6 PER CENT FIRST MORTGAGE BONDS

To you are willing to do your part to put the criminal Oil trust out of business in seven Central Western States and enable this giant independent company to put forth a winning fight in a score of the largest trade cen-ters in the entire nation and do it with profit to yourself, send in your remittance for fifteen thousand dollars necess-wry to pay for enough of these bonds to build just one (1) fifty-five thousand barrel storage tank. Special effort will be made to find one hundred and ten individuals in the United States who will take fifteen thousand dollars of these bonds each at par during the next few weeks which will erect that many silent but most effective monuments against Oil trust many silent but most effective monuments against Oil trust oppression and to commercial freedom in the oil industry on Western soil. This will enable Uncle Sam Company to keep continually in storage at least a four years' supply for all three refineries at increased capacities.

By the most cruel discrimination of the well known commercial oil pirates the price of crude oil in the Kan-sas-territory oil fields has been forced to a ridiculously low price, while the trust is yearly storing millions of barrels practically stealing a supply which in a year or so it ex-pects to use to hamper the independent refineries. Produc-ers all over the field have continually offered to deliver their ers all over the field have continually offered to deliver their oil to The Uncle Sam Company, so their production, which they are compelled to let go to protect their wells, can at least be used as a weapon against their oil trust oppressor instead of a fostering asset. Uncle Sam Company now has three refineries completed and advantageously located with-in striking distance of every important trade center west of the Mississippi river and with very little cost can manu-facture and market at a good profit at least one and one half million harrels of ell yearly. million barrels of oil yearly.

The people everywhere are tired and disgusted with the fight any trust is to refuse to buy their goods wrongfully ac-fight any trust is to refuse to buy their goods wrongfully ac-fight at almost exactly the right hour. It has met with as-tonishingly rapid success from the word go. It has an army over nine thousand of loyal stockholders representing every part of the American continent. All this company has to do is to install its distributing stations all over the country and manufacture its oils and make sure of a certain continual supply of crude product for the future. To complete the bal-ance of four hundred main distributing stations, to enlarge day or better; to finish main trunk pipe line to mavigation and equip river transportation this company will sell five millions in bonds at par, which will also put in

Storage Six (6) Million Barrels of 39 Cent Kansas-Territory Oil

To Investors

The Uncle Sam Oil Company has reached the stage of its career where it is no longer a small local concern, but is assuming the proportions of a great national enterprise. It has three great refineries completed and miles of main trunk pipe line and laterals, scores of distributing stations and a great enterprise threefourths completed, easily large enough to market and manufacture at the very least five thousand barrels of oil per day. At the present time crude oil is selling at the ridiculously low price of 39 cents per barrel for the highest grade, while the plans of the criminal oil trust are to run it still lower. The Uncle Sam Oil Company has been considering this situation in all of its bearings for months, and there is practically but one same thing to do, and that is to build storage tanks and store at least enough of this cheap on to operate all three of the Uncle Sam refineries for all three of the Uncle Sam refineries for four years and to keep the storage built up so that a four years supply will always or Oklahoma form an independent oil orup so that a four years' supply will always be on hand. Every barrel of this oil placed in storage with the pipe line and distributing stations and equipment com-pleted will bring this company at least \$2 per barrel. This will enable the company to bring its oil sales up to four and one-half million dollars per year and will entributing stations and equipment comhalf million dollars per year and will enhalf million dollars per year and will en-able it to buy an additional million and a half barrels of oil each year to take the place of the amount manufactured and to read some of the laws of the place of the amount manufactured and land, they will find out that they are up against the real thing-trade competition against the real thing-trade competition against the real thing-trade competition. dollars of bonds yearly. For these pur-poses five million dollars of twenty-year first mortgage 6 per cent bonds will be cold sold. The production of crude petroleum in the Pennsylvania, Colifornia and Texas on'y great oil fields in the world to which the people must look for a supply of crude oil are the Kansas-Oklahoma fields. This oil is bound to increase in price and will be worth at least one dollar and a half a barrel in a very short time. The railroads and great manufacturing enterprises in Texas which have been using and are using oil for fuel are already making purchases in the Kansas-Oklahoma fields. Barring all this, crude oil would never have sold in these Western fields for less than one dollar a barrel were it not for the monopolistic grip held by the criminal trust, and, as the Uncle Sam Company has always claimed, just as quickly as this grip can be broken the price of crude oll is certain to greatly advance. While on the other hand, the trust has always played the same cut-throat methods, viz: They let independent refineries come into an oil field and, of course, it takes considerable time to build up and equip an independent plant for business. the independent plants are While building the trust runs the price of oil down and stores millions of barrels at a price which is little less, than stealing it. At present there is a production in the Kansas-Territory oil fields of close to eighty thousand barrels a day. There is a movement on foot to build an independ-ent pipe line to the Gulf of Mexico. and there are a number of other conditions which are sure to cause a rapid rise in the price of crude oil during the next two years. The Uncle Sam Oil Company is not going to be caught in any such trap. and it's only good generalship and a determination to protect this company and put it where no power on earth can interwith its onward successful march that bonds will be offered and sold and big tankage built forthwith and at least six million barrels of oil placed in storage.

