

A Valuable Agent.

The glycerine employed in Dr. Pierce's medicines greatly enhances the medicinal properties which it extracts and holds in solution much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and astringent. It adds greatly to the efficacy of the Black Cherry bark, Golden Seal root, Stone root and Queen's root, contained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and lung affections, for all of which these agents are recommended by standard medical authorities.

In all cases where there is a wasting away of flesh, loss of appetite, with weak stomach, as in the early stages of consumption, there can be no doubt that glycerine acts as a valuable nutritive and aids the Golden Seal root, Stone root, Queen's root and Black Cherry bark in promoting digestion and building up the flesh and strength, controlling the cough and bringing about a healthy condition of the whole system. Of course, it must not be expected to work miracles. It will not cure consumption except in its earlier stages. It will cure very severe, obstinate, chronic coughs, bronchial and laryngeal troubles, and chronic sore throat, with hoarseness. In acute coughs it is not so effective. It is in the lingering coughs, or those of long standing, even when accompanied by bleeding from the lungs, that it has performed its most marvelous cures. Send for and read the little book of extracts, treating of the properties and uses of the several medicinal roots that enter into Dr. Pierce's Golden Medical Discovery and learn why this medicine has such a wide range of application in the cure of diseases. It is sent free. Address Dr. R. V. Pierce, Buffalo, N. Y. The "Discovery" contains no alcohol or harmful, habit-forming drug. Ingredients all printed on each bottle wrapper in plain English.

Sick people, especially those suffering from diseases of long standing, are invited to consult Dr. Pierce by letter, free. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y. Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for paper-covered, or 31 stamps for cloth-covered copy.

Keep Cutting the Dirt Off.
The members of the family were camping out south of town for the day and little George had been assigned the work of peeling the potatoes for dinner. After laboring for half an hour he hunted up his mother.
"Mom," he said, "I gotta have some more potatoes."
"Why, I gave you enough for two families like ours," she replied, in surprise. "What did you do with them?"
"I forgot to wash my hands," said George, "and by the time I got all the dirt cut off the potatoes they was too small to eat. I throwed 'em away."

Plausible Theory.
The great detective had been summoned to the plumber's office.
"I can't understand it," said the plumber. "The young man has been in my employ for the last three years and I have always found him honest and trustworthy. But three days ago I sent him to collect a bill in the suburbs and he has failed to show up since. Now, what do you think of it?"
"Oh," replied the g. d., "I don't think you have any cause for alarm. He was probably paid in small bills and is still counting the money to make sure that the amount is correct."

UNCLE SAM'S INCOME.

NATION'S REVENUES AMOUNT TO \$1,326 A MINUTE.
Most of This Comes from Customs Service—Expenses, However, Exceed Receipts—Money in Circulation \$31.339 for Each Person.

The revenues of the government in the fiscal year 1905 aggregated \$697,161,269. This was an income of \$1,909,866 a day, or \$1,326 a minute night and day throughout the year. The total expenditures, however, were \$23,004,228 in excess of the receipts, the expenditures being \$720,165,498. Secretary Shaw gives the figures in his annual report for the Treasury Department, submitted to Congress.

The largest sources of revenue were as follows:
Customs \$261,798,896
Internal revenue 234,495,749
Revenues of the District of Columbia 5,643,257
Sales of public lands 4,839,249
Profits on coinage, bullion deposits, etc. 4,419,593
Reimbursement of loan to Louisiana Purchase Exposition Company 4,404,942
Fees—Consular, letters patent, and lands 4,087,561
Sales of Indian lands, proceeds of Indian labor, etc. 3,995,087
Part payment Central Pacific railroad indebtedness 5,745,385
Postal revenues 152,826,585
For civil establishment, including foreign intercourse, public buildings, Panama canal, collecting revenues, District of Columbia, and other miscellaneous expenses \$131,887,291
For the military establishment, including rivers and harbors, forts, arsenals, seacoast defenses, and expenses of the war with Spain and in the Philippines 122,175,974
For the naval establishment, including construction of new vessels, machinery, armament, equipment, improvement at navy yards, and expenses of the war with Spain and in the Philippines 117,550,308
For Indian service 14,238,073
For pensions 141,773,964
For interest on the public debt 24,590,944
For deficiency in postal revenues 15,968,257
For postal service 122,826,585

Compared with 1904 the revenues increased \$12,886,896 and the expenditures decreased \$5,870,447. In the two years expenses have been more than \$64,000,000 in excess of receipts.

Money in Circulation Grows.
During 1905 \$18,739,736 was added to the money in circulation. The per capita circulation advanced from \$39,777 July 1, 1904, to \$41.28 Nov. 1, 1904; then declined to \$39.86 April 1, 1905, and at the close of the year, June 30, 1905, stood at \$41.08. By Oct. 1, 1905, the total money in circulation had advanced to \$2,624,230,391, a per capita circulation of \$41.30, 42.8 per cent of which was gold.

