HOW LIGHT IS CUT OFF IN CITY'S STREETS BY TOWERING SKYSCRAPER.

—F. W. Fitzpatrick, the architect who has been called the "father of skyscrapers," gives in the Popular Science Monthly some statistics as to the shadows cast by very high buildings.

"The Adams Express building, New York, which is 424 feet high, casts a shadow 875 feet in length; the Equitable building, which is 493 feet high, one 1,018 feet in length; the Singer tower, which is 540 feet high, one 1,127 feet in length, and the Woolworth tower, which is 791 feet high, one 1,635 feet in length.

"Some skyscrapers cast shadows from a sixth to a third of a mile in length on surrounding property. Thus the Equitable building's shadow at noon on December 21 is about one-fifth of a mile in length; it completely envelops an area of 7.59 acres. Yet the ground area of the Equitable building is only 1.14 acres.

"The shadow cuts off all sunshine from the Broadway facade of the United States Realty building, which is 21 stories high. The New York Title and Mortgage Company building, 14 stories high, and the Washington Life Insurance building, 19 stories high, are both completely shaded. The south side of the Singer tower is shaded to a height of 27 stories. The nearest part of the City Investing building, 400 feet away, is in shadow for 24 of its 26 stories. Even part of the New York Telephone building north of Cortlandt street is shadowed by the Equitable building.

How Expression Originated.

There have been many explanations made as to the origin of the expression, "I'm From Missouri. You've Got to Show Me." One of the latest was made by a Kansas City man, which according to the Kansas City Star, was as follows:

The marriage laws in Missouri in the early days were so loose that anyone could get married without answering many questions. In 1831 a law was passed making it a misdemeanor for a minister or a justice to marry persons not having a state license. It also set the age of marriageable women at eighteen years. If the applicant for a license did not know the age of the bride-elect he had to produce her to the license clerk and let him judge her age. When the applicant went after the girl she naturally asked why she had to go along to get the license. When told that the law required her exhibition she remarked: "Oh, you've got to show me, have you." This occurred many times during the first year or so of the law's enforcement and became a byword.

Thus Missouri became known as the "show me" state.

How "Lost Workers" Are Traced.

Patterned after investigations made in America by Joseph H. Willits of Philadelphia, England is now making inquiry into the subject of "lost workers"—men and women who disappear.

Captain Greenwood, for the government, has finished an investigation in 16 munition factories employing more than 40,000 woman workers. Two thousand left because of ill health and 8,000 gave no reason when they quit, being divided in these classifications: To get married, moving from the district, required at home, wages insufficient, and other employment.

"There is no panacea for disease, but there is one promising remedy, namely, organized welfare work. In the factories where there are organized welfare departments the wastage unaccounted for is below the average."

How Fish Aided Solomon.

According to the Koran of Mahomet King Solomon recovered his throne by a fish restoring him the talisman ring by virtue of which he held dominion over all the devils.

Still more ancient is the recovery of Sakuntala's ring by a fish, which thus enabled King Dasyanta to marry the lady of his love.

From the fancy of the Aryan poet has descended an immense progeny of treasure-retrieving fishes, and the ring of Sakuntala, like the magic circlet of the Persian story, has begotten innumerable rings exactly like itself.

How Whitman Got Nickname.

It originated during the Civil war. At that time Whitman was holding a government clerkship in Washington and was devoted in his service to sick and wounded soldiers in the hospitals. He was a man of large frame and his heavy gray hair and long beard gave him a distinguished appearance. In 1865 W. O. O'Connor, also a government employee and a magazine writer of the period, wrote an intensely eulogistic pamphlet about Whitman, entitled, "The Good Grey Poet." It took hold of the popular imagination and stuck.

How to Achieve Old Age.

Light diet, sobriety and considerable muscular exercise were given as means by which old age may be attained by Prof. Vidal recently in a discussion before the Academy of Sciences of Prof. E. Cassagne's "Treatise of Old Age." The speaker asserted old age was more common today than in other times, pointing out that there were 1,000 centenarians reported in statistics issued during the last year.

HOW WIRELESS PHONES HAVE AIDED IN REDUCING LOSSES BY FIRE.

—The wireless telephone, as a result of a season's tryout, during which the handicaps of "packing" instruments over a thirty-mile mountainous trail, the perils of passing through a forest fire, and numerous other tests were applied, has been pronounced a success for forest service work by officials of the service, according to an announcement from district headquarters at Missoula, Mont.

Hereafter, the announcement says, wireless telephone instruments are to be a part of the standard equipment of the forest service.

At the direction of Chief Forester William S. Graves, tests of this plan of communication were initiated in this district last season by R. A. Adams, telephone engineer, who was assisted by Everett Cutting, United States signal corps standard sets were selected for the experiment, and one was placed in position, after almost interminable difficulties, at the Mud Creek ranger station, near the Lolo hot springs, Montana and another at Beaver Ridge, Idaho.

While the air-line distance between the two stations is but 12 miles, the distance by trail is 30 miles, much of it almost impassable even with pack animals. At last, however, after mishaps that included pack horses off the trail, packs displaced and rolling down mountainsides, and batteries and equipment all but lost, the antennae were hung high on convenient pines.

"The sets were used during the fire season of 1919 in reporting fires and otherwise in the carrying on of the fire campaign with eminently satisfactory results," says the forest service statement.

How Wild Things Are Lured.

Fish and frogs are equally curious to examine the many bright lures that the fishermen know will attract their attention. In frog hunting all that is necessary is a giz composed of several hooks grouped together and covered with a small bit of red flannel. When the frog sees this bit of bright red it leaps for it and often hooks itself at the first attempt. Trout, muskellunge and other game fish will often leap clear of the water to grab an especially brilliant lure.

