# ANÆMIA CAN BE CURED

Dr. Williams' Pink Pills Make New Blood and Strike Straight at the Root of Disease.

Anamia is just the doctor's name for bloodlessness. Dr. Williams' Pink Pills actually make new blood. They cure anæmia just as food cures hunger. They cured Mrs. Thos. J. McGann, of 17 Lincoln Place, Plainfield, N.J., and they can do as much for any other pale, weak, ailing, bloodless person.

"In the spring of 1903 I did my usual house cleaning," says Mrs. McGann, "and soon afterward I began to have the most terrible headaches. My heart would beat so irregularly that it was painful and there came a morning when I could not get up. My doctor said I had anæmia and he was surprised that I had continued to live in the condition I was in. I was confined to my bed for nearly two months, the doctor coming every day for the first few weeks, but I did not improve to amount to anything.

"Altogether I was sick for nearly two years. I was as weak as a rag, had headaches, irregular heart beats, loss of appetite, cramps in the limbs and was unable to get a good night's sleep. My legs and feet were so swollen that I feared they would burst.

"One day, while I was wondering how long I could live, feeling as I did, I received a booklet telling about Dr. Williams' Pink Pills for Pale People. I read it and told my husband to get me some of the pills. Before the first box was gone I felt a change for the better. I have taken about twelve boxes and although I was as near the grave as I could be, I now feel as if I had a new lease of life. I have no more headache, the heart beats regularly, my cheeks are pink and I feel ten years younger. I feel that I have been cured very cheaply and I have recommended Dr. Williams' Pink Pills to lots of my friends."

#### Defends Jews.

"It is ignorance and race prejudice that lead immigration restrictionists to classify Jewish immigrants among the undesirable," declared a Chicago banker of the race. "There is no such thing as a grave Jewish problem in this country. Statistics show that the accession of hundreds of thousands of 'ignorant' and 'Russian' Jews by immigration in recent years has not burdened the rich Jews. On the contrary, it has helped to make them and the country as well richer and more prosperous. As to the differences between the liberal Americanized Jews and the newly arrived orthodox Jews there is nothing to be exercised over. For brethren to quarrel occasionally is but natural. But no matter how bitter the attack of the orthodox Jew on the liberalized Jew, the tenets of strict orthodox Judaism command that all differences between Jew and Jew must be forgiven and forgotten on the eve of Atonement day. No scene can be more impressive than that in Jewish homes and in orthodox synagogues on the eve of Kol Nidre, when those who have happened to quarrel a senior class in a certain fashionable during the year tearfully extend the hands to one another, earnestly praying forgiveness."

Opinions of Great Papers on Important Subjects.

"GUMPTION."

UMPTION is to success as cause is to effect. It is the essential quality of a man who is bigger than the circumstance, and his degree of success depends on the amount of gumption in his make-up.

The Hoosiers found the word. They say: "Gumption is the ability to put the grease where the squeak is." Isn't that the basis of

It does not always take age to develop gumption; it is born in a man and often shows at an early age, as in the case of two boys. They had no father and no income, but wanted to go to the high school. Their older brother, a member of the large firm which he had entered as office boy at 12, saw no need for further education. He had succeeded without it, and why not them? and he thought it was high time for them to be earning their own living. The boys decided that it wouldn't be any harder to stay up at one end of the night than the other, so they worked up a morning paper route which eventually netted them \$100 a month. They solved the problem by earning their own living and going to school, too. That's putting the grease where the squeak is!

power? Dewey had gumption when he cut the cable.

Every man has achieved his own greatness. To be great is to work out the strength within you, not to wear the cloak of power.

The word gumption is peculiarly American. It names the quality in us which makes for success and progress. Wherever the American is, he should have gumption, he should be stronger than the obstacle that confronts him. It was the ability to see what his country needed that made Lincoln, our grandest American, tower over the Little Giant; it was the ability to carry out what he saw was needed that made Lincoln equal to all emergencies.

Patience, insight, courage and perseverance—all of those qualities which make strength of character, which give the power to see and to do-are summed up in this one word-gumption.-Chicago Journal.

#### FOUR KINDS OF MONEY.

O keep track of the different kinds of money in circulation seemed, a few years ago, no slight task. To-day it is much simpler; four easily remembered classes practically include it all. These are gold, silver, national bank-notes and government

Gold circulates almost wholly in the form of gold certificates, which stand for the metal in the treasury, as the trunk-check which the railroad issues stands for the trunk. The certificates are easier to carry about. They are issued in denominations of twenty dollars and upward. It is the present aim of the department to give each class of currency a field of its own.

Silver certificates, which are mainly in ones, twos and fives, hold the same relation to silver coin, except that among the farm laborers of the South there is a decided preference for the metallic dollar over its paper representative. On the Pacific coast generally, with all classes of people, paper money continues in disfavor; as in Europe, coin, both gold and silver, is preferred.

In this class must also be included "subsidiary coins," or those made of silver in denominations of less than one dollar, and the still smaller change, known as the "minor" coins-nickels and cents-of which about thirty million dollars in all are in circulation.

