

Wounded Dog Knew Just Where to Find Friends.

When that poor little dog came limping to our door yesterday I wanted to cry, but I didn't-I just called John and we washed the hurt place and then put a clean rag round his leg. Then we gave him a good supper. He is better today and follows us everywhere. He acts just as though he knew he had found some friends." This is part of a letter from a 12-year-old girl who loves all dumb animals and never loses a chance to befriend them.

Mary Louise lives in the white house on the corner, and in that big shady yard many birds always seem to be singing and hopping around. So often, too, there is a stray kitten or dog coming to that yard and needing the help of Mary Louise and John. One wonders sometimes if these little creatures whom they are always so ready to protect do not have some way of telling each other that good friends live in this house

If they do not have a way of doing this then why did the lame dog go there rather than to the brick house next door? That brick house has a large yard and flowers, too, but then, ft hasn't any Mary Louise and John. Yes, that must be the reason. In the big brick house are just grown-ups and they are very busy every day with all kinds of things. Most likely with them there wouldn't be any time for a friendless, wounded dog. As for Mary Louise, she writes: "John and I are so

glad the poor little dog came to us. We like tohave chances to prove we are good Go-Hawks." Many of you feel the very same way.

THE SQUAW LADY

SYNOPSIS

Editor Shirley wishes to make a trip with a friend, but hesitates to leave his mother rlove. Jack Carroll and the Gallawks decide to look after Mrs. Shirley during the editor's absence, and he departs feeling his mother will not be lone; ly. Jack spends a week at the Shirley home and then in turn Donald. Piggy and Tinker, During Tinker's week the "Squaw Lady" gives a bob ride, but unfortunately she and lame Jimmie are thrown out of the bob. Mrs. Shirley takes Jimmie home with her for a visit. After a call from Aunt Sallie, Mrs. Shirley asks the twins over for the next week, which is also Jack's week, On the following Thursday Mrs. Shirley gives Prudence and Patience a lesson in making cookies, and by 4:30 c'clock all the Go-Hawks had gathered at the house, too. Mrs. Shirley suggests the boys remain in the library, but Jack to Indians before, and perhaps I have expected too much from you. I thought it would be sufficient when I asked you to remain out of the kitchen until the girls had finished

My coustn. Margaret Collins, was ere spending the last week with us n her way east to visit Grandmothe ollins in Boston. Margaret is going o school there this winter. I had hree girls over to luncheon for Peggy yesterday and one of the things I had was made by this recipe. Perhaps some of you would like to try t. too.

STUFFED PEPPERS. Wash green peppers and cut slices off stem end. Clean out pepper, re noving all seeds and seed cases. Fill with cream cheese which has been mixed with chopped nuts and either red or green peppers chopped finely. Put peppers in ice box and let stand for a while before serving. Then cut peppers into thin alices, arranging bout three slices on a bed of lettue eaves for each person. Garnish with

alad dressing. I wonder how many of you are go ng to take cooking at school this POLLY fall. I am for one;

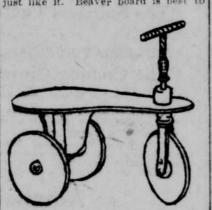

Another Way to Be a Good Go-Hawk

A good Go-Hawk does not talk of unpleasant or disagreeable things at the table. If, on the other hand, he knows a good joke or a jolly, entertaining experience, the table is one of the best possible places to tell it. So remember this way to be a good Go-

"Who are you, Peter, and where de you have your workship?" asks on of my many new boy friends. I am boy just like all you other boys who are reading this page. My little Ah! begged the rest; workship is in the basement of our Put it in an old nest, home. Mother fitted it up for me on And let it find the rest. home. Mother fitted it up for me on my last birthday because she wanted me to enjoy making all sorts of things. I have a lot of fun thinking out things for other people and so will you. I love to surprise mother and Polly, my sister.

This week I made another car for Polly's doll, and as soon as her friends see it they will all want one just like it. Beaver board is best to

In Field and Forest

Another large group of trees that have leaves set opposite to each other on the twigs belong to the Ash famiily. We can always recognize the e family trees not only by their opposite compound leaves, but also by the dry seed of its fruit. These seeds are different from all other seeds and are winged and pointed like a dart. Even after all the leaves have fallen the seed clusters will hang on the bare twigs for a long time. Ash trees grow large and have handsome heads. its close bark is broken by small diamond-shaped plates.

Perhaps some of you have a white ash tree in your own yards and if so. you know what a good looking tree it is, with its trunk like a gray granite column. It is called the white ash because its leaves have such pale linings that make the tree tops so pretty all summer. Both twigs and bark are pale in color. The slender seeds are from one to two inches long, with a wing twice as long. These hang in thick clusters, paler green than the leaves, and in Iale summer they have a rosy tinge. The crop of ash seeds is harvested by the winter winds and wherever the dartlike seeds fall a young white ash will spring to life in the spring. Next Sunday I want to have you meet a few other members of the Ash family, the black, red, green
