

Nebraska Advertiser

W. W. SANDERS, Prop.

NEMAHA, NEBRASKA

It is just possible that yellow perils may neutralize each other.

The Tennessee supreme court has upheld the segregation which confines saloons to certain city territory.

"The horse must go." Sure, assents the Toledo Blade; quite often he must go out and haul the automobile out of the mud.

A 14,000-horsepower plant operated by tidal energy is to be established on the south bank of the Elbe, near Cuxhaven.

If anybody but a naval expert had said that the naval marksmanship at Santiago was bad it would have been flat treason.

Floods along both the Pawpaw and the Maumee rivers make it seem probable that the whole family will be involved before the troubles are over.

Some American girls, says the Chicago News, may feel that they just have to take counts and dukes. There are not enough star baseball players to go around.

An Englishman says American men make ideal husbands. But, says the Chicago Record-Herald, ideal husbands are not what American heiresses are looking for.

The New York jury which decided upon its verdict by flipping a coin has succeeded in strengthening the popular impression that a jury verdict is generally more or less of a gamble.

A gentleman cannot live on less than \$50,000 a year, is the complaint of a New York bankrupt. There are several thousand gentlemen here in Zanesville, says the Zanesville (O.) Signal, who live on less than that.

Inspectors from Ellis Island are to go over the country to locate alien criminals. It seems to the average person that it would have been an easier proposition to have kept them in the first instance from locating at all.

A baby hippopotamus valued at \$5,000 was born a few days ago at the Central park zoo in New York city. Babies, it may be remarked, are not rated according to their beauty, but according to the exclusiveness of their station in society.

A St. Louis preacher is quoted as asserting that kisses are "unpardonable under any circumstances before marriage." Unpardonable or not there can be more variety in them before marriage than is consistent with discretion after that ceremony.

A lady of social fame hired an agent to keep her name and doings out of the newspapers. The immediate result was a column article about the engagement, with a double-column picture of the retiring social light. Question: Was the "repress" agent's salary raised or lowered?

A town containing 10,000 inhabitants has sprung up in Nevada during the past three months. A few mornings ago its daily newspapers got out an extra to announce the fact that two respectable women had arrived. We extend hearty congratulations—not to the two ladies but to the town.

New York city has \$102,834,326 due for back taxes. This statement is vouched for by City Comptroller Metz. Of this amount \$29,816,153 is in taxes assessed on real estate, \$47,348,499 on personal property, \$1,118,662 taxes on real estate owned by corporations, and \$24,521,012 in special tax on franchises.

The United States government has granted a permit for the erection of a \$1,000,000 power plant on the South Platte watershed, a short distance from Denver, Co., and has also given a right-of-way for the necessary transmission lines. The plant will permit the production of 20,000 electrical horsepower.

"He never said 'Go, boys,' but always 'Come, boys,'" was the splendid eulogy that Bishop Potter pronounced over the body of a New York fireman who lost his life on duty. But such heroism as his is not unusual in the fire department, for it is true, as the chief of the brave man says, that every fireman knows that he risks his life at every big fire, and he does his duty in spite of it.

Texas by legislative act recently ceded to the United States a large territory in the Panhandle for a national park. If congress should accept the gift, the country will have another Yellowstone. The tract is 40 miles long and contains part of the Palo Duro canyon, a wild and mysterious gorge which has not been fully explored. Near the canyon is a private herd of buffalo, which it is said will be given to the government if it takes the park.

NOTES FROM MEADOWBROOK FARM

By William Pitt

Keep the stock off of soft pastures.

Alfalfa is too valuable to pasture.

What do you think of sheep as a manure spreader?

Bells on the sheep will save you lots of time in looking for them.

The chicks that are crowded will not make good, vigorous growth.

The right kind of a cow expects the right kind of treatment and gets it.

The sows appreciate clean drinking water as much as any farm animal.

Clean cultivation of the apple orchard will bring most profitable returns.

Remember the best ground for the garden, and make it better still by fertilizing liberally and cultivating assiduously.

Look up but always have the weather eye out for the stumbling block in the road.

The good horse is his own best salesman, and this is true of every other farm animal.

A good road along the side of your place makes a good impression on the stranger as he drives by.

Set the first eggs the turkeys lay under the chicken hen and thus encourage them to lay a second clutch.

Begin in a small way and grow as fast as you can is a safe rule in any branch of farming or stock-raising.

Some breeders claim that chickens fed sulphur are liable to rheumatism in damp weather. What has been your experience?

The land intended for alfalfa should be plowed and harrowed, then disked and harrowed again, and then it would do no harm to harrow again.

The good idea is good to use, not to be stowed away and forgotten. For this reason get busy after you have read Meadowbrook Farm Notes.

