

WOMEN WHO SUFFER

Dr. Williams' Pink Pills the One Remedy Particularly Suiited For Feminine Ills.

To women who suffer Dr. Williams' Pink Pills are worth their weight in gold. At special periods a woman needs medicine to regulate her blood supply or her life will be a round of pain and suffering. Dr. Williams' Pink Pills are absolutely the finest medicine that ever a woman took. They actually make new blood. They are good for men too—but they are good in a special way for women.

"It was three years ago last spring that my health failed me," says Mrs. Arthur Conklin, of No. 5 Coldwater street, Battle Creek, Mich. "I suffered from leucorrhoea and other troubles that, I presume, were caused by the weakness it produced. I had sinking spells, nervous headaches, was weak and exhausted all the time and looked like a walking skeleton. "My back and limbs would ache almost continually and there were days when I was absolutely helpless from sick headaches. I tried one doctor after another but cannot say that they helped me at all. My liver was sluggish and I was troubled some with constipation. "One day a physician who has now retired from practice met my husband on the street and inquired about my health. He advised my husband to get some of Dr. Williams' Pink Pills for me, said they were a good medicine, better for my trouble than he could put up. I tried them, improved steadily and soon was entirely cured. As soon as the leucorrhoea was cured the headaches and other pains stopped. I am entirely well now but intend to continue to use Dr. Williams' Pink Pills as a spring tonic."

The genuine Dr. Williams' Pink Pills are sold by all druggists and by the Dr. Williams' Medicine Company, Schenectady, N. Y.

Tainted Tin.

"Can I get in?" asked the new arrival.

"H-m-m, that depends," replied St. Peter, doubtfully.

"I never drank, smoked, chewed or swore. I gave everybody a square deal, I—"

"Cut all that out," was the terse reply, "and tell me what was your business?"

"I was an expert accountant."

"Sure, you can get in! You're what we have been waiting for. You see, we are expecting Rockefeller now at almost any time and all of our accountants are working overtime. We want to be able to hand him an itemized statement when he applies for admission."

"A statement of what he did with his money?"

"No, a statement of how he got it."—Houston Post.

YOU HAVE NO RIGHT TO SUFFER

From Constipation, Bowel and Stomach Trouble.

Q. What is the beginning of sickness?

A. Constipation.

Q. What is Constipation?

A. Failure of the bowels to carry off the waste matter which lies in the alimentary canal where it decays and poisons the entire system. Eventually the results are death under the name of some other disease. Note the deaths from typhoid fever and appendicitis, stomach and bowel trouble at the present time.

Q. What causes Constipation?

A. Neglect to respond to the call of nature promptly. Lack of exercise. Excessive brain work. Mental emotion and improper diet.

Q. What are the results of neglected Constipation?

A. Constipation causes more suffering than any other disease. It causes rheumatism, colds, fevers, stomach, bowel, kidney, lung and heart troubles, etc. It is the one disease that starts all others. Indigestion, dyspepsia, diarrhoea, loss of sleep and strength are its symptoms—piles, appendicitis and fistula are caused by Constipation. Its consequences are known to all physicians, but few sufferers realize their condition until it is too late. Women become confirmed invalids as a result of Constipation.

Q. Do physicians recognize this?

A. Yes. The first question your doctor asks you is "are you constipated?" That is the secret.

Q. Can it be cured?

A. Yes, with proper treatment. The common error is to resort to physics, such as pills, salts, mineral water, castor oil, injections, etc., every one of which is injurious. They weaken and increase the malady. You know this by your own experience.

Q. What then should be done to cure it?

A. Get a bottle of Mull's Grape Tonic at once. Mull's Grape Tonic will positively cure Constipation and Stomach Trouble in the shortest space of time. No other remedy has been known to cure Constipation positively and permanently.

Q. What is Mull's Grape Tonic?

A. It is a Compound with 40 per cent of the juice of Concord Grapes. It exerts a peculiar strengthening, healing influence upon the intestines, so that they can do their work unaided. The process is gradual, but sure. It is not a physic, but it cures Constipation, Dysentery, Stomach and Bowel Trouble. Having a rich, fruity grape flavor, it is pleasant to take. As a tonic it is unequalled, insuring the system against disease. It strengthens and builds up waste tissue.

Q. Where can Mull's Grape Tonic be had?

A. Your druggist sells it. The dollar bottle contains nearly three times the 50-cent size.

Good for ailing children and nursing mothers. A free bottle to all who have never used it because we know it will cure you.

140 FREE BOTTLE 1130

FREE—Send this coupon with your name and address to Mull's Grape Tonic, 21 Third Ave., Rock Island, Ill. If you have never used Mull's Grape Tonic, and will also send you a certificate good for five cents toward the purchase of more Tonic from your druggist.

MULL'S GRAPE TONIC CO., 21 Third Ave., Rock Island, Ill.

50 cent, 50 cent and \$1.00 bottles at all druggists. The \$1.00 bottle contains about five times as much as the 50-cent bottle and about three times as much as the 50-cent bottle. There is a great saving in buying the \$1.00 size.

