PLAN NEW SCHOOL HOUSE

LATENSER IS GIVEN CONTRACT FOR PLANS.

ESTIMATED COST OF \$35,000

The New Norfolk High School Structure Will be One of Regular Lines and With Capacity Increased Over the One That Burned.

Architect John Latenser of Omaha was formally engaged by the Norfolk board of education last evening to draw the plans and specifications for the new high school building. Mr. Latenser had been called to Norfolk by the board and was present at last evening's meeting.

The plans and specifications for the new building are to be in the hands of the board by May 20 to permit the board to call for bids at once for the contract of constructing the building. In addition to furnishing detailed plans and specifications, Mr. Latenser agrees to make three visits to Norfolk during the progress of the work. For his services as architect Mr. Latenser is to receive three per cent of the cost of the building. In addition to these agreements Mr. Latenser will come himself or send a special representative to Norfolk at the call of the board, the board to pay only the actual expenses of the trips.

Norfolk's new high school building will be a structure of regular outline. It will represent a decided increase in capacity over the old building that burned last March. The assembly room with a capacity of about 270 pupils, a principal's office and four recitation rooms will occupy the second story. The first floor will be divided into six recitation rooms, a superintendent's office and a supply room. The basement in addition to the furnace rooms will be furnished so as to provide for toilet rooms and for a possible gymnasium and manual training room.

Estimated Cost \$35,000.

The estimated cost that accompanied the plans was \$35,000 without plumbing or basement furnishing. The board last evening in conference with Mr. Latenser agreed on certain modifications of the original plans with a view of reducing the cost of the building. These changes are to be embodied into new outline plans which are to be furnished the board at once. Mr. Latenser remained in the city over night and this morning in company with members of the board made a personal inspection of the high school grounds.

Grades in the Building.

The new high school building will for the next few years, in addition to providing for the full needs of the high school, also house the two seventh and two eighth grades of the city. These grades will occupy rooms of the first floor of the new building, as under the old arrangements in the former building. The grades will probably remain in the building until the growth of the high school proper makes additional demand for room.

TRIBUTE TO OUR WOMEN.

Eminent Frenchwoman Says They are Distinct Type of Superiority.

New York, April 25.—"American women have no equals in all the world." This unrestricted praise of the American woman has no limitations and comes from the distinguished French writer and student of social conditions, Mme. Laurence Fiedler, in an interview yesterday.

"The American practically holds the solution to the problem of woman's advancement," said Mme. Fiedler. "Her freedom, her breadth of thought, her personal charm, her culture, her manner of dress place her as a distinct type of superiority." "The life of the American woman, her delightful camaraderie with her men friends, her wholesome viewpoint on social conditions, her respect for work and the equality of working women, have the greatest effect upon the physical problem with which I have been struggling.

"The decrease in consumption in New York I believe to be directly due to the intellectual freedom of the American woman. Education and freedom of thought naturally give enlightenment in the matter of hygiene and the cleanliness of all classes of American women is something that impressed me at the very start.

"As to the high standard of morality I cannot speak too strongly on this subject. And your morality in this country I trace back to the intellectual freedom and the general breadth of justice of your women. You have your clubs, your professions open to women, your training schools for girls. Everything tends to the betterment of women.

"There is one phase of the breadth of your American woman's work, which impressed me deeply. This is the club for models. This club which gives a sort of home and moral support to models, shows what can be done in protecting and ennobling girls in a line of work in which in Paris they degenerated to the lowest level.

"Up to the time I arrived in New York I thought French women the best dressed in the world. Now I yield the palm to the American women. Never will I forget my first walk up Fifth avenue. It was like a panorama of chicness and loveliness. American women have the most perfect sense of color and there is an innate artistic expression in the way they wear their clothes."

REMAINS TAKEN TO YANKTON.

Funeral of Nurse Who Burned to Death to be at Yankton.

The remains of Miss Anna Lynch, the nurse who was burned to death at the insane hospital Wednesday, were taken to Yankton on the early morning train for burial. It had been intended that funeral services should be held here, but the brother-in-law from Yankton found that it would be impossible, if this were done, to make train connections.

TO IMPROVE FIRST STREET

Persons Interested in it Will Meet Saturday Afternoon.

A meeting of the First Street Improvement club will be held in the office of A. J. Durland Saturday afternoon at 1 o'clock. The purpose of the meeting is to discuss ways and means of permanently improving First street and making a good road of it from uptown to the Junction. All who are in any way interested in the matter, are invited to be present.

Mr. Durland now has a half dozen teams engaged in hauling bricks from the high school debris to the southern part of First street. He says that, while this will make it rough for a little while, the pulverized brick will make an excellent foundation for a fine permanent road.

Some people have suggested of late that, since the Northwestern is hauling gravel through Norfolk from Long Pine east, there might be an opportunity to secure enough of it to help build a permanent highway.

PIERCE GETS NEW DATES

AS RESULT OF BATTLE CREEK'S DROPPING OUT.

BUTTE ASKED TO COME IN

If Butte Will Join the Association and Take the State Fair Dates, the Ten Weeks Will be Filled; Otherwise That Week Stays Open.

Pierce benefited by Battle Creek's dropping out of the North Nebraska Short Shipment Racing circuit. As a result of the cancellation of Battle Creek's dates, Pierce, which had the state fair dates, has been given the week that had been scheduled for Battle Creek, August 28-30. Butte will be asked to take the state fair dates that Pierce had been booked for. If Butte desires to join the association and take these dates, the entire ten weeks will be filled; if not, the state fair week, September 4, 5 and 6, will remain open in this circuit.

This was the decision reached at the meeting of officials at the Oxnard hotel at 10 o'clock Friday morning. They had been called to meet because Battle Creek, whose race track property has changed hands, could not secure the track for racing purposes this summer.

President W. C. Caley of Creighton and Secretary J. L. Rynearson of Madison acted in his capacity. Every town in the circuit was represented at the meeting.
