VOL. X.

NORTH PLATTE, NEBRASKA, WEDNESDAY, NOVEMBER 14, 1894.

NO. 45.

New Goods! New Goods!

Just arrived for The Boston Store.

In the month of September when our large fall stock arrived a great many asked what we would do with such a large stock these hard times, but the answer is: The quality of our goods and low prices has given us an opportunity to duplicate our stock and we are bound to sell it off this month (November) to make room for Holiday Goods.

READ OUR PRICE LIST.

KEITH'S BLOCK, OPPOSITE THE UNION PACIFIC DEPOT

City and County News.

Mart English, living in the west part of town, became the father of twin boys last week.

The Episcopal ladies will serve supper at the guild house on Thursday evening of this week.

E. B. Warner went to Hastings Monday to attend the state council of the Improved Order of Red Men.

A public supper will be served by the ladies of the Presbyterian church on Tuesday evening of next week.

Rev. Nathan will open his revival meetings here on the 23d inst. Success will undoubtedly crown his efforts.

Out of respect to Miss Barber, who was a member of the choir, no services were held at the Episcopal church Sunday.

A girl baby was born to Mr. and Mrs. A. L. Davis Saturday evening last, and happy Al is doubly so since the arrival.

Neglect of the hair often destroys its vitality and natural luster, and causes it to fall out. Before it is too late, apply Hall's Hair Renewer, a sure remedy.

The Methodist social at the Dillard residence Friday evening was largely attended and the enjoyment of the hour were up to the standard.

E. E. Larson, late of Knoxville, Iowa, is studying medicine with Dr. Duneson of this city. Mr. Larson is a brother of Mrs. Duneson.

Mr. and Mrs. R. P. Forrest left last week for Silvan Springs, Arkansas, where Mr. Forrest will probably engage in the newspaper business.

Prepare for the worst, but hope for the best, says the old proverb. Hope for health, but be prepared for colds, coughs, croup, bronchitis, pneumonia, or any other throat or lung difficulty by having Ayer's Cherry Pectoral always at hand. It is prompt to act, sure to cure.

Mrs. W. S. Sprague is going to make an extended trip to Cleveland, Ohio, as the guest of Mrs. E. P. Sprague, Mr. Sprague's mother. Mr. Sprague has retained the Norton lobe on Fifth street, and will try his hand keeping tractor's hall.

Prior to their departure for Grand Island, Mr. and Mrs. H. Schuff were tendered a surprise party by a large party of friends. Mr. and Mrs. Schuff are people who the business and social circles of North Platte can ill afford to lose, but the best wishes of our people follow them to their new home.

Five bikers from North Platte made the run from that city to this on Sunday last, a distance of sixty-one miles. The party consisted of Guy Laing, Ed Friend, Frank Murray, John Lemasters and W. H. C. Woodburn. When the party reached Grand Island, O. O. Carnahan of that town joined them and rode to this city. They returned to their homes on No. 1 Lexington Pioneer.

"Fara the records out" - the familiar party cry - may be applied to microbes as well as to men. The germs of disease that lurk in the blood are "stirred out" by Ayer's Sarsaparilla as effectually as the old postmasters are displaced by a new administration.

COMPOSITION ON A BOY.

A boy is a man before he is grown up. But his pants only run down to his knees. A boy is a very useful article. His usefulness comes in when his big sister wants him to run an errand; but his principal usefulness is in wearing out clothes, especially pants. Some boys wear out one pair each season. Others wear out two every week. The cut below illustrates a happy boy. Why is he happy? Because his mother has bought from us

This outfit consists of a Double Breasted Coat, two (2) pairs of pants, and the latest style Stanley Cap of same material. (Extra buttons with every outfit.) The goods are of most excellent and stylish fabrics especially adapted for service, and we can sell you the whole outfit as cheap as you can buy the bare suit from other dealers. Buy our Stanley Combination for your boys and make them happy.

MODEL CLOTHING HOUSE

Max Einstein, Prop.

