**FATE'S TRICK ON DOLLIVER.**

The Iowa Senator Sidestepped Chance to be President.

Minneapolis, Minn., Oct. 27.—Senator Jonathan P. Dolliver of Iowa, whose death has recently occurred, might have been president of the United States. This is a little bit of political history that is not generally known and was related confidentially by the senator himself. Had he so willed he would have been nominated for vice president with William McKinley in the place of Theodore Roosevelt.

Such a nomination would have elevated Dolliver to the presidency and would have changed the political history of the last ten years. Senator Dolliver's wife, who was a niece of E. K. Pearson, the Chicago multi-millionaire, was possibly responsible for his refusal to accept this nomination.

The story of this singular incident in republican politics is best told in the language of Senator Dolliver:

"Some months before the convention that nominated McKinley the second time, Mark Hanna, who was managing Mr. McKinley's campaign, met me in Chicago and told me some of the difficulties he was experiencing in securing a running mate for McKinley. 'I wish,' he said to me, 'that you would accept the nomination.'

"I told Mr. Hanna that I expected and hoped to be elected United States senator from Iowa, that I regarded the vice presidency as a shelving place and that I was not a candidate for a political sarcophagus. Then he asked me if I would permit the use of my name, promising that at the proper time it would be withdrawn. He told me there were several undesirable candidates in the field. He explained that the use of my name would keep down this list of undesirable candidates and I agreed with him that the mention of my name in connection with no distinguished office could do me no harm and might be of value to me.

"When I went down to Philadelphia shortly before the convention I discovered that my candidacy had assumed serious proportions. My colleagues in the house had taken hold of the matter and my nomination was assured unless Mr. Hanna kept his promise. I went to him and told him that it was time for him to redeem his pledge.

"His reply was, 'Dolliver, we are up against it. There is no man in the field who will make a suitable candidate.' I said to him, 'Why not Roosevelt?' He told me he understood there was a movement on among the Platt republicans of New York to nominate Roosevelt in order to shove him and get him out of New York, but he said he understood that Mr. Roosevelt would not accept the nomination. He did not express any objection to Roosevelt.

"After some conversation he authorized me to call on Mr. Roosevelt, put the situation up to him, and to assure him he could have the vice presidential nomination if he wanted it. I called on Mr. Roosevelt at his hotel.

"When I told him the situation he demurred on the ground that he understood that neither McKinley nor Hanna desired him. I assured him that he was mistaken. Then he said to me, 'biting his words as he uttered them, 'it seems singular that the man who can make me governor of New York want me to be vice president, and those who can make me vice president want me to be governor of New York.'

"After an extensive conversation I told him that if he desired to be vice president the thing for him to do, and all that was necessary for him to do, was to go and see Mark Hanna, and he finally consented to do so. We

street from the Norfolk avenue side. These windows are fitted up with both gas and electricity, with the modern ventilators in the top. The doorway is a large one with double entrances and exits, equipped with the self-closing doors and ventilators. Luxaflex prism glass is used exclusively.

The main room measures 68x119, and is fitted with steel ceiling painted in the flat finish cream. Three large gas arc lights and forty electric lights with the new type bronze fixtures adorn this.

The wall and column colorings are light tan. All the counters, show-cases, etc., are of the golden oak finish.

Built up a few feet higher than the floor in the rear of the main room is the business office. This office looks like a small bank, with grill work of brass and high work desks. Two tele-phones, the stenographer's desk, the safe and the manager's desk take up most of the room in this office. From the many counters in the store come the wires of the Bull Right cash carrier system which is installed in the store. No posts or connections to the ceiling are required for this system. One hundred and ninety-six yards of velvet carpet are laid in the garment parlors and in the small rest stations around the store building. Further in the rear of the lower floor is the sewing room, measuring 17x35. Here all the alterations are done. Modern sewing machines and tailors' outfits taking up most of the space.

The receiving room is located behind this. It measures 20x20. Here all the freight is received and shipped out.

The 20x20 surplus stock room is located east of the receiving room. This room is used for stock which is likely to be affected by dampness.

A ladies' toilet and rest room is located on the main floor. The basement, measuring 26x200, is modern and convenient. The gentlemen's toilet, coal bins with entrances on the sidewalk outside, the heating plant, and stock room take up a good portion of this basement, which is brick- ed, tiled and cemented. The basement is also connected with the new sewer.

