IOWA PENOCRATS. The democrats of Iowa met in state convention at Davenport, nearly all delegations

being fully represented. The committee on resolutions presented the following, which was unanimously adopted.

Resolved, That the democratic party of lows in convention assembled, fully indorse the principles laid down in the national democratic platform this year adopted at Chicago, and cordially approve of the sentiments contained in Governor Cleveland's letter of acceptance, and in the language of said letter we express our convictions that "Laws unnecessarily interfering with the habits and customs of any class of our propie which are not offensive to them and the moral sentiment of the civilized world, and which are consistent with good citizenship and public welfare are unwise and vexatious." Therefore we piedge oursolves to use all honorable legal means to secure the speedy repeal of laws in conflict therewith.

WISCONSIN REPUBLICANS.

The Wisconsin republican state convention was held at Madison on Wednesday. Chairman Taylor, of the state central committee, urged that business be conducted with dispatch, owing to the mass meeting to be addressed by General Logan at 3 o'clock. He thought that the proceedings could be finished early because of the unanimous desire that the present state officers be renominated. Secretary Payne, of the central committee, read a list of delegates who e cresentials had been approved. Permanent organization was perfected by the nomination of Ogden H. Felhers, of Janesville, as presiding officer, there being no temporary organization. On assuming the chair Mr. Felhers thanked the convention in a strong republican speech.

During the absence of the committee on

resolutions, Judge Humphries moved the present state officers be renominated by acclamation. The motion prevailed without debute. The state officers were introduced and spoke briefly, acknowledging the honor conferred

on them. The convention then adjourned.

BAY STATE DEMOCRATS. The convention was called to order by General Collins. The officers of the state committee were made the temporary organization officers of the convention. Jonas H. French was elected permanent chairman. He addressed the convention at some length. Every allusion to Governor C.eveland was loudly

applauded.
On the first formal ballot Wm. C. Endicott was nominated for governor, receiving 385 votes of 731 cast, or four votes more than necessary to a choice. The nomination was made unanimous and the ticket completed as follows: Lieutenant governor, James T. Grinnell; secretary of state, Jeremiah Crowley; treasurer and receiver, General Charles Marsh; auditor, John Hopkins; attorney general, John W. Cumings. The convention then adjourned adjourned. TEXAS REPUBLICANS.

A tthe republican state convention at Houston resolutions were read favoring fusion with the greenbackers and independents and endorsing George Washington Jones, independent candidate for governor. The motion was tabled. These resolutions resulted in a test vote of 104 ayes, 279 noes. The committee on resolutions then reported. The majority report declares it inexpedient and impracticable at this day to place a state ticket in the field and recommends republicans to aid all independent candidates for state officers

favorable to the defeat of democracy.

The minority report declares in favor of a straight republican state ticket, also a Blaine and Logan electoral ticket. After much confusion the majority report was adopted. MASSACHUSETTS REPUBLICANS.

The convention was called to order by Chairman Lodge. Mr. Lodge moved the nomination of George D. Robinson for governor by acclamation. The motion was carried by an outburst of enthusiasm. It was moved the remainder of the old ticket be renominated by acclamation, which was carried unani-

The report of the committee on resolutions was apopted without debate. The platform recites the achievements of the republican party, and affirms that it alone can deal wisely and considerately with the questions of the day, both state and national; favors a tariff in which reforms and corrections should be made, with a view to reduce the surplus in the treasury by a horizontal reduction in the