Besides these classes resting directly on metals, come two forms of paper. The issue of United States notes,

commonly known as "greenbacks," is a fixed amount, and the notes are promises to pay in coin on demand. They were formerly of all denominations, but are now almost exclusively ten-dollar bills.

Of national bank-notes there are now more than four hundred and fifty million dollars in circulation, which is the high-water mark. Nearly half the government's bonds are held by the Treasurer of the United States as security against this circulation, which is chiefly in fives, tens and twenties.

Of the kinds of money, gold represents forty-four per cent; silver little more than half as much; national bank-notes, which come third, considerably exceed the greenbacks in value. The total of this money, equally divided, would give to each inhabitant of the country an average of about thirty-one dollars.-Youth's Com-

#### WHEN DOES WOMAN LOOK HER BEST?

VERY man will probably reply according to his individual tastes. M. Nimrod, for example, will declare that when she is riding across country Lady Diana looks her best. The boating man will think Undino most charming as she lies amid the pretty cushions of a punt, dressed en suite. The

man about town will award the palm to the woman who is best dressed in the park.

I have heard a man declare that he thought a woman never looked so well as when wearing a perfectly plain gown of some washing material, whereas it is obvious that some of the sex find us most attractive in what they describe as "full fig" or "war paint." And, speaking generally, I suppose a woman does have almost every chance in a becoming evening gown. But one can lay down no hard and fast rules as to when a woman really looks best. Much depends on the woman, much depends on what she is wearing, and much depends on her environment; but I cannot conceive a woman looking her best when engaged in exercise which is either very violent or which dishevels her in any way; nor is she likely to look her best when the dress does not fit her surroundings. This is a fact which should be well borne in mind by women of a certain age bent on ruralizing, and, indeed, by women of all ages, at all times, and in all places.-London World.

#### JUST A WRECK.

HEN death comes to such a man as Charles T. Yerkes, frank comment sounds harsh and ungenerous, and there is a disposition to act in accordance with the sentiment: There is so much good in the worst of us, And so much bad in the best of us,

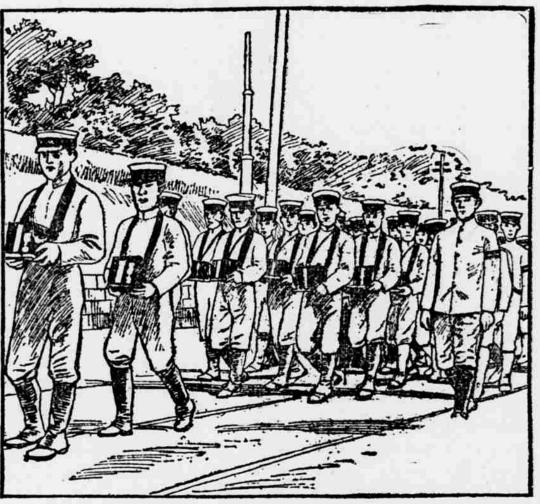

That it hardly becomes any of us To talk about the rest of us.

But so much has been said about the dead man's abilities that the awful wreck of his life is positively startling. And the more we dwell upon his remarkable foresight in business and his remarkable power over men the more impressive does the lesson of the contrast become.

A dozen art galleries and tens of millions of dollars where there was one would write the word "failure" all the larger. The perversion of character, the complete absence of any guiding moral purpose and of a decent respect for the opinion of mankind leaves a heritage of shame to the nearest of kith and kin and a taint upon every item in the vast fortune.

Out of the wreck we can make nothing but a warning .- Chicago Record-Herald.

#### Do You Want to Know

What You Swallow? There is a growing sentiment in this country in favor of MEDICINES OF KNOWN COMPOSITION. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery "the popular liver invigorator, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the several schools of practice showing the strongest. schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. Prices for Butterflies.

Butterfly collectors are seldom able to estimate with any confidence the value of their collections, since the prices for specimens so constantly vary. A case in point is that of the blue butterfly of Brazil, specimens of which were originally sold for from \$50 to \$75. Not long ago some collectors who supplied the London market ran into a perfect swarm of these butterflies and shipped to England such quantities that better specimens than the original insects are sold for \$1 each. It not infrequently happens that two or three specimens of a certain family are discovered by collectors, who, encouraged by the high prices received for their finds, are tempted to prosecute their search for this particular variety without result for several years. Suddenly they or some other collector finds the insects grown plentiful, and the cherished varieties of the cabinet become among the commonest specimens.

Baseball cranks will all remember with pleasure the late "Mike" Kelly, the star attraction of the famous Bostons, then champions of the National League. The Bostons were playing in a Western city, and had just returned to their hotel after the game, and the members of the team were separating and going to their rooms while Kelly headed for the bathroom to take his regular "rub down."

A few minutes later one of the other players on the team, while passing down the corridor, heard Kelly's well known laugh inside the bathroom, and stopped at the door and asked Kelly what the joke was.

Kelly replied: "This is the first time I ever got out of the bath tub without stepping on the soap."
