If not paid when due 10 per cent from date of sale. A discount of 5 per cent for cash on purchases over \$10. No property to be removed until terms of sale are complied with.

F. C. JONES.  
C. O. SNOW, Auctioneer.  
R. C. BOYD, Clerk

## Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

## The Nebraska Advertiser

W. W. SANDERS & SON, Prop's.

FRIDAY, FEBRUARY 10, 1905.

Auburn, Nebr., Feb. 3.

Mrs. A. Rhoda Dort, the mother of Druggist Edward H. Dort, died at the country home of her daughter Mrs. Fred Dysert at an early hour this morning, aged eighty-one years. Mrs. Dort has been in feeble health for a number of years. Her husband died at Rockfort, Wis. in August, 1872. She was the mother of seven children: F. O. Dort, formerly of Sterling, this state, but now of Oklahoma; Edward H. and Mrs. Dysert of Auburn, and two living in Oklahoma.

D. D. Muir, formerly a well known banker of this county, and of late a national bank examiner at Baltimore, has been made president of the Merchant's National bank of Worcester Mass. This bank opened its doors on Monday, with a capital of \$500,000 and a surplus of \$250,000. The presidency is therefore a position of great responsibility and influence.—State Journal

Mr. Muir, referred to in the above item, is a former Brownville boy. He is the son of R. V. Muir of Brownville. For many years he was in the banking business at Lincoln.

## How's this?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

WALDING, KINSAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation

Conductor Cronkrite, of the B. & M. who came in from the south last evening reports that night before last his train became stuck in a snow drift west of Blue Hill and remained there the greater part of the night. Finally another engine came to the rescue and pulled the whole train out and took it to Beatrice where it was turned around and sent to this city. He is confident that he would have been able to break through the drift but for the fact that the engine gave out and froze up. He says that he did not find it any funny thing for either himself, crew or passengers to be out that bitterly cold night where the wind got a fairly good sweep at them and kept them busy all of the time looking after the fires to keep them warm.—Neb., City News Fe. 3b.

If every feeder of young steers in Nemaha county would read Wayne Dinsmore's article on "Feeding Young Steers for Market" in the current issue of The Homestead, and faithfully apply the principles inculcated, it would be advantageous for all concerned. The article is in answer to a query from a stockman who contemplates feeding twenty high-grade Angus steer calves that will be a year old in April and May. Prof. Dinsmore says the calves should now weigh 500 to 550 pounds and should gain from 800 to 800 pounds in the next ten months and be ready for market in November or the first of December. "Greatest possible gains consistent with reasonable cost of food should be the aim," he declares. He goes on to discuss the various factors composing the several possible balanced rations to force calves in this manner. The article is full of facts and sound logic; and the Advertiser regards the publication of such special articles by The Homestead as highly commendable. We are taking large numbers of subscriptions for this excellent farm paper.

## Grave Trouble Foreseen

It needs but little foresight, to tell that when your stomach and liver are badly affected, grave trouble is ahead, unless you take the proper medicine for your disease, as Mrs. John A. Young of Clay, N. Y., did. She says: "I had neuralgia of the liver and stomach, my heart was weakened, and I could not eat. I was very bad for a long time, but in Electric Bitters, I found just what I needed, for they quickly relieved and cured me." Best medicine for weak women. Sold under guarantee by W. W. Keeling, druggist, at 50c a bottle.

## Lincoln Letter

By special invitation the writer accompanied the Senate and House committees to the Kansas penitentiary to investigate the workings of the state binding twine plant. The visit resulted in some important information which may later be turned to account to the great benefit of the farmers of Nebraska. The committees have joined in a strong report on the subject.

The Kansas factory was established for two reasons: To fight the twine trust, and to provide labor for the state prisoners at something that would not come into competition with the other labor in the state. When the matter was taken up by the Kansas legislature a few years ago the agents of the trusts were very active, but they did not succeed in preventing the establishment of the factory. The first twine was made in 1900, but was not marketed until the following year. The factory, machinery and buildings cost \$44,000 and the state provided a fund of \$150,000 to do business on. That fund has since grown to \$218,000 by reason of profits of the factory, without further appropriation.

The factory made 1,000,000 pounds in 1901, 1,400,000 in 1902; 1,750,000 in 1903; and 2,500,000 in 1904. This was marketed direct to the farmers in most cases, at a price of from three to five cents per pound less than the price paid the trust by Nebraska grain raisers. It resulted in cutting the price of trust twine in Kansas to a cent and a half or two cents less than paid in Nebraska. The resultant saving on the eight millions of twine used in Kansas is immense. In Nebraska, which uses nearly seven million pounds, the overcharge runs into hundreds of thousands of dollars, as compared with the competition in Kansas.

The officials there find that they can manufacture twine at an expense of less than nine cents a pound, and this is figuring the prison labor at 50 cents per man per day, coal at \$5 per ton, and all salaries of superintendent, expert and guards for that department. In Nebraska at the present time the labor of the prisoners is contracted out to private parties at 42 cents per day, and the state furnishes all the heat, power, buildings and guards. And the goods manufactured comes into direct competition with Nebraska labor and industries, the actual consumer, however, getting absolutely no benefit from the cheap labor of the prison.

