The Nemaha Coal Mine

We are going to insist on calling it this, even if it is in Brownville precinct and as near that place as it is Nemaha. Wm. H. Gillespie lives just half way between Nemaha and Brownville, on the bottom road. His farm runs up on the bluff. He has started a tunnel in the bank and has got back thirty or forty feet and has a vein of good coal but it is only eight or ten inches thick. However, it is getting thicker as he goes back and sinks a little, which is said to be a good indication. It is the same kind of coal as that from the Peru mine—burns well and is free from foreign substances.