of today is very similarly constituted to the Russian government, for any man who is familiar with conditions, especially in the Central West, knows that fully 50 per cent of their employes despise their methods and would leave their criminal masters tomorrow if they could earn a decent living in their chosen avocation elsewhere. Say what you please, the Uncle Sam Oil Company holds the key to the situation. It has an opportunity which never was and never will be up to another organization like it again probably in the world. The trust is going down hill, and if you have good, red blood in your veins and really want to do something practical to help a good faith, hard working young army of Uncle Sam stockholders at this very opportune time, strike sledge hammer blows for success and keep this trust outfit on the toboggan slide. put your shoulder to the wheel, send your check or draft by return mail for a block of these bonds, ask your neighbor to do the same, ganization in your locality and subscribe for enough of these bonds to secure the establishment of an independent distribu-

ent competition. The fact is the oil trust Cost of a Single Fifty-Five Thousand Barrel Tank.

It is very hard to carry through any large moneyed transaction in the United States without running up against some dummy tool director of the trust or one of its subsidiary corporations. One of the reasons why the trust has maintained the monopoly it has enjoyed is that capital has been afraid to enter into competition with it. In fact, we think there are very few men of large means who would individually care to call down on their heads the ridicule, abuse, annoyance and blackmailing methods of the trust and its hirelings. But by appealing to the general public as the Uncle Sam Oil Company has done from its beginning, and banding together nearly ten thousand loyal shareholders from every part of the country. I has been able thus far to raise the necessary funds to build up this enterprise to its present height of success. In other words, by combining the thousands of free and independent citizens who believe in free market and fair play and who consider the boast brazenly made by the of trust gang that they are even bigger than the government as a personal affront this company can, by securing a thousand dollars here and another thousand somewhere else, very easily raise all of the money needed to build up a giant independent enterprise capable of securing and maintaining the oil trade of the Central West, and under present conditions and the feeling of the people can practically drive the trust out of the home Western Central states. Uncle Sam Company should have at least a four years'

	All other oil holdings and leases 165,000.00 Sixty-eight distributing stations and equipment thus far com- pleted
	Manufactured and crude oil in storage and in transit 120,000.00
	Thirty-two tank cars 30,000.00
	Fifty-seven acres land, Wyan- dotte county, Kansas 6,000.00
	Money subscribed on contract stock already allotted from treasury, approximately 25,000.00
	Office furniture and fixtures at Tulsa, Bartlesville, Cnerryvale Kansas City, Atchison
	Cash on hand 12,000.00

	Total
	Of the above properties, with the ex- ception of approximately \$18,000, in- cluding pipe line notes and temporary loans and other items not due, these bonds are a first lien. Out of the first fifty thousand dollars received for these bonds pipe line notes and all other claims will be paid promptly. The fifty-seven acres of land mentioned in the above statement

on that the company is offering this land on that the company is offering this land for sale at six thousand dollars. It was purchased for \$4,900 to build refinery No. 2, but the plant was afterward built at Atchison where a location was secured for the building of the plant. The com-pany has no use for this land in its oper-ating business, hence will sell the same and turn the proceeds into the treasury.

Price of Bonds.