Don't keep the kicking cow. And at the same time that you get rid of her get rid of those methods of yours by which the bad qualities in her were developed.

The cry has gone forth that soon a famine of hickory will be upon the land. Why not plant a few such trees? Young trees can be obtained from many of the nurseries.

No wonder you don't have good roads in your township if politics is mixed up in the business. Deal with the road question strictly on a business basis. Cut the politics out.

One cannot always prevent being crowded by the season's work, but one can keep from fretting over it. Fretfulness of this kind leads to hurry, and hurry often entails much work that is needless.

A well-known fruit expert claims that the cost of picking apples upon very large, high trees is 20 cents a barrel, while on low-headed trees the cost does not exceed 7 cents a barrel. This is a potent argument in favor of low-headed trees.

If the cream does not rise readily there may be two reasons for it. First, the milk being produced in the last of the period of lactation, and, second, improper feeding. It takes longer for cream to rise upon milk of the cow who has been giving milk a long time.

Here is a fox trap which will work, says an experienced hunter: Find a good-sized stump 2 1/2 feet or more from the ground. Get a set of small sticks two feet long and nail them around the stump one inch apart, letting them project above the stump 18 inches. Put a rooster in this coop and cover the top with brush so he can't get out. Set your traps around the stump, being very careful about covering them.

The orchard will not take care of itself.

Take time to clean up around the house and barn.

It takes 45.4 quarts of average milk to weigh 100 pounds.

Waste not those eggs on the hen which is not thoroughly broody.

Have a kind word always for your horse, and he will prove your faithful servant.

Increase the fertility of your land by growing clover and then plowing it under.

Be easy on the horses while they are hardening to the heavy work of the season.

Get the young pigs out on the ground as soon as possible to prevent their getting too fat.

Finish up on the little odd jobs before the full rush of the spring work makes you forget them.

The better the seed bed the better the drop. Remember that when getting the land in shape for the seed.

The weanling lamb needs special care and in most cases will repay your efforts by growing into a strong animal.

Charcoal, and grit, oyster shell and granulated bone are essential to the health of the chickens. Be sure your flock is supplied.

The drill for planting grain crops has the advantage of more even planting at the proper depth, thus ensuring even start and uniform growth.

Don't let the cattle run on the pasture when the ground is soft. It will cause more damage than the land will be able to recover from for years.

The saleableness of a good grade of butter may be spoiled by the way it is placed on the market. Appearance has much to do with the sale of an article.

When wife is troubled about that sponge cake which has become dry and which she is tempted to feed to the chickens, tell her that it will make fine toast for tea.

The horse that has been idle all or most of the winter, needs careful handling to be inured to hard work. Increase the grain diet and exercise regularly, increasing the tasks gradually.

Young chicks that have become drenched by a sudden shower and are cramped with cold should be taken into the kitchen and wrapped in hot flannels. Many a chick can be saved in this way.

The low-grade fertilizer may not entail so great an initial outlay, but it is the dearest in the end, for no man ever made a dollar by buying the low-grade fertilizer, while it does pay to put good fertilizer on the land.

It is well to look over machinery to see if bolts and screws do not need tightening, but especially is this true of new machinery. The nuts and bolts work loose with the first use of the machine, and it is the safest plan to examine often.

Pea-fed pork is growing in favor in some sections. Some raisers have produced profitable hogs without feeding a single grain of corn, the feed consisting almost exclusively of the peas. But there is little question but that the better ration is a combination of peas and corn.

A comfortable nest for the setting hen is made by putting fresh earth into a box and covering with straw—hay is better for it will not gather moisture—and sprinkling slacked lime and sulphur upon the straw. In such a nest the hen will not be troubled with lice and she will not break her eggs.

Do not let the soft corn of last season, which was abnormally backward, lead you to make the mistake of planting too early corn this year. Plant the kind of corn which has given the best results in former years. There is no sort of likelihood that we shall have another such season as last year, at least not for another 25 years anyway.

It may sound like repetition, but it is good advice to follow: Remove manure from buildings daily, and haul it to the fields and place it on the land as soon as possible, at least every few days—winter and summer. Manure allowed to remain in the stable renders the building unsanitary for animal occupancy. Manure loses in value lying in the stable. When immediately placed upon the land, the soil has a chance to absorb some of the richness that would otherwise be lost.

NO ONE CAN ALWAYS AVOID

Catching Cold on the Street Car

Per-na Prevents Catching Cold. One Dose in Time, Saves Nine.

Many people persist in riding on the street cars, insufficiently protected by clothing.

They start out perhaps in the heat of the day and do not feel the need of wraps.

The rapid moving of the car cools the body unduly. When they board the car perhaps they are slightly perspiring. When the body is in this condition it is easily chilled. This is especially true when a person is sitting.