The genuine has a date and number stamped on the label—take no other from your druggist.

Indigent mothers tell a boy to get up in a tone which encourages him to stay in bed.

FARM AND GARDEN

INJURY DONE BY WEEDS.

The manner in which weeds bring about injury to farm crops is discussed in an Ontario bulletin. Farmers will find sufficient reasons for fighting the weed pest in the following: The amount of water which is taken up by weeds and evaporated from the surface of the leaves is very great. For instance, an average mustard plant pumps from the soil about fourteen ounces, or even tenths of a pint, per day; a sunflower, thirty-three ounces, and so on. The transpiration is generally in proportion to the surface of the leaf, but thin leaves transpire, or blow off water, more freely than fleshy ones. Consequently, weeds having large leaf surface draw from the soil and give off through the leaves a large amount of water and thereby rob the surrounding plants. Many botanists consider this waste of moisture the most serious injury done by weeds. Weeds naturally make use of the same food as the cultivated plants among which they grow. Consequently they deprive a crop of a large amount of the available nourishment, and they rob the succeeding crop as well. For example, an analysis of the Russian thistle by Snyder showed that it contains from twelve to seventeen per cent, as much nitrogen as there is in clover, and an ordinary thistle of this kind covering a square yard takes more potash and lime from the soil than two good crops of wheat from the same area. Weeds often grow more vigorously than usual plants, and, as a consequence, they shade or crowd, or partially choke, the seedlings of the desired crop. Black bindweed, for instance, often covers completely a large part of plants among which it grows. At best, it is difficult to clean many of the smaller seeds, such as clover, grass and rape seed, and the difficulty is greatly increased when they are grown on a dirty farm. It is almost impossible to clean clover seed by winnowing. Hence the necessity that the land on which it grows be clean. Weeds interfere with a regular rotation of crops. A well-balanced rotation of crops conserves the fertility of the soil, but it is often necessary to depart from such a rotation when noxious weeds get possession of the farm—to give undue attention to the growth of weed crops, for instance, or almost omit a certain crop altogether for a time, as in the case of the oat crop on a farm overrun with wild oats. Weeds harbor scores of injurious fungi. Many of the rusts which attack grain crops find a resting place on weeds of the grass and other families which preserve them through the fall, winter and spring.—Weekly Witness.

BALANCED FOOD FOR SWINE.

While our hogs get plenty of corn we go to considerable effort to furnish them variety in the rations and try to give it to them in such a way that it forms a balanced ration. We are believers in considerable soft food for swine and consider a ration of wheat middlings and gluten meal with a small portion of process oil meal a feed that will keep them in good weight and in the finest condition. These grains are mixed thoroughly and then skim milk is used so that the mass is about like thin porridge. This our hogs get twice daily with corn on the cob for the third meal, and something in the way of root crops or good kitchen sloop in which is mixed vegetable and fruit parings for the in-between meal. This is the food during the summer (except that the corn is cut out) as well as during the winter. The range takes the place of the third meal of sloop and vegetables, but with these exceptions we try to feel about the same year round and find that it pays.—Indianapolis News.

HOGS IN WINTER.

Those who keep hogs should make it a point to see that they are made comfortable during the cold winter months. When they are in comfortable quarters they can be kept much cheaper. Many a disease which the hog is subject to is caused by lying in a cold bed at night. Not only is this cold a detriment to them but there is no doubt but what they suffer as much, if not more, from the wet. A cold snow or rain chills the body right through, and all this is very expensive to the owner. The man who keeps his hogs in comfortable quarters will find in the Spring that his hogs have cost him a great deal less money to carry through the winter and are also in much better condition than the hogs of his neighbor, who has paid no attention whatever to this matter.—Weekly Witness.

CALVES RAISED WITHOUT MILK.

As a substitute for skimmilk in raising calves cocconut shell tea appears to have some merits. At the Ontario Experiment Station calves were fed in addition to what corn and green feed they wanted six to eight quarts of tea made by boiling one-fourth pounds of cocoa shells in two gallons of water. They gained 135 pounds in eight weeks, while two other calves fed on two gallons of skimmilk per day in addition to the other feeds gained 148 pounds in the same period. The conclusion was that shells made as good a substitute for skimmilk as could be had but that nothing could entirely take the place of milk for young stock.—Massachusetts Ploughman.

Charcoal for Gunpowder.

Charcoal-making for gunpowder is a much more complicated process than the ordinary field kiln manufacture. Only certain kinds of wood are used—usually the young shoots of elder and willow—and it is cut in the Spring, so that the bark may be stripped off. It is then piled under airy, open sheds and allowed to remain several years until it is thoroughly dried. When the powder-maker is ready for a new supply of charcoal, the weed is cut into lengths of three feet and placed in tight iron retorts, under and around which a fire roars continually. The dampers and pipes are so arranged that the workmen have complete control of the heat. At the end of the retort a hole is left for the escape of inflammable gases resulting from the charring process. A pipe catches them as they leave the retort and conveys them into the furnace, where they take the place of a good deal of fuel. When the flames of the gas become a deep blue color the workmen know that the wood is sufficiently charred, and the retort is cooled down as quickly as possible. The charcoal is then left for a week or more before grinding, because if placed in the machine at once there is danger of spontaneous combustion. The best charcoal is jet black, and fractures show velvety surfaces.

