

INDIANA PEOPLE IN WESTERN CANADA.

What Shall We Do?—I've Got to Build Granaries.

A letter written to a Canadian Government agent from Tipton, Indiana, is but one of many similar that are in the hands of the Canadian government agents whose privilege it is to offer one hundred and sixty acres of land free, and low railway fares. But here is a copy of the letter:

"Tipton, Ind., Nov. 28, 1906.
At your earnest solicitation a party of us from Tipton left May 15 for Western Canada. Our interviews with you and a careful study of your literature led us to expect great things of your country when we should arrive there, and we were not disappointed. We went prepared to make a careful examination of the country and its resources, and we did so. At early dawn the second morning out of Tipton we awoke in a new world. As far as the eye could reach was an apparently limitless expanse of new sown wheat and prairie grasses. The vivid green of the wheat just beginning to stool out, and the inky blackness of the soil contrasted in a way beautiful to see. An hour or two later we steamed into Winnipeg. Here we found a number of surprises. A hundred thousand souls well housed, with every convenience that goes to make a modern up-to-date city—banks, hotels, newspapers, stores, electric light, street railways, sewerage, waterworks, asphalt pavements, everything. With eyes and ears open we traveled for two thousand miles through Manitoba, Saskatchewan and Alberta, going out over the Canadian Pacific railway, via Calgary to Edmonton, and returning to Winnipeg over the Canadian Northern railway. In the meantime we made several side trips and stopped off at a number of points where we made drives into the surrounding country. On every hand were evidences of prosperity. The growing wheat, oats, rye, flax, barley, not little patches, but great fields, many of them a square mile in extent, the three, five and sometimes seven-horse teams laying over an inky black ribbon of yellow stubble, generally in furrows straight as gun barrels and at right angles from the roads stretching into the distance, contrasted strangely with our little fields at home. The towns both large and small were doubly conspicuous, made so, first by their newness and second by the towering elevators necessary to hold the immense crops of wheat grown in the immediate neighborhood.

The newness, the thrift, the hustle, the sound of saw and hammer, the tents housing owners of buildings in various stages of completion, the piles of household effects and agricultural implements at the railway stations waiting to be hauled out to the "Claims," the occasional steam plow turning its twenty or thirty acres a day, the sod house, the unpainted house of wood, the up-to-date modern residence with large red barn by, all these were seen everywhere we went, an earnest of prosperity and wealth to be. We talked with men and visited their places that four years ago was unbroken prairie. Their houses, barns, implements and live stock were the equal of anything in Tipton County, and why not, when they were raising five, ten and twenty, yes, in one instance, forty thousand bushels of wheat a year. The fact that such large yields of wheat are raised so easily and so surely impressed us very favorably. And when we saw men who four or five years ago commenced there with two or three thousand dollars, and were now as well fixed and making money much easier and many times faster than lots of our acquaintances on Indiana farms fifty years cleared and valued at four times as much, we decided to invest. So we bought in partnership a little over two thousand acres, some of it improved and in wheat.

Before leaving Indiana we agreed that if the opportunities were as great as they were represented to be, that we would buy, and own in partnership a body of land, and leave one of our number to look after and operate it. This we accordingly did. Just before time to thresh I received a letter from him. "What shall we do?" said he; "I've got to build granaries. There's so much wheat that the railways are just swamped. We can't get cars and the elevators are all full. I never saw anything like it." In reply we wrote, "Good for you. Go ahead and build; your story sounds better than the letters we used to get from our friends in Kansas when they bewailed the fact that the hard wheat had been destroyed by the chinch bugs and the corn by hot winds, and that they must sell the stock for means to live on. Yes, build by all means." And he did, and our wheat put in by a reuter made twenty-seven bushels per acre.

Very truly yours,

TEN YEARS OF PAIN.

Unable to Do Even Housework Because of Kidney Troubles.

Mrs. Margaret Emmerich, of Clinton St., Napoleon, O., says: "For fifteen years I was a great sufferer from kidney troubles. My back pained me terribly. Every turn or move caused sharp, shooting pains. My eyesight was poor, dark spots appeared before me, and I had dizzy spells. For ten years I could not do housework, and for two years did not get out of the house. The kidney secretions were irregular, and doctors were not helping me. Doan's Kidney Pills brought me quick relief, and finally cured me. They saved my life."

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O. Labor of the Novelist.

"The way of the novelist must be hard," said a librarian of an uptown branch. "The other day an immaculate gotten up individual came into the library and announced that he was a writer with a specialty of dialect stories. We got him several books that he asked for, and little by little he took me into his confidence. 'I want the Scotch dialect for the stern father,' he explained; 'then when I've got enough of that I want some dialect for a sea captain, and then I want a duke—or maybe you can tell me, would a duke drop his h's?'"—N.