You can secure these bonds by sending in your check or draft for the par value of the bond, and for each thousand dollar bond purchased you will secure stock of the par value of \$500. For a larger or a smaller amount of bonds the same proportion will prevail. Make check or draft or money order payable to THE UNCLE SAM OIL COMPANY and the bonds will be sent to you after they are properly signed and the seal of the company attached and registered with the trustee, and will be sent to you by registered mail as quickly as the clerks can reach your turn. Make remittance as per following schedule:

50	bonds			5		2	-	e.	ģ		2					ŝ			•	e				.1

Monthly Payment Offer:

The company, in maintaining its former record in making it possible for investors of limited means to join our company, offers these bonds in monthly payments as designated below: In sendpany has no use for this sell the same and turn the proceeds into the treasury, and it is excepted from the mortgage backing the bonds for that reason. Eleven hundred acre lot 43 is also excepted in the mortgage for the reason that these oil rights are under the supervision of the oil rights are under the treason of the United States ing in remittances to secure these bonds

Oil Trust Power is Rapidly Waning

Public sentiment in this country is in a state of determination that will secure results from one side of this nation to the other. The oil trust and their subsidiary hirelings are secretly scared to death right now. They are trying all kinds of maneuvers to check the oncoming storm of righteous indignation and certain retribution for the crimes they have committed, the men and enterprises they have unjustly attacked and ruined and the same blackflag methods they will continue if they can. But the conservative, well-to-do middle class of the nation is after them and they will be stopped. It is not the cry of the demagogue which is going to halt this brigade of millionaire anarchists, but it is the thousands of men of means who do not believe in abusing the power of wealth and the broad American spirit of justice which, like a giant bat-ering ram is smashing down their illegal bulwarks and hypocritical defenses. Any man who knows anything at all needs only to place his ear to the ground and see and hear what is coming. Read the report of the interstate commerce commis-sion made just a week ago by seven of the ablest and most incorruptible statesmen in America. Read the warning given by the President of the United States in person to two of these millionaire brigands at a dinner in Washington last week. Read the proceedings of the United States court in St. Louis, where the government is applying for the dissolution of the trust and for receivers for its properties. Look at Missouri, which is passing an anti-disat Missouri, which is passing an anti-uis-orimination law to draw the claws of the trust, and, look at Oklahoma, the newest state in the Union, reading opposition to the trust into her constitution. Look at the conference of the governors of the seven Western states which will probably be in seven at Brocks. Kons. while you be in session at Topeka, Kans., while you are reading this advertisement to agree on uniform laws to curb the rapacity of

is only good, practical business sense to same thing. Hence great results, and the oil trust will slip a few more cogs toward build these storage tanks, which will last a life time and will be worth more in fifdeserved punishment for their misdeeds.

Where Tank Farms Will be Built.

From the sale of these bonds the Uncle Sam Company will be enabled to complete pipe lines, enlarge all three refineries, build the balance of four hundred main distributing stations, also build large paraffine plant at Atchison by the river refinery, and lubricating works at the Tulsa Uncle Sam refinery, and build one hun-dred and ten (110) fifty-five thousand barrel steel storage tanks and secure neces-sary tank farm locations. One of these tank farms will be near the Tulsa Uncle Sam refinery, accessible to the very high-est grades of oil containing valuable lub-ricants, and within a very few miles of the Glenn oil pool, which is now produc-ing over twenty-five thousand barrels of oll per day. Another of the Uncle Sam tank farms will be near one of the large producing properties of the company, viz: Eleven hundred-acre lot 43, Osage, near Bartlesville, I. T. Another of these tank farms will be at the Uncle Sam Cherryvale refinery another one on the; main trunk Uncle Sam pipe line near the Piqua pumping station, accessible to the Chanute and Humboldt oil fields, and a very large Uncle Sam tank farm will be estabished on the main trunk pipe line just south of the Kaw river in Shawnee county, Kansas, within eyesight of the dome of the capitol building of Kansas, where the worldwide oil fight was successfully inaugurated over two years ago. This tank farm will be used to store Kansas oil principally where it will be accessible for distribution for fuel purposes to all of northern, western and central Kansas as Uncle Sam oil burners are installed and the demand increases. Also by laying a pipe line less than ten miles the company will be in reach of the great fuel markets of the two Kansas Citys by a light barge line down the Kaw river from Lawrence In the event this company was ever hard

