Evelyn Thaw; Her Story.

New York, July 20 .- "I was a darl. world. ing, an angel child, a brave little woman and everything else so long a Harry K. Thaw was in danger of the electric chair, but once his precious body was saved-oh, well, then it is different."

This was the statement made by Evelyn Nesbit Thaw today when she fects of the drug in less than three told for the first time how she consented to sign papers in a suit to annul her marriage with Harry K. Thaw and afterward withdrew her signature statement. But it wasn't untrue. And when the elder Mrs. Thaw failed to fulfill her side of the contract.

While Evelyn Thaw refused to state the amount of money that was offered to her, soon after Thaw's second trial but three drugs that can do this. for the murder of Stanford White, to induce her to consent to an annulment, it is well known to the authorities that one of the post eminent physicians in the amount was about \$30,000 a year New York and got from him the three for life.

Cut It to \$6,000 a Year.

duced to \$6,000 a year when the elder introduction into the system. Mrs. Thaw refused to sign a \$30,000

"It was because I learned things the decision that we would never live together again as man and wife."

Mrs. Thaw was found in her \$95-amonth apartment on West Thirtythird street this aftern a. She wore a white shirt waist and a lavender skirt of washable material. She was just about to eat some ice cream with is the way the old tales go. White a girl friend when the reporter reached about the heat and then, with no more had any man or woman in my life, my expression of excitement or pleasure than had she been discussing the latest fashions in clothes or hats, she talked about her troubles.

In fact, once during the talk she took up a magazine, looked at some new styles in hats and then, passing the book to her companion, remarked carelessly:

"Those are beautiful affairs." Then, turning to the reporter, she added:

"You know I am just crazy about hats. I never can cease admiring prettily trimmed ones, either.

"I laugh and play and cut up the young woman. I'm an optimist by disposition.

No Delusions About Her.

"I have no desire to pose as an exfollow. I want no one to have illuabroad as portraying me. I want two at the standard already set. things thoroughly understood:

"The first one is that I have never committed any crime. "The Man of Many Chews"

Remarksble Claims Made by Horace Fletcher, the World Famed Authority on Foods and Feeding and Exponent of Eating Rightly.

By FREDERICK R. TOOMBS. "If all persons so lived as to have normal digest to crime would practically be elim a d,"

C UCH was the astounding statement of Horace Fletcher, the world famed authority on foods and feeding, made to the writer in his last interview given before his ness without deleterious after effects departure for Europe. The originator of the system, revolutionary in the world of matters dietetic, known as fletcherism or fletcherizing, does not consider his claim as to the elimination of crime to be at all sensational. He is habitually and characteristically retiring and conservative in his words and thoughts. As a patient disciple of moderation and founder of the new religion of "dietary righteousness" Horace Fletcher offers logical arguments and cold facts to substantiate his statement

I talked with him for several hours in his sitting room in the Phipps model tenement No. 1, in New York's tragic east side, where this kindly souled, gray haired humanitarian has chosen to dwell in preference to his costly marble palace, Palazzo Salbante, on the Grand canal, in Venice, a palace 800 years old.

"The effect of a nation's food on a nation's minds," said Mr. Fletcher. "is too easily ascertainable to be underestimated. While I have never made a point of naming arbitrarily what a person should or should not eat, I have spoken and written as to how and when and how much to eat. Persons who overeat in their consumption of meats become mentally different from those who eat normally or who depend chiefly or wholly on vegetable forms of diet. Large, abnormal quantities of meat as diet are for savagery. They create an unnatural condition of mind How He Would Eliminate Crime by Proper Dieting and Cure Intemperance by Drinking - Vital Economic Side of His Campaign.

The poisoning of mind and body. hence the intoxication resulting from overindulgence in meats, is very simflar in the last analysis to that occasloned by alcoholism. It is what Mr. Fletcher describes as "taking booze in

the form of beef." According to his philosophy, there is as much evil in "food drunkenness" as there is in alcohol drunkenness. For instance, he states that "the body throws off the effects of alcohol drunk enness much easier and more quickly than those of food drunkenness, and in the latter form of intoxication the dangers from uric acid are probably greater than in the former."

