COMPLIMENTARY DINNER FOR MOTHER OF NORTH SIDE BRANCH SECRETARY

As a mark of appreciation for her helpful services during her four months visit here with her daughter, Miss Edna M. Stratton, secretary of the North Side Branch of the Y. W. C. A., the board of managers tendered Mrs. Stratton a dinner Thursday night at 7 o'clock, on the eve of her departure for her home in Pittsburgh, Pa. About sixty guests were seated at the beautifully decorated tables and the dinner was served by the Finance Committee, Mrs. T. P. Mahammit, chairman. Grace was said by the Rev. Dr. Trusty, formerly of Pittsburgh, who has just come to Omaha to take charge of St. Paul Presbyterian church. Appreciation of Mrs. Stratton's service were voiced by Mrs. Estella Craig, chairman of the board of management, and a brief and fitting response made by the guest of honor who said she had been made so welcome that she had never felt like a stranger here. Mrs. T. P. Mahammit was introduced and discussed the necessity of supporting the various committees in their work of raising their quota of the money for the work of the branch. She hoped that since the women, who give a dinner every Thursday to help raise money work very hard in preparing the dinners, patrons would not find it hard work to come and eat the dinners. Mrs. Stratton leaves for her home Friday night.

WILL SEEK WEATHER DATA HIGH IN AIR

To Make Daily Flights to Study Conditions.

Washington.—Knowledge of hitherto unknown air conditions at high altitudes which will enable the weather bureau to make forecasts with more certainty and for a more advanced period will be made available to that office under arrangements completed with the naval station at Anacostia. According to the program, naval planes will make special daily flights carrying an aerological observer equipped with instruments to record the air temperature and humidity far above the earth. A naval aerologist schooled in weather observations and forecasts will be assigned to the work. He will carry with him in the plane thermometers and barometers which will record conditions with mathematical accuracy. Upon descent the officer will immediately transmit the data he has gathered to the weather bureau for use in daily forecasts and to army and navy aviation stations in and near Washington for their guidance in flying. Temperature and humidity at great distances above the earth's surface have always given an element of uncertainty to weather forecasts and have made "long-range predictions" almost impossible. These elements in the upper air have a direct influence on weather conditions of the surface. With accurate information as to the conditions available the weather bureau is expected to establish a new record for veracity and far-sightedness.

Dog Plays Mother to Pair of Baby Tigers

Macon, Ga.—Two baby tigers, born in the winter quarters of a circus here, are being mothered by a huge bulldog. An animal trainer, knowing the custom of a tigress to stay its first born, took the animals from the mother and sought a dog. For, the trainer said, the dog is fond of this untamed relative of the cat. The dog, with two of its own puppies and the two tigers, is being quartered in a hotel room.

Student Wants Divorce to Give Life to Art

Paris.—"I love my art more than my wife," was the assertion of a young architectural student entered for the French government's Prix de Rome when he discovered that the rules would not allow married men to inhabit the Villa of the Medici, the home of France's art school in the Eternal City. At first the young architect tried to pass himself off as a bachelor, but when this ruse was discovered he calmly offered to get a divorce. The Academy of Fine Arts sternly replied by voting to exclude him from all the competitions under its auspices, whereupon the would-be dweller among the seven hills appeal to the minister of education and fine arts to have the decision reversed. Up to the present nobody seems to have consulted the wife in the case.