#### STRIKING MINERS.

Work in Great Force. There is trouble among the miners of the Hocking Valley, Ohio, about wages. Those at Snake Hollow made an attack on the guards

on Sunday morning. One guard was killed

and two wounded. Sheriff McCarthy, of Athens county, telegraphed for troops. The government at once ordered out all of Governor's guards, the Lancaster, Circleville toms. It is, indeed, a modern mystery. and Lexington companies and replied to Sheriff McCarthy that troops were on the way and asking if more were needed. The Lancaster company, only twelve miles from Logan, was sent to that place to guard the jail. One of the leaders of the riot at Snake Hollow, believed to have been the one who killed O'Hara, was arrested and taken to jail at Logan. The mob was coming to relieve

him. Special trains were put on the railroads at the governor's disposal. The sheriff, who had gone to Coal Center, Pa., did not call at the miners' camp on the 1st, and in consequence the strikers are still on the ground and determined as ever. Neel's on the ground and determined as ever. Neel's mines were not visited and the officers on the ground had a quiet time. A call was made at the Empire works, but non-unionists, after a peaceful consultation, declined to come out. The event of the day was the arrival at Courtney of a number of Hungarians for the purpose of going to work at the Garfield mines. No Hungarians have heretofore been employed in this district, and their advent at this time is regarded with concern. A

vent at this time is regarded with concern. A camp was established at Courtney to prevent camp was established at Courtney to prevent them from going to work. Operators say that if the strike continues much longer Hungarians will be introduced in all the mines.

Governor Ho.dly and others have been making an inspection of the mining situation in the Hocking valley. The governor states that the situation is a perplexing one, and is of a threatening character. He thinks with the men in their present temper it will be of a threatening character. He thinks with the men in their present temper it will be some time before the struggle is over, unless the operators shoul; determine to make some concessions. He made a personal visit to the mines with the hope the situation would prove to be such there would be no necessity of sending troops. In this, however, he was disappointed. He therefore honored the requisition of the sheriff for troops, and sent three companies to the most critical points. On the way to Columbus the governor had a request for two more companies at Longstreet, two at for two more companies at Longstreet, two at Murray City and two to guard the property of the Hocking Valley road and its bridges in the valley. He refused to send more troops, but ordered several companies to be in readi-ness to go to the front should they be needed. □At the two latter places it was feared an attack would be made. When the governor left Logan for a trip to the mines he telegraphed to all points he wished to consult the leading miners, and at some places on the arrival of the train there were as many as 5.00 idle miners who had gathered to see and hear what he had to say. At Nelsonville the dem-onstration was of a massive character, there being between six and seven hundred present, who had carriages and a band to escort the governor to the public square for the purpose of making a speech. They had appointed a committee earlier in the day to ask a number of questions as the governor progressed and they made it quite interesting. The appeal of the governor was for the observance of order and the importance of their doing their part in this regard. It was at this point that he ordered troops to points named and the miners were not very well pleased over this move, as they being between six and seven hundred present, not very well pleased over this move, as they had supposed the governor would not make such an order unless he was forced to do so.

In reply to the demands of the sheriff for men he specially stipulated that they shall be used only for the purpose of protecting life and property. This is thought to indicate that they will not be allowed to remain as

#### THE AUSTRIAN FLAG.

mere guards for coal and railroad companies.

The Trouble Brought About by an Over-Of-

ficious Officer. The attempt of Chief Police Brann some time ago to compel the Austrian consul in Pittsburg to haul down a flag over the consulate door, because the police regulations forbade the hanging or display of any obstructions, has brought on a lengthy correspondence between the Austrian government and the United States department. The result is shown in a letter from Secretary Frelinghuy-sen to Governor Pattison, in which the form-er says that the Austrian consul was disposed er says that the Austrian consul was disposed to let the matter pass unnoticed, thinking Chief Brann had acted in ignorance of the consul's rights under the statute. The chief, however, commenced an action against the consul for disobeying his order, and then the intervention of the state authority was invoved. Secretary Frelinghuysen informs the governor that consuls have a right under the treaty to fly their flags when they please, that the constitution makes treaty stipulations binding, and that the constitution is above all other

and that the constitution is above all other laws, and all ordinances in opposition to it are void. The governor is requested to order the mayor to discontinue his action against the consul at once and pay the costs. In pursuance of this the mayor has been notified by the governor, but declines to take any steps until he consults his attorney.

How Women Differ from Men.