Beginning a street car ride in the middle of the day and ending it in the evening almost invariably requires extra wraps, but people do not observe these precautions, hence they catch cold.

Colds are very frequent in the Spring on this account, and as the Summer advances, they do not decrease. During the Spring months, no one should think of riding on the car without being provided with a wrap.

A cold caught in the Spring is liable to last through the entire Summer. Great caution should be observed at this season against exposure to cold. During the first few pleasant days of Spring, the liability of catching cold is great.

No wonder so many people acquire muscular rheumatism and catarrhal diseases during this season.

However, in spite of the greatest precautions, colds will be caught.

At the appearance of the first symptom, Per-na should be taken according to directions on the bottle, and continued until every symptom disappears.

Do not put it off. Do not waste time by taking other remedies. Begin at once to take Per-na and continue taking it until you are positive that the cold has entirely disappeared. This may save you a long and perhaps serious illness later on.

Bad Effects From Cold. Mr. M. J. Deutsch, Secretary Building Material Trades Council, 151 Washington St., Chicago, Ill., writes:

"I have found your medicine to be unusually efficacious in getting rid of bad effects from cold, and more especially in driving away all symptoms of catarrh, with which I am frequently troubled.

"The relief Per-na gives in catarrhal troubles alone is well worth the price per bottle. I have used the remedy for several years now."

Spells of Coughing. Mrs. C. E. Long, writes from Atwood, Colorado, as follows:

"When I wrote you for advice my little three-year-old girl had a cough that had been troubling her for four months. She took cold easily, and

would wheeze and have spells of coughing that would sometimes last for a half hour.

"Now we can never thank you enough for the change you have made in our little one's health. Before she began taking your Per-na she suffered everything in the way of cough, colds and croup, but now she has taken not quite a bottle of Per-na, and is well and strong as she has ever been in her life."

Per-na for Colds. Mr. James Morrison, 68 East 16th St., Paterson, N. J., writes:

"I have given Per-na a fair trial, and I find it to be just what you claim it to be. I cannot praise it too highly. I have used two bottles in my family for colds, and everything imaginable. I can safely say that your medicine is the best I have ever used."

Those Peekaboos. She—Women's clothes are a mystery to men, aren't they?

He—Oh, I don't know. I can often see through them.—Cornell Widow.

In a Pinch, Use ALLEN'S FOOT-EASE. A powder. It cures painful, smarting, nervous feet and ingrowing nails. It's the greatest comfort discovery of the age. Makes new shoes easy. A certain cure for sweating feet. Sold by all Druggists, 25c. Accept no substitute. Trial package, FREE. Address A. S. Olmsted, Le Roy, N. Y.

The woman who marries for money usually gets what she went after, but it's different with a man.

Important to Mothers. Examine carefully every bottle of CASTORIA a safe and sure remedy for infants and children, and see that it bears the Signature of *Wm. C. Little*

In Use For Over 30 Years. The Kind You Have Always Bought.

There is no interest worth consideration that does not run in the direction of duty.—Grimshaw.

Your Wife, Mother or Sister Can make Lemon, Chocolate and Custard pies better than the expert cook by using "OUR-PIE," as all the ingredients are in the package ready for immediate use. Each package, enough for two large pies, 10 cents. Order to-day from your grocer. "Put up by D-Zerta Co., Rochester, N. Y."

Perish discretion whenever it interferes with duty.—More.

Garfield Tea cannot but commend itself to those desiring a laxative at once simple, pure, mild, potent and health-giving. It is made of Herbs. All drug stores.

Suit the action to the word and the word to the action.—Shakespeare.

Smokers appreciate the quality value of Lewis' Single Binder cigar. Your dealer or Lewis' Factory, Peoria, Ill.

Truth, like a rose, often blossoms upon a thorny stem.—Hafiz.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

No honestly exerted force can be utterly lost.—Froude.

There is Only One

"Bromo Quinine"

That is

Laxative Bromo Quinine

USED THE WORLD OVER TO CURE A COLD IN ONE DAY.

Always remember the full name. Look for this signature on every box. 25c.

E. W. Grover

Cut the cost 1/2

You can decorate your home with Alabastine year after year at one-half the cost of using either wall-paper or kalsomine.

Alabastine

The Sanitary Wall Coating

comes in 16 beautiful tints and white that combine into an endless variety of soft, velvety Alabastine shades which will make any home brighter and more sanitary.

Sample tint cards free at dealers. Write us for free color plans for decorating your home.

Sold by Paint, Drug, Hardware and General Stores in carefully sealed and properly labeled packages, at 5c the package for white and 35c the package for tints. See that the name "Alabastine" is on each package before it is opened either by yourself or the workmen.

The Alabastine Company Grand Rapids, Mich.

Eastern Office: 105 Water St., N. Y. City.