pressed for funds it could very easily unload a half million barrels of crude oil for fuel purposes to the big packers and other heavy fuel users in the two Kansas Citys on very short notice. So when you buy these bonds you will know that this company will not only keep a large cash surplus on hand to meet interest promptly and create a sinking fund, but it will also have several million dollars' worth of absolutely marketable and merchantable solutely marketable and merchantable property almost within a stone's throw of a ready market all the time. Another one of the tank farms will be established close to the Atchison Uncle Sam refinery on the banks of the Missouri river. Likewise this oil in storage will be accessible to the great fuel-using manufacturers that for thousands of miles line the banks of the Missouri and Mississippi rivers. Oil is just like so much cash when in storage and accessible to such outlets as these, for it will cost but very little to barge oil

up and down the Missouri and into the Mississippi and its tributaries. Bonds backed by such property mean that the interest will not only be paid promptly, but that the principal will be met. Times may get hard and money markets close, but of is a necessity. People will buy it to furnish light for their firesides as long as they will spend a penny to buy anything. At the present ridiculously low prices every barrel of this six million barrels of crude oil which this company will be able to place in storage through the sale of these bonds can be sold most any time for fuel purposes up and down the two big rivers, as before stated, at prices practically three times the cost of the crude oil in the oil fields. As the work on these tank farms progresses and as the millions of barrels of this oil are placed in storage the bonds which are offered to you now-at par together with a bonus of one-half share of par stock will not only be worth their full face value, but the stock will be worth at least \$2 per share.

teen years from now than it costs today to build them. There are tens of thousands of individuals in the United States who can very easily mail their check or draft for fifteen thousand dollars and secure fifteen thousand dollars' worth of bends at par. And in so doing enable the Uncle Sam Company to erect one fiftyfive-thousand-barrel steel storage tank for every such remittance that arrives. Why not send in your draft for fifteen thousand dollars and secure these giltedged bonds and the bonus in the stock and help push this good work along? If this company was one of the subsidiaries of the trust or was managed by men or backed by stockholders who were not fighting the unfair methods of the trust we would not offer these bonds to the general public in this way. The company reserves the right to reject any remittance by returning the same to the sender. We do not want anybody either as a stockholder or a bondholder who is not an independent citizen heart and soul. The company is in touch with over twenty thousand investors by special letter reports, while there will be a large majority of nine thousand stockholders working to place these bonds long before you read this announcement, and the chances are that more than half of these bonds will be taken by this band of loyal stockholders, a large majority of whom joined this company as much out of principle as they did for financial gain. This announcement will appear in nearly two hundred of the principal newspapers of the United States and Canada and will be read by over twenty million people. The rate of interst on these bonds is high. But the company can use the money where it can make from three to five hundred per cent. If you buy the bonds you will not only get your interest promptly, but you will get your money back for the entire principal probably within four years, and the stock which you will have left by that time will not be worth less than two dollars per share, or double your original investment after you receive your money back with interest. Can you afford to turn down such an investment? While you are hesitating what to do hundreds of investors will be telegraphing their reservations for bonds, while remittances by mail will run into the thousands of dollars every day. And every dollar will be honestly invested immediately in steel equipment and for oil to make the company just that much strong-If you cannot spare the funds to suber. scribe enough money to build one of these big storage tanks why not raise a club among your friends and a number of you subscribe together for such an amount? Or you can send in your check or draft for from fifty to one thousand dollars and together with the hundreds of others which will be coming in, added together, will answer the same purpose.

Financial Condition of Company--Property Back of These Bonds to Datc.

The following schedule of values represents very closely a conservative estimated value of the present holdings of the Uncle Sam Oil Company:

Cherryvale Uncle Sam Refinery No. 1 (twenty acres)\$ 90,000.00

Atchison Uncle Sam Refinery

No. 2 (fifty acres) 145,000.00

Tulsa refinery, Uncle Sam No. 3 (twelve acres) 110,000,00

1,100-acre lot 43, oil rights 250.000.00

171 miles main trunk pipe line and laterals 365.000.00

sure to be removed within the next few years, are removed this property will also be a pledge for the payment of the bonds. Even under the present restriction all oil from this property when it gets into the pipe lines of the company, as soon as the by the bonds. The mortgage covers all property hereafter to be acquired by the company.