It may be said that every kind of bird is brimming over with curiosity as hunters of every land have trapped them by inducing them to approach and investigate unfamiliar objects. Crows and parrots possess this curiosity in extreme degree, and if anything is held near their cages they are quick to come over and examine it from every angle.

Why Moses Forbade Pork.

Presumably the reason Moses had for forbidding pork to the Israelites was that the eating of pig-meat was proved accountable for the disease now called "trichinosis."

That dreadful malady is rare nowadays because we cook our pork thoroughly, and any "trichinae" that it may contain are killed by the heat.

Not until recently, however, has it come to be known that trichinosis is really a disease of the rat. Pig-sties are usually haunted by those four-footed vermin, which the pigs often kill and eat, thereby becoming infected.

The pig, however, serves merely as an "intermediate host" for the parasite, which, when taken alive into the human body, proceeds to multiply at a fabulous rate, the tiny wormlike organisms invading the tissues with serious and oftentimes fatal results.

How Lawns Were Named.

Years ago the Dutch excelled all other peoples in the bleached lawns they sent forth. That was in a time, of course, when bleached linen was considered a luxury. The Dutch gained their fame for this excellence because they had a wonderful system of treating the muslin to make it white.

To begin with, they treated it to bleaches and acids of various sorts; and then they placed it on bleaching lawns, or greens, where it lay at intervals from March to September. The white material thus produced took the name of lawns whereon it was bleached—at least so goes the story.

How Chemist Has Put Coal to Work.

The chemist has endowed coal with a multiple indispensability to civilization. In addition to its utilization in its primal state as the cheapest available source of heat upon which all industry and human comfort depend, it is the raw material of the coal-tar chemical industry which ranges in its growing amplitude from the by-product coke oven and the production of industrial fuel and illuminating gas, ammonia and fertilizer, to the manufacture of dyes, pharmaceuticals, photographic chemicals, motor fuels and industrial solvents.

How Canada Honors Heroes.

The names of the 60,000 Canadians killed in the world war will be inscribed on the walls of a church which will be erected in Notre Dame de Grace, a suburb of Montreal. The church will be used by the combined congregations of the Anglican Church of the Good Shepherd and Trinity church.

RANSOM APPOINTED ON PLATFORM COMMITTEE

Indianapolis, Ind., March 3.—F. D. Ransom, general manager of the Mme. C. J. Walker Manufacturing Co., was appointed on the republican state platform committee to represent the colored people of the state of Indiana. This is the first recognition given a race man in this capacity in the history of the state. Mr. Ransom is greatly in demand as a public speaker.

THE DELICIOUS PRUNE.

By example and not by precept. By doing and not by professing. There is no contagion equal to the contagion of life. Whatever we sow, that shall we also reap, and each thing sown produces of its kind.—Ralph Waldo Trine.

The reason prunes have such a burden of disrepute to bear, is largely on account of the careless manner, in years past, that the average cook has served them. Now while they are coming up in price, they are better appreciated. The long soaking and slow cooking which our modern methods of cookery advocates, has proven that such treatment brings out the flavor and sweetness of the fruit. A real prune lover wishes no sugar on the fruit as it needs none but its own sweetness.

Prune Whip Parfait.—Take one-half cupful of stewed prunes, stoned and mashed, one-half cupful of raisins seeded and simmered in water to soften, pinch of salt, eight marshmallows, cut up in half a cupful of cream and steamed in a double boiler until soft, then beaten until smooth. Into the marshmallow mixture whip the other ingredients and set the dish on ice to chill. When ready to serve, heap in small sherbet cups, pour over thick cream and sprinkle with pecan meats broken in bits.

Prune Patties.—Take a half cupful of stewed, stoned and mashed prunes, one egg yolk, add a pinch of salt, a bit of nutmeg, sugar to taste, a teaspoonful of flour and a half cupful of sweet milk. Mix and pour into pastry lined patty tins. Bake until a light brown; then spread the tops with a meringue, using the white of egg beaten stiff with two tablespoonfuls of sugar. Brown.

Prune Roll.—Take one tablespoonful of grapefruit juice, one tablespoonful of sugar, one teaspoonful of flour, two-thirds of a cupful of mashed prunes, one-third of a cupful of seeded raisins. Cover the raisins with half a cupful of water and simmer half an hour. To the prunes add the sugar and fruit juice, a pinch of salt and the flour mixed with a little cold water. Put in the raisins and cook the mixture until it thickens—about three minutes. Spread on biscuit dough that has been rolled very thin, fold and press the edges together and bake. Serve with cream.

Prune Roll.—Take one tablespoonful of grapefruit juice, one tablespoonful of sugar, one teaspoonful of flour, two-thirds of a cupful of mashed prunes, one-third of a cupful of seeded raisins. Cover the raisins with half a cupful of water and simmer half an hour. To the prunes add the sugar and fruit juice, a pinch of salt and the flour mixed with a little cold water. Put in the raisins and cook the mixture until it thickens—about three minutes. Spread on biscuit dough that has been rolled very thin, fold and press the edges together and bake. Serve with cream.

Prune Roll.—Take one tablespoonful of grapefruit juice, one tablespoonful of sugar, one teaspoonful of flour, two-thirds of a cupful of mashed prunes, one-third of a cupful of seeded raisins. Cover the raisins with half a cupful of water and simmer half an hour. To the prunes add the sugar and fruit juice, a pinch of salt and the flour mixed with a little cold water. Put in the raisins and cook the mixture until it thickens—about three minutes. Spread on biscuit dough that has been rolled very thin, fold and press the edges together and bake. Serve with cream.
