THE WINTER RESORTER.

Vol. "13." No. "23." A Journal of Civilization published for the benefit of those who pay well for seeing their names in print. (Tuesday, "storm day" in north Nebraska, saw a good sized colony of snow bound travelers making the best of the blizzard in each of the local hotels.)

Editorial.

The Resorter is glad to know that Norfolk is fast acquiring fame as a winter resort. Twice in the past two weeks people have flocked to Norfolk and attracted by the excellent hospitality.

The Weather: Cooler, with enough furries of the beautiful to avoid any danger of sunstroke. The Temperature: Forty degrees in the office, 50° on the register, and 104 degrees under the collar of the slim man who wants to get home.

Some books to read this time of year: Dante's Inferno, Story of the Chicago Fire, Description of the Yellowstone Geysers.

Roosevelt's Roasts. Billy Sunday on Hell. Without a Sunshade in the Tropics.

A Valentine Verse. The rose is red, The violet is blue, When the blizzard is sped Shall we hike? Sure Mike! If the trains get through.

Personal Mention. The Resort colony were crazy with curiosity over the arrival of a tall, handsome, well dressed and well groomed gentleman in spring garments this morning.

Mr. and Mrs. Mitchell are guests at the Pacific. Mr. Mitchell is here for the rest cure. He has constructed an out door apartment and is so fond of fresh air that he invites the snow drifts in during the heated periods.

weight. It was a coupling pin. This story is vouched for by M. C. Nixon who was there. Mr. Barrow is on his way to Lannon and thinks the fog there will not be one two three to a Nebraska snow mist.

Another distinguished guest at the Pacific is the straight lineal and roly poly descendant of the great emancipator, Witherspoon, who along with John T. Hancock and some other gentlemen signed the dope that is read every fourth of July and designated as the "Declaration of Independence."

George P. Bellows is at the Resort to see if he cannot contract for a few tons of snow to feed his fancy cattle at Maysville, Mo. He says that salt is good for cattle simply because it is white and sugar would be better if it were not so expensive.

Prof. Frank Pilger, who sprouts the young ideas in Pierce and perhaps is grooming the future Lincolns and Tafts of the country, is also one of the guests at the Resort. He says while he is not staying from choice that he is so delighted that he fully expects to remain till the Keya Paha choo choo gets into action.

Harry R. Greenblatt, the vendor of phony rings, Kohlnoor sparklers and other precious stones, is registered at the Pacific. His mission here was to look up some of the bonded men who were suspected of getting into the game of hokey poker with a five cent limit and he saved his friend Mix a good many heart quivers.

R. S. Bellin is enjoying a respite for a few days at the Pacific. He has just recently joined the Beneficials and although his bride is at Seward and he promised to go there yesterday, the fascinations of the winter resort and the privilege of singing in the manner-chor were too tempting and so he lingers betimes while the little lady at Seward keeps singing, "Behold, the Bridegroom Cometh."

Sharp points by Dr. Thomas: Text books are too thick. The present school system leads nowhere.

Too many teachers are slaves to the text book. They try to finish the book rather than to finish the pupil.

Members of the North Nebraska School Folks' club, gathering Friday evening at the Oxnard hotel for their second annual banquet, almost without exception placed themselves with Dr. O. A. Thomas, president of the Kearney state normal, in support of manual training and the movement to "industrialize" all school studying as far as possible.

Dr. Thomas' Address. Dr. Thomas said in part: There is a great unrest in the educational world today. There is a shifting, an experimenting, a search as in the dark for something vague and uncertain. It is safe to predict that the present system of schools is but the pioneer, "The voice of one crying in the wilderness" making way for the splendid advance of the future when our reorganized or revolutionized schools shall serve better the needs of humanity.