Miss Letha Barber died at the Episcopal parsonage at seven o'clock Saturday evening from malaria fever, after an illness of four weeks. She ceased camp to this city the 1st of September and took charge of one of the schools in the Central building, but after teaching a month was taken sick. Her sickness from the start was severe, and being rather frail and lacking a strong constitution she could not combat the attack. The remains were taken to Kearney Sunday morning for interment, accompanied by Mrs. Barber and son Chas. E. Miss Barber was a young lady of refined and sweet character, and during her short residence here made many friends who deeply regret her death.

The employees at the U. P. shops have organized a "mutual relief society" among their numbers, the object of which is to assist distressed workmen. A fee of fifty cents for membership is charged with a monthly due of fifty cents, until the treasury shall have \$100 in the same. The amount on hand shall never exceed that, and this will be used whenever the board of trustees deem it necessary to assist some itinerant or local mechanic out of employment, thus saving the shop men the annoyance of petitions and almost daily begging which frequently bothers them greatly in their work. - Grand Island Independent.

A very happy event took place at the M. E. parsonage last Tuesday evening. A large number of our citizens, without respect to denomination or creed, met at the home of Mr. and Mrs. MacLean and marched in a body to the parsonage, where they surprised the newly appointed pastor Rev. D. W. Crane and wife, by taking possession of the house and occupants for several hours. A very pleasant evening was enjoyed by all. A substantial testimony of their kind regards was left by the visitors in the way of provisions and other necessities. The business men presented Rev. Crane with a handsome volume of Webster's Dictionary. Dr. Harris making the presentation speech. H. B. Fleharty also presented the pastor with five volumes of theological books. - Ogallala News.

Since wheat-fed hogs weigh fully as much and are as healthy and vigorous and quite as satisfactory to the packers as any other kind, that question would seem to have been settled once for all. At the ruling price of wheat and corn, and with a pig foreign wheat crop in the bargain, there will be ample opportunity for every farmer to try the new method for himself before the winter is over. And if it should prove in general usage all that has been claimed, then no one can regret the temporary low price of the great bread-stuff staple.

25 Per Cent Off. 25 Per Cent Off.

MILLINERY AT RENNIE'S.

New Fall Goods to be Sacrificed.
We offer all our elegant stock at one-fourth off on the dollar.

Millinery Sale at Rennie's.

IRRIGATION
Makes a prosperous country.
Insures full crops every season.
Is cheaper than rain.
Is the oldest system of cultivation.
Produces support for a dense population.
Multiplies productive capacity of soils.
Creates wealth from water, sunshine and soil.
Makes the farmer independent of rain fall.
Makes the production of choicest fruit possible.
Affords a sure foundation for the creation of wealth.
Has become popular because of profitable returns.
Gives arid lands a large advantage over rainfall areas.

Pumping water for irrigation is yet in infancy, especially by wind power, and which it is claimed is the cheapest and least expensive of any way yet devised to pump water for irrigation on the western plains. Notwithstanding all classes of steam power pumps, fuel is too expensive in this section of the country for individual plants. This may do for corporations, but not for the single-minded farmer. The wind blows just as hard and is as powerful as it passes over a poor man's farm as it is anywhere else on the face of the globe, and pumps are now manufactured for wind power that are within the reach of any poor man. Any man in western Nebraska who has energy, grit and courage can make a living for himself and family on ten acres of land and have a home that is and would be a credit to himself and the country in which he lives.

The months are coming now when farmers should hold meetings in their school districts and discuss the best method of irrigating portions or all of their farms. Politics will soon be laid aside and there will be ample time for such discussions, and much good will result. While it may not be possible to ditch and irrigate all of Nebraska soil, yet there are methods whereby small portions of every farm in the state could be provided with ample water to least prevent the recurrence of another total failure of crops in this state.

To puddle a leaky reservoir to keep the water from seeping away it is only necessary to run very muddy water into it and allow the sediment to find its way into the loose sand. Of course the more clay that is carried in the muddy water the more effectual will be the puddling. This method has proven successful in a very leaky lake which had been excavated in an old creek bottom and almost entirely in course loose sand.

