but is so far without a public building. Kearney is in the east half of the state, yet it is the most western city in the state that has received recognition at the hands of any Nebraska legislature in the location of institutions maintained by public money. Knock out the preparatory course in the university and the building is ample for the purposes intended. North Platte, Sidney, Broken Bow and Chadron could each have a state normal school at less expense to the state than a new building for the state university. If money is to be appropriated to increase the educational facilities of the state, let it be in the shape of normals, and stand up for western Nebraska when they are located.

Judging from late statistics, India still remains a magnificent country for sportsmen. In 1892 21,988 human beings and 81,668 head of cattle were killed by snakes and wild beasts, the chief human mortality—19,025—having been due to snake bite. Tigers claimed 947 human victims, leopards 260, wolves 182, bears 145, and elephants 72. On the other hand, whereas only 4,498 cattle were killed by snake bite, no fewer than 20,969 were devoured by tigers, 30,013 by leopards and 6,758 by wolves.

Young America, middle-aged America and old America are reported to be buying bicycles at the rate of \$10,000,000 a year. And all the time the price of horseflesh is gliding downward, the traction companies in the smaller cities are losing a great deal of profitable traffic, and the carriage makers are mourning the good old days before the young man had ever heard of the pneumatic construction for the accommodation of two riders. In its modest and unassuming way the bicycle is bringing about one of the notable revolutions of the country.

### RHEUMATISM.

Rheumatism is caused by Uric Acid in the blood, and is an unfailing indication that Kidneys are performing their functions imperfectly. After the poison has entered the system, the symptoms are aggravated by dampness, exposure to cold, improper food, drinking to excess, etc., but the cause remains the same, imperfect action of the Kidneys. Dr. Humphreys has given the treatment of rheumatism his profound attention for over forty years; his Specific No 15 is the result. It goes directly to the spot, opens the clogged passages, permitting the secretions to pass off, the cure follows quickly and surely. No 15 cures rheumatism, acute and chronic, lumbago, sciatica, and all forms of rheumatic pains, soreness, stiffness and lameness. A small bottle of pleasant pellets; fits your vest pocket. Sold by druggists, or sent on receipt of price, 25 cents, or five for \$1.00. Humphreys' Medicine Company, corner William and John Sts., New York.

Surgeon O'Reilly, of the United States Army, who is acting as the President's physician, has vaccinated Mrs. Cleveland, Ruth and Esther, and the entire force of white house employees. The president was vaccinated a short time ago, and it was not considered necessary for him to undergo the operation.

### From

### High Government Authority.

No authority of greater experience on food products exists than Dr. Henry A. Mott, of New York. Dr. Mott's wide experience as Government Chemist for the Indian Department, gave him exceptional opportunities to acquaint himself with the qualities and constituent parts of baking powders. He understands thoroughly the comparative value of every brand in the market, and has from time to time expressed his opinion thereof. On a recent careful re-examination and analysis he finds

### Dr. Price's Cream Baking Powder

superior to all others in strength, purity, and efficiency. Dr. Mott writes:—

"New York, March 20th, 1894.

I find Dr. Price's Cream Baking Powder to be superior to all others, for the following reasons:—

1st. It liberates the greatest amount of leavening gas and is consequently more efficient.

2nd. The ingredients used in its preparation are of the purest character.

3rd. Its keeping qualities are excellent.

4th. On account of the purity of the materials and their relative proportions, Dr. Price's Cream Baking Powder must be considered the acme of perfection as regards wholesomeness and efficiency, and I say this having in mind certificates I have given several years ago respecting two other baking powders.

The reasons for the change in my opinion are based on the above facts and the new method adopted to prevent your baking powder from caking and deteriorating in strength.

HENRY A. MOTT, Ph. D., L. L. D."