POTATOES GROWN FROM SMALL SEED.

Considerable argument is rife among writers as to the relative value of small and medium or large tubers, for use as seed. It is claimed that the small tuber will often (generally, perhaps,) produce as large and fine results as the larger tubers used for seed. We believe this claim is open to question at least beyond the first generation, for it is safe to say that degeneration can only be the result from planting the small tubers a number of seasons in succession. This seems to be a logical conclusion to reach. On the other hand, it is quite as logical to assume that the fine medium or large tuber, containing as it must all the vigor and fine points of the variety, will produce first-class progeny and, we believe, this is essentially the case when the seed tubers are selected from one's own product and selected at the proper time and properly cared for. If the seed potatoes are selected from the bin, be the selection from small or the large tubers, in the spring just about the time they are wanted for use it must not be expected that they will

give as good results as those which have been properly selected in the fall and properly cared for. There is a decided saving of time, money and fertilizer in the careful selection of the seed potatoes, as any one will discover who will take the necessary trouble.—Indianapolis News.

Backache.

It has cured more cases of Female Weakness than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels Tumors in an early stage of development. That

Bearing-down Feeling.

causing pain, weight and headache, is instantly relieved and permanently cured by its use. Under all circumstances it acts in harmony with the female system. It corrects

Irregularity.

Suppressed or Painful Periods, Weakness of the Stomach, Indigestion, Bloating, Nervous Prostration, Headache, General Debility. Also

Dizziness, Faintness,

Extreme Lassitude, "don't-care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, sleeplessness, flatulency, melancholy or the "blues," and backache. These are sure indications of Female Weakness, some derangement of the organs. For

Kidney Complaints

and Backache of either sex the Vegetable Compound is unequalled. You can write Mrs. Pinkham about yourself in strictest confidence.

LYDIA E. PINKHAM MED. CO., Lynn, Mass.

Lydia E. Pinkham's Vegetable Compound

is a positive cure for all those painful ailments of women. It will entirely cure the worst forms of Female Complaints. Inflammation and Ulceration, Falling and Displacements and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life. It will surely cure.

Robbed in Church.

Just think what an outrage it is to be robbed of all the benefits of the services by continuous coughing.

Canadian Greena Green.

Some people suppose that Greena Green is no longer in existence. It has simply changed its latitude and longitude. Its name is now Windsor, and it is a Canadian town in the Province of Ontario, close to the United States border. It was recently stated in the provincial legislature of Ontario that no fewer than 800 marriages were celebrated in Windsor during the last year. The great majority of the happy couples had hastily crossed the border from the adjoining republic.—London (England) Tit-Bits.

TO CURE A COLD IN ONE DAY.

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25c.

A Polt Freshman.

When young Meagles took the train for Harvard his father said: "As soon as you find out let me know if you have passed your entrance examinations."

Two days later, in the midst of making a heavy deal, he received the following telegram: "Yes, J. Meagles, Jr."

Somebody telegraphed and puzzled, he telegraphed back. "Yes, what?"

The well-trained son wired back, "Yes, sir."—A. R. Holcombe in Judge.

The Minister's Text.

Little Willie had gone to church on a certain Sunday morning. The minister announced that in the evening his text would be, "An angel came down from heaven and took a live coal from the altar."

After the service was over Willie's mother asked him what the text was to be in the evening and he promptly replied, "An Injun came down from New Haven and took a live colt by the halter."—Magazine of Fun.

Inbreeding Fowls.

It is only among mongrels that you need to greatly fear inbreeding. For at least three years, with pure bred and by judicious selection of the best fowls on each side, we can breed our own fowls among ourselves. The reason so many fear the effects of inbreeding is from their experience running along the lines of fowls. They kill and sell the best always, leaving anything for breeding purposes. No wonder the fowls get smaller and scrubber each year. When you build up a good strain you must always make choice of your best among your own, irrespective of relationship, and one can to some extent follow this out among our general utility flocks. I do not approve of it too far, but for say, three years, it is all right if you select your most perfect males and females for breeding purposes.—St. Louis Globe-Democrat.

Will do the work quickly and pleasantly.

Sold by all dealers at 25c. and 50c.

The Inevitable Comparison.

The son of the old counterfeitizer gazed critically at the bogus coins that the hopeful young apprentice spread before him.

Then he shook his grizzled head. "These are not as good as the dollars that father used to make," he slowly said.—Cleveland Plain Dealer.

CURES INDIGESTION

When what you eat makes you uncomfortable it is doing you very little good beyond barely keeping you alive. Digestive tablets are worse than useless, for they will in time deprive the stomach of all power to digest food. The stomach must be toned up—strengthened. The herb tonic-laxative,

Lane's Family Medicine

will do the work quickly and pleasantly.

Sold by all dealers at 25c. and 50c.

SICK HEADACHE

Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Costive Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.