Everything in this transaction is being done legally and right and for the full and perfect protection of every bondholder and stockholder in the company. Statements will be issued regularly, showing the money received and where it is placed, as there is no speculation about buying pipe lines and building steel storage tanks and purchasing oil.

What Will be Back of Bonds and Stock When Bonds are Sold.

A mortgage on any property for 40 per cent of its value is considered good. As a rule such loans are made from 4 to 5 per cent. These bonds bear 6 per cent, and when they are sold and the property for which they will enable this company to own and operate and which will be pledged as a first lien to pay off these bonds and pay dividends on the stock based on a conservative estimated value will be as follows: +

Pipe lines, lateral pipe lines, all three refineries increased in capacities, paraffine plant, lubricating works, 400 dis-tributing stations, 150 tank cars, river boats and barge equipment, oil wells, leases and all oil and gas rights, office fixtures and all properties excepting storage tanks

Tank farms and connections and (110) one hundred and ten 55,000-barrel steel storage tanks 2,000,000.00

Six million barrels of on, with the company in a position and with facilities to manufacture and market the

Cash reserve which will soon be built up and always maintained after all bonds are 800,000.00 sold

By the time these properties are all completed and the oil storage built up to six million barrels and the whole proper-ties of the Uncle Sam Oll Company up to the estimated value as above set out, nearly TWENTY-FOUR MILLION DOL-LARS, there will not be more than from six to eight million shares of Uncle Sam stock outstanding, but even if there were ten million shares of stock outstanding and the values as above set out were cut just half in two the stock would then be worth more than one dollar per share, while the chances are a thousand to one that there will not be a share of this stock on the market under two dollars and a half per share by the time the proper-ties are completed as before explained.

Denomination of Bonds.

These bonds are of the denominations of \$50, \$100, \$200, \$500 and \$1,000 with in-terest at 6 per cent, payable annually. You are especially requested to positively bear in mind that these denominations can not be cut up, and in sending in your remittance remit for one of the exact denominations specified above.

First Four monthly payments, payments each Bond 50.00..\$ 11.00 100.00 22.00 22.00 44.00 110.00 220.00 200.00.. 44.00 500.00 110.00 1,000.00 220.00

In Conclusion.

This company is under the same man-agement today that it was at the begin-ning nearly two years ago. Practical men are at the head of every department and everything is on systematic, econo-mical basis. The refineries are in operamical basis. The renneries are in opera-tion, the oil wells are being pumped, the pipe lines are delivering oil for the refin-eries, and the scores of distributers are delivering oil daily to thousands of cus-tomers. The company is putting up a winning fight and growing stronger every hour. The man who subscribed the first hour. The men who subscribed the first money to start the Uncle Sam Oll Com-pany were native Kansans and ploneer developers in the Kansas oil field, who, when the oil trust boycotted the Kansas oil fields two years are other had to all oil fields two years ago, either had to sit fiscated and their little savings practically stolen or make a fight. Like the majority of people, they accepted the latter, and have been putting up the best they have had in store since they commenced. This effort is being carried forward in the best of faith, and in selling these bonds they will be sold at par and every dollar received will go to build up this company and to place it where it can handle its great enterprise and secure and maintain an independent outlet for Kansas-Terri-tory oil and place it on the market by honorable methods, satisfactory to both producer and consumer, and make good returns for every stockholder and in time pay off the bondholders and at the same time respect and obey the laws of the land. If you want to help a worthy cause and encourage an honorable effort help us now, not next month or next year but today, so this company can rush to completion these big storage tanks and other construction and make it possible for Uncle Sam Company to place in storage these six million barrels of oil which will be like powder in the dry to protect the interests of the stock holders in the The quicker these bonds are future. sold the quicker this great work will be completed, and the quicker an aggressive fight can be carried on in every state in the Central West against the trust. The company solicits the most searching investigation, either by visiting the properties or calling at the main offices, where all the personal information available the officers of the company will be glad to furnish to every investor who seeks the same in good faith. You can mail remittance at once or write for further particulars.