At least three men on the average jury are bound to disagree with the rest just to show that they've got minds of their own; but there is no disagreement among the women as to the merits of Dr. Pierce's "Favorite Prescription." They are all unanimous in pronouncing it the best remedy in the world for all those chronic diseases, weaknesses and complaints peculiar to their sex. It transforms the pale, haggard, dispirited woman, into one of sparkling health, and the ringing laugh again "reigns supreme" in the happy household.

A Brooklyn bridge policeman says: "It is a curious thing that I am not asked the way by the Chinese. All other nationalities bother with their questions about the bridge, the railroad, etc., but John Chinaman, strangely enough, every time knows where he is going and the way to get there."

Human Calves. An exchange says: "Nine-tenths of the unhappy marriages result from human calves being allowed to run at large in society pastures." Nine-tenths of the chronic or lingering diseases of to-day originate in impure blood, liver complaint or billiousness, resulting in scrofula, consumption (which is but scrofula of the lungs), sores, ulcers, skin diseases and kindred affections. Dr. Pierce's "Golden Medical Discovery" cures all these. Of druggists.

### BAFFLED!

Those in the Hocking Valley, Ohio, Quit One of the Most Unaccountable and Dangerous of Recent Deceits Discovered and Exposed.

There is some mysterious trouble that is attacking nearly every one in the land with more or less violence. It seems to steal into the body like a thief in the night. Doctors cannot diagnose the Fourteenth regiment, the Duffy and the it. 2cientists are puzzled by its symp-

Like those severe and vague maladies that attack horses and prostrate nearly all the animals in the land, this subtle trouble seems to menace mankind. Many of its victims have pains about the chest and sides, and sometimes in the back. They feel dull and sleepy; the mouth has a bad taste, especially in the morning. A strange sticky slime collects about the teeth. The appetite is poor. There is a feeling like a heavy load upon the stomach; sometimes a faint all-gone sensation is felt at the pit of the stomach, which food does not satisfy. The eyes grow sunken, the hands and feet feel clammy at one time and burn intensely at others. After a while a cough sets in, at first dry, but after a few months it is attended with a greyish colored expectoration. The afflicted one feels tired all the while, and sleep does not seem to afford any rest. He becomes nervous, irritable, and gloomy, and has evil forebodings. There is a giddiness, a peculiar whirling sensation in the head when rising up suddenly. The bowels become costive, and then, again, outflux intensely; the skin is dry and hot at times; the blood grows thick and stagnant; the whites of the eyes become tinged with yellow; the urine is scanty and high-colored, depositing a sediment after standing. There is frequently a spitting up of the food, sometimes with a sour taste, and sometimes with a sweetish taste; this is often attended with palpitation of the heart. The vision becomes impaired, with spots before the eyes; there is a feeling of prostration and great weakness. Most truth of the above. of these symptoms are in turn present. It is thought that nearly one-third of our population have this disorder in some of its varied forms, while medical men have almost wholly mistaken its nature. Some have treated it for one complaint; some for another, but nearly all have failed to reach the seat of the disorder. Indeed, many physicians are afflicted with it themselves. The experience of Dr. A. G. Richards, residing at 468 Tremont street, Boston, is thus described by himself:

"I had all these peculiar and painful symptoms which I have found afflicting so many of my patients, and which had so often baffled me. I knew all the commonly established remedies would be unavailing for I had tried them often in the past. I therefore determined to strike out in a new path. To my intense satisfaction I found that I was improving. The dull, stupid feeling departed and I began to enjoy life once more. My appetite returned. My sleep was refreshing. The color of my face which had been a sickly yellow gradually assumed the pink tinge of health. In the course of three weeks I felt like a new man and know that it was wholly owing to the wonderful efficiency of Warner's Tippecanoe The Best, which was all the medicine I

took." Doctors and scientists often exhaust their skill and the patient dies. They try everything that has been used by, or is known to the profession, and then fail. Even if they save the life it is of-ten after prolonged agony. Where all this can be avoided by precaution and care, how insane a thing it is to endure such suffering! With a pure and palatable preparation within reach, to neglect its use is simply inexcusable.