At the close of the year ended Sept. 30, 1905, 5,831 national banks, with authorized capital stock of \$810,654,075, were in active operation. Since the national banking system was first authorized there have been 438 failures and 1,661 voluntary liquidations of national banks.

In these national banks the deposits to the credit of individuals are \$3,820,681,713 and to the credit of banks \$1,624,877,581. The aggregate liabilities are \$7,472,350,878. In the year ended Sept. 30, 1905, 513 banks were chartered, with a capital of \$34,765,500.

Would Recoin Abraded Silver.
Mr. Shaw cites the great demand for subsidiary silver coins and recommends "that the Secretary of the Treasury be authorized to cause the recoining of abraded and uncurrent silver dollars, in amounts not exceeding \$5,000,000 per year, into the several denominations of subsidiary coins as they are required."

The production of gold in the United States for the calendar year 1904 is estimated at \$80,464,700, and the industrial consumption at \$28,655,963, of which \$22,930,036 was of new material. The original deposits of gold at the several mints and assay offices aggregated \$143,378,960.86.

The interest-bearing debt of the United States outstanding Nov. 1, 1905, was \$895,158,940. Of this amount, bonds of the face value of \$549,599,590 were held by the treasurer of the United States in trust for national banks as security for circulating notes and deposits, leaving \$345,559,350 in the hands of other investors.

To Make Currency Elastic.
"The necessity for an elastic currency," continues Mr. Shaw, "has received fresh emphasis in the financial conditions of the last few months. Millions were loaned, approximately at 1 per cent in midsummer, and call money reached 25 per cent in November. The exceedingly low rate was about as dangerous as the high rate, for the latter was the logical result of the former. Such extremes can and should be rendered impossible."
"As a means to this end, I suggest the advisability of permitting national banks to issue a volume of additional government guaranteed currency, equal in amount to 50 per cent of the bond-secured currency maintained by them, but subject to a tax of 5 or 6 per cent until redeemed by the deposit of a like amount in the treasury. By eliminating the words 'secured by United States bonds deposited with the treasurer of the United States' from national bank notes now authorized, the additional currency would be identical in form with that based upon a deposit of bonds, and its presence would not alarm, for it would not be known."

Mr. Shaw favors a revision of the customs administrative act, the extension of the "drawback" in tariff on exports and the encouragement of an American merchant marine. He says the aggregate deaths from yellow fever in New Orleans numbered 455, and the number of cases 6,385.
During the past year the usual facilities have been extended to aid in the movement of the crops. The deposits for transfer in the New York and Chicago subtreasuries were \$30,063,034, for which payments by telegraph were made at other points in the denominations required to meet the demands of the locality in which the funds were to be used.

Eels in Scotland.
Although eels abound in Scotch waters and are caught in great quantities, they are not considered fit food there. No matter how plentiful and how very fine and large they may be in any district of Scotland, no native will eat one. The objection to the eel is said to be based on its serpentine appearance and the fact that it is not overfastidious as to what it feeds on.

Laundering the Baby's Clothes.
Many mothers are not aware that chafing and much discomfort may be caused the baby by the strong alkalies in the soap with which the little garments are washed. Hence the work should be done at home under the mother's directions and only Ivory Soap used.

The Wasteful Captain.
She was a fair passenger in search of information and the captain was, naturally, only too willing to gratify her. He had explained that the action of the propeller forced the ship through the water and added, as a further item of information:
"We made twenty knots an hour last night, miss."
"Did you really?" said the sweet girl. "And whatever did you do with them all?"
The captain went red and his eyes dilated.
"Throw them overboard," he said, shortly.
"Fancy!" she said.—Tit-Bits.

THE DISCOVERER

Of Lydia E. Pinkham's Vegetable Compound, the Great Woman's Remedy for Woman's Ills.

Yours for Health
Lydia E. Pinkham

No other female medicine in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female troubles or such hosts of grateful friends as has
Lydia E. Pinkham's Vegetable Compound.
It will entirely cure the worst forms of Female Complaints, all Ovarian Troubles, Inflammation and Ulceration, Falling and Displacement of the Womb, and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life.
It has cured more cases of Backache and Lencorrhoea than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels tumors from the Uterus in an early stage of development.
Irregular, Suppressed or Painful Menstruation, Weakness of the Stomach, Indigestion, Bloating, Flooding, Nervous Prostration, Headache, General Debility quickly yield to it. Womb troubles, causing pain, weight and backache, instantly relieved and permanently cured by its use. Under all circumstances it invigorates the female system, and is as harmless as water.
It quickly removes that "bearing-down" feeling, extreme lassitude, "don't care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, Dizziness, Faintness, sleeplessness, flatulency, melancholy or the "blues" and headache. These are sure indications of Female Weakness, or some derangement of the Uterus, which this medicine always cures. Kidney Complaints and Backache, of either sex, the Vegetable Compound always cures.
Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.