**CIGARETTES INSTEAD OF KISSES.**

A Sharon, Pa., Girls' Club Met in Men's Attire.

Sharon, Pa., Oct. 26.—The "No Kissing Club," composed of the young daughters of some of Sharon's first families, is likely to be disgraced. The fearful strain of refraining from kissing or being kissed by the young men of their acquaintance is said to have driven the fair club members to wine and cigarettes.

There was a special meeting of the club last night at the residence of one of the members in Buhl avenue. It is reported that the girls arrived clad in masculine attire. Each had with her a supply of cigarettes and some brought bottles which were labeled "tea." Everybody set to work to be as like men as possible. Later in the evening the "tea" was produced and it is said it was really champagne and other wines.

**ALONE WITH CORPSE.**

Parent Too Ill to Summon Aid in Vicinity of McNeely.

Colome, S. D., Oct. 26.—Chris Sindo seriously ill at his home near McNeely and the discovery of his plight reveals a sad story. Mr. Sindo's son, a young man of about 21, had been ill for a long time, when the father was stricken and unable to be up. Alone, they were without attention and they had neither food nor fuel. On Monday J. H. Ludwick went to the house, and then there came to light the story. The boy died two days before and the father was unable to summon aid. During the two days, the old man had been alone with the body, suffering intense mental and physical torture. Mr. Ludwick at once summoned Dr. A. L. Kimball, provided food and fuel and reported the case to the people of McNeely, whose response was immediate. The son was given a proper burial and the father is now cared for and will be until he recovers.

**BREAK UP MACHINERY.**

Joseph Glassner, Neligh Farmer, Finds Sons Made Sky Boat.

Omaha, Oct. 26.—Discovery by Joseph Glassner, a farmer, living near Neligh, Neb., that several parts of one of his most expensive farm implements had been removed, apparently with deliberation and malice, led to the still more interesting discovery last week that Glassner's three sons, ranging in age from 18 to 24 years, have been cultivating their inventive bent by taking the agricultural machinery to pieces and using such parts as satisfactorily could be used in the construction of an aeroplane.

According to Neligh news, who visited in Omaha yesterday, Glassner waxed wroth when his sons confessed that they had practically broken up the farm implements in order to break into the Wright class, but his ire waned when he learned that the young men had produced a machine that actually would fly.

The Glassner boys' sky boat is of the early "soaring" type. While it is inclined to be moody and frequently proceeds in directions in which the flyers are trying not to steer, still it flies. The aeroplane is constructed entirely from wood, canvas, and parts of farm machinery. When the construction was begun several months ago the intention of its builders was to make it of parts of worn-out or discarded implements. On the junk pile, however, they could not find all that they needed and when the machine was half built it appeared that all their work had been in vain. Preferring anything to sacrificing their hopes of flying, they attacked other farm machinery and the results were highly

**Man Accused of Abstracting Money From Postoffice Goes Free.**

Sioux Falls, S. D., Oct. 26.—The trial of the case of the United States vs. Thomas S. Conway came to a sudden end in the federal court in this city. Conway, who is only a young man, was indicted on the charge of abstracting money from the postoffice at Hazel. He was employed in a newspaper office in the same building with the postoffice, and during this time the money disappeared. The trial of the case had proceeded some time when Judge Carland directed the jury to return a verdict of not guilty.

On motion of the government the case of the United States vs. Nels Nelson was dismissed. Nelson was indicted for the theft of a steer from the Rosebud reservation.

**No Indian Booze.**

Carter News: "There's Nothing Diding." This is the first thing a big buck, the squaw or the breed bear as they enter one of the popular bar rooms in our city, with money in hand, which they would be pleased to spend for a little firewater. And at all places they are accorded the same treatment. During the past week the Indians have been having great difficulty in securing oil for their machinery, and it all came about by reason of agreement between the dispensers to cut the Indians off their list. The bootleggers, too, we understand, have gone out of business, and our attention has been called to the fact that since the meeting of the business men of our city last Saturday, called for the purpose of investigating the matter of Indian selling, one of the "old soaks" who was supposed to have been in the business of passing liquor to the Indians, led early one morning for greener fields, and it is the opinion of most all our citizens that he used very good judgment in doing so, for had he continued in the business, he undoubtedly would have been caught, and would have been severely dealt with.

An Atchison girl is to be married shortly, and people are remarking that she looks as though she is afraid. "If you feel that way, about it, Carrie," her friends are saying, "why don't you back out?"