But the reader should not assume from the foregoing that the great auther of "The A B Z of Our Own Nutrition" and "The New Glutton or Epicure," etc., is an exponent of vegetarianism. "I do not subscribe to the many isms," he smilingly told the writer. But he is an opponent of all immoderation, whether the food be the best or the most injudicious in the world. He subscribes to the following catholic doctrine:

It isn't what one eats; it's how one eats. There is not a thing which cannot be

eaten if it is eaten rightly. There should be no restriction on the sating whatsoever. This is not a fad at all. I simply believe in following what nature indicates. If nature gives us grinding teeth they are to grind with. When I am hungry I know that nature s telling me to eat. When I am thirsty I drink. When one is sleepy the logical

thing is to go to sleep.

There is no slavery like the slavery of habit. The thing is to strive to follow nature as closely as may be and you can't go wrong. Eat only when you are really hungry with a natural, not a forced or stimulated, hunger. And if you crave meat eat it, but don't overeat, and eat it

Eating rightly is to cease eating when the appetite ceases to call for food; to masticate thoroughly, chewing the food scores of times if necessary to mix it so completely with the saliva that it will be

swanc-to in seminute practically involuntarily; to get all the taste out of liq-

uid food; to stop eating the minute the

saliva stops flowing freely, resting your

appetite before it gets tired; to eat only when you are cheerful, for you won't di-

diet in crime. He says:

and so lead to a state in which crime is more readily committed.

"The respective careers of the Indian tribes of the Pueblos and the Apaches afford an illuminating comparison. The Apacnes were notorious as devastators, warlike ravagers, merciless slayers, you are mad, but only when you are They were most ravenous eaters of

"The Pueblos were home builders, dwelt in established villages. They worked industriously. They tilled the soil, a peaceful agricultural people, and their tribe exists today in material numbers. The Pueblos have always been moderate in their eating. Consuming very little meat, they have subsisted for generations on different kinds of grains and other vegetable

products. "In Japan during the Tokogawar period of about 300 years the simplicity of the diet and life of the nation found marked reflection in the criminal records of the country. The moderate diet, consisting chiefly of rice, fish and fowl, was responsible for the practical elimination of crime as a serious factor in the economics of the country, as witness that in one year in a total population of 36,000,000 a seemingly harmless form, but it is people only 8,000 cases of criminal activity were brought before the au-

Saving Millions For the Public.

economic side. Under his system the vidual is so markedly increased that all classes of persons can add to their usefulness while reducing the cost of living. Owing to the thousands of persons following the teachings of "the man of many chews" today it is estimated by a recognized statistician that Mr. Fletcher, in enabling them to cut down their food bills 40 to 60 per cent has brought about a saving of over \$20,000,000 a year in the United States alone. And his propaganda has spread wider proportionately in foreign countries than in America because of his long residence in Italy.

Another competent statistician is authority for the statement that more than 200,000 families are saving from a dollar a day upward as the result of the practice of Mr. Fletcher's teachings. This estimate was made more than a year ago, and the number is increasing in geometric ratio.

Students of political economy are amazed at the possibilities of fletcherizing as a contributor to the na tion's good. When nine Yale university students, Messrs. Bauer, Edwards. Lagerquist, Lawton, Mitke, Parmelee Reeds, Taylor and Weyman, were formed into an eating club to test Mr. Fletcher's claims that he could increase their physical endurance through proper mastication, many professors scoffed. Yet at the end of the test period Irving Fisher, Ph. D., professor of political economy at Yale, wrote a voluminous report, in which he said. "Our conclusion in brief is that Mr. Fletcher's claims are justi-

Ten Benefits Obtained.

Demonstrations at other institutions in England, Belgium, Italy and America have shown conclusively that Mr. Fletcher's teachings produce unmistakably the following results: First.-Reducing half of the former cost

of nourishment. Second .- An increase of 50 per cent to 00 per cent in physical endurance. Third. - Immunity from sickness and 'that tired feeling.'

Fourth.—Suppression of craving for al-coholic stimulants. Fifth.—Suppression of morbid desires. Sixth.—Restitution of nerve soundness. Seventh.-Elimination of various poi ons from the body, natural purity. Eighth. - Progressive recuperation of ready past middle life who had begun to

An Elephant Experience.

block 6, Madison.

A friend of mine told me of a curfous experience. He was carefully stalking a big bull elephant in a large herd, when they got his wind, and a big cow elephant charged him. He jumped behind a large tree as the elephant reached bi.a, and, being unable to stop herself in time, the elephant drove her tusks with such force into the trunk of the tree that they snapped off close to her head. The Norfolk, charging Bohmer with having but luckily turned and galloped after threatened to do him great bodily the fast retreating herd, leaving him the possessor of some eighty pounds prosecuted the case. Bohmer made of ivory valued at about \$250.-Circle