The Miller deluge pump, made by Howard Miles, of Paxton, was tested at Sidney a few days ago, and the town and country turned out to see the test which proved to be beyond their most sanguine expectations, it having delivered 100 to 200 barrels per hour. Mr. Jones, on whose farm the pump was placed, is so delighted with the results that he has ordered another 14 inch pump to be attached to the same wheel, the one pump not working the mill to more than half its capacity. The secret of the great success of this pump is in a patent adjustable stroke attachment that changes the stroke from four to twenty inches, according to the strength of the wind. The great quantity of water delivered makes it more economical than to irrigate from a ditch, and with a proper reservoir capacity much more certain, why not irrigate and be independent?

In an interview with W. E. Smythe, the editor of the Irrigation Age, on the subject of individual or wind mill irrigation he says: "Probably four fifths of the land irrigated in this state ten years hence will be supplied by pumps, wind-mills and other mechanical appliances. It remains to be demonstrated how generally Nebraska farms can be watered

by this means, and how much of the average quarter section can thus be made secure against drought. I am an optimist and believe that the ultimate achievement in this direction will far out run the highest hopes of today. The canal will doubtless be preferred wherever it is practicable since it involves very little original outlay on the part of the farmer. He has only to connect his field with a lateral and he is ready to begin irrigation. But there is much to be said in favor of the individual plant. It costs more to start with, but the owner of a small plant adequate to his needs, is evenly independent. In every sense of the word he is the freest man who walks the earth. Between the Missouri river and the Pacific ocean are tens of millions of acres that can be watered. Between the Missouri river and the Atlantic ocean there are millions of people who have learned that no man is independent in the true sense who does not live under his own roof and support himself from his own acres. Only five per cent of the American people own land. The absorption of great areas by syndicates and corporations goes forward much faster than the requirement of small tracts by individuals. The Roman empire fell when 2 per cent of its people only owned land. The Egyptian empire when but 1 1/2 per cent owned land. We are treading on dangerous ground unless we can create a new bulwark for liberty in the class of small landed proprietors. This can be done only by the reclamation of our arid domain and the division of our semi-arid lands into small farms. I say that irrigation as a national policy means "a new birth of freedom" even more truly than does events to which Lincoln referred in the immortal speech at Gettysburg.

NEW HOMES FOR MILLIONS
"Tell the people of Nebraska that we are going to make homes for millions of men; that in these homes irrigation shall guarantee industrial independence, and the small farm unite a reasonable degree of human equality. Tell them that the foundation of our industrial philosophy will be the systematic production of what each family consumes. Tell them that electricity will be their partner of irrigation and that the densely populated agricultural districts of the new Nebraska will have all the advantages of town life and few of its evils, all the charm of country life without its present loneliness. Nebraska's best days are before her. The historian will refer to them as the irrigation era." - Irrigation Farmer.

The text man who moves for fusion in a democratic state convention in Nebraska will be gently but firmly taken up and pitched out of the nearest window. The democrats of this state may not be very smart, but they know when they have taken as much of the Bryan medicine as their constitutions will stand. - Journal.

From High Government Authority.

No authority of greater experience on food products exists than Dr. Henry A. Mott, of New York. Dr. Mott's wide experience as Government Chemist for the Indian Department, gave him exceptional opportunities to acquaint himself with the qualities and constituent parts of baking powders. He understands thoroughly the comparative value of every brand in the market, and has from time to time expressed his opinion thereof. On a recent careful re-examination and analysis he finds

Dr. Price's Cream Baking Powder

superior to all others in strength, purity, and efficiency. Dr. Mott writes: -

"New York, March 20th, 1894.
I find Dr. Price's Cream Baking Powder to be superior to all others, for the following reasons: -
1st. It liberates the greatest amount of leavening gas and is consequently more efficient.
2nd. The ingredients used in its preparation are of the purest character.
3rd. Its keeping qualities are excellent.
4th. On account of the purity of the material, and their relative proportions, Dr. Price's Cream Baking Powder will be considered the *acme of perfection* as regards wholeness, and efficiency, and I say this having in mind certificates I have given several years ago respecting two other leading powders.
The reasons for the change in my opinion, which for the above facts and the new method adopted in preparing baking powder from baking and deterring in strength."
Henry A. Mott, Ph.D., U.S. Chemist.