To sum up: The Kansas twine factory is making a net profit of \$20,000 per year, is saving now at least \$75,000 per year to the farmers on its product and \$100,000 per year more on the trust product because of the competition. The people of Kansas, farmers, business men, newspaper men and officials unite in declaring the factory a great success, and the Nebraska legislators who visited the factory were also thoroughly convinced. Their report gives the matter in detail, and is a paper of much interest to Nebraska farmers, with this information the advisability of making the investment on behalf of the state is left to the legislature.

The project is of course receiving the hostility of the twine trust in this state, and the private contractor at the penitentiary who is getting the laborers at 42 cents per day with heat and power and rent furnished free. The people of the state, after they have read the full report of the committee will have an opportunity to judge the matter for themselves.

The chairman of the House committee that is working for this factory to fight the twine trust is Wm. Ernst, who has fully investigated the matter in a number of states, and has compiled a vast amount of valuable information which will be of much service to Nebraska.

F. A. HARRISON.

## Fraud Exposed

A few counterfeiters have lately been making and trying to sell imitations of Dr. King's New Discovery for Consumption, Coughs and Colds, and other medicines, thereby defrauding the public. This is to warn you to beware of such people, who seek to profit, through stealing the reputation of remedies which have been successfully curing disease, for over 35 years. A sure protection, to you, is our name on the wrapper. Look for it, on all Dr. King's, or Bucklen's remedies, as all others are mere imitations. H. E. BUCKLEN & CO., Chicago, Ill. and Windsor, Canada.

## SCHOOL NOTES

"Heights by great men, reached and kept,  
Were not attained by sudden flight;  
But they, while their companions slept,  
Were toiling upward in the night?"  
Longfellow.

The seventh grade have been studying committing Whittier's Maud Muller. They are doing strong work in Literature.

The primary pupils went into the intermediate room for work last Friday afternoon owing to Miss Paris's having to go home on account of the sickness of her mother.

Reading Circle meets next Saturday evening (Feb. 11) at Dr. Gaither's. Work will begin at 7 o'clock sharp. C. E. Sanders is leader and the lesson covers the third and fourth chapters of Geographic Influences. "Come let us reason together."

What is the relation of cold weather to school work? First, the mind is more alert and active; second there are fewer outside attractions than at other seasons and third, it throws the pupils together in the schoolroom thus giving opportunity to cultivate consideration for the rights of others. Of course we should not forget to mention that it keeps smaller pupils away more or less and the larger energetic ones are given an excuse for not coming.

We are in receipt of a copy of the Normal Journal published by students of the State Normal at Peru. The following are some of their suggestions:

"Don't talk too much, but listen and you will learn more."  
Don't value yourself too highly or some one may sell you.  
Don't chew—even gum. And above all don't chew the rag.  
Don't try to act funny when you are dull. The best time to be funny is when you can't help it."

There are two processes of evolution going on about us constantly; evolution of the animate and the inanimate object. One undergoes change because of outside forces acting on it, the other is transformed because it wills it, because it has a power that can not only equal the outside influences but can

over come them and make them serve its purpose. To the first class belongs the cloud or rock as it is acted on by the weather, to the second belongs the man in his best sense. Yet man may become so passive that he belongs no longer to the class to which man should belong. Pupils in their school work can easily degenerate in the inanimate class. Some of the symptoms are attention to everything but the lesson in hand, allowing socials to distract and other irrelevant matters to enter to the exclusion of the more worthy. To which do you belong?

## NOTICE OF TAX SALE

To the heirs of A. Walroth and all others interested.

Notice is hereby given that on the 15th day of June, 1903, the undersigned purchased at private tax sale for delinquent taxes of year 1901 and all prior years lot one (1) in block thirty nine (39), Nemaha City, Nebraska, and has paid all subsequent taxes. On or after June 15th, 1905, the undersigned will apply for a deed for such property unless redemption is previously made according to law.

Dated this 15th day of January, 1905.

PERSIA HILL.

## Poisons in Food

Perhaps you don't realize that many pain poisons originate in your food but some day may feel a twinge of dyspepsia that will convince you. Dr. King's New Life Pills are guaranteed to cure all sickness due to poisons of undigested food—or money back, 50c at Keeling's drug store. Try them.

## Notice for Hearing Claims.

In the county court of Nemaha county, Nebr. in the matter of the Estate of J. M. Keithley, dec'd.

Notice is hereby given that the court has made an order limiting the time for creditors to file claims against said deceased to six months from the 1st day of February, 1905, and that February 13th, May 13th and August 15th, 1905, at ten o'clock a. m. of each day at the office of the county judge of Nemaha county, Nebraska, in Auburn, Nebraska, has been fixed by the court as the times and place when and where all persons who have claims and demands against said deceased can have the same examined, adjusted and allowed, and all claims not presented by the last mentioned date will be forever barred by an order of the court.

Dated January 5, 1905.

J. S. MCCARTY, County Judge.

We will send the Advertiser, the weekly Lincoln State Journal, the Iowa Homestead, the Farm Gazette and the Homemaker, all one year for only \$1.50. The regular price of these papers is \$3.25.
