

### Speeders Who Defy Summons to Go to Jail

Judge Patrick Gives Five Motorists Seven Days and One Three Days.

Judge Robert Patrick wasn't joking when he said speeders were going to jail.

He proved that he meant business Friday morning when he sentenced five motorists to jail for seven days each, and a sixth for three days.

The speeders appeared in court under capias served on them Thursday after they had ignored "golden rule" summons.

Those who go to jail for seven days are: James Wood, 2310 Franklin street; L. Nelson, 4417 North Thirty-ninth street; Joe Fisher, 1903 S street; A. E. Schubert, 102 South Thirty-second street, and O. T. Lind.

### NEW CREAM CURES ECZEMA GUARANTEED

A wonderful new cream now positively eliminates suffering from eczema, pimples, boils and other local skin troubles.

Try Mercirex Cream at our risk. Unless it brings prompt relief, your druggist will refund your money.

Mercirex is different from the ordinary greasy, smelly ointments. It vanishes. Leaves no trace—only a faint, pleasant perfume.

No matter how serious your trouble—or how long standing—Mercirex will restore your skin to health. Don't suffer from an unsightly, itchy skin another day. Ask your druggist for a jar of Mercirex. 75 cents the jar. The L. D. Caulk Co., Milford, Del.

### Chicago Scientist Calculates Speed of Light More Accurately

Experiments at Mt. Wilson Observatory Show Velocity of Light Rays to Be 330 Miles a Second More Than Previous Estimates.

By A. J. LORENZ, Universal Service Staff Correspondent.

Chicago, Sept. 26.—The velocity of light, which heretofore has been roughly estimated at 186,000 miles a second, has been commuted even more minutely.

The latest disclosures of Prof. A. A. Michelson, head of the Physics department of the University of Chicago, and one of the foremost scientists in the world, show the velocity of light to be 330 miles a second more than heretofore believed.

As a result of his experiments and research work at Mt. Wilson observatory near Los Angeles, this summer, Professor Michelson today announced that he had definitely fixed the speed at which a ray of light travels at 186,330 miles a second.

At that, Professor Michelson said today, he is not yet satisfied, but will continue his experiments to arrive at even more accurate figures.

Will Continue Work.

"My experiments," said Professor Michelson, "are really of a preliminary nature, as I expect to continue them next year in an attempt to reduce my results to the finest degree of accuracy."

During the summer I conducted my work at Mt. Wilson observatory. I had very fine mirrors mounted on a revolving octahedron. The surface of one of these mirrors was addressed toward a mountain 32 miles away. As the mirrored surface of the octahedron revolved the distant mountain was reflected on each revolving mirror. The mirrors revolved at the rate of 500 revolutions a second.

"As the mirrors revolved, the image of the mountain was reflected in a fixed position just as a moving picture film reproduces scenes on a fixed screen. But the mountain did not move and each mirror caught the scene to which it was exposed and reflected it as the preceding one had done, thus making a well defined image.

Studies Einstein Theory.

"As the speed of the revolving mirrors was increased the image of the mountain became blurred. The rays of light from the mountain 32 miles away were not traveling fast enough to register on the mirror.

"I slowed the octahedron to about 500 revolutions per second again. Then by accurately determining the speed of the reflecting mirrors, and knowing the distance from the mountain to the surface of the reflecting lens, I was able to compute the speed with which light rays traveled between them."

These experiments, Professor Michelson said, were preliminary requisites to the tests he will soon conduct in the mile-long vacuum tubes on the university campus to prove or disprove the Einstein theory of relativity.

### Russia Extends U. S. Olive Branch

Soviet Foreign Minister Declares Compromise Possible.

By Associated Press.

Moscow, Sept. 26.—All the facts indicate that a compromise between the interests of the United States and the Russian soviet government is to be desired and that it is quite within reach. Foreign Minister Tchitcherin today declared in a belated reply to the pronouncement of American policy towards Russia made by Secretary of State Hughes.

The Russian foreign secretary, in a carefully prepared 2,500-word interview with the Rosta Agency, bristling with argument but marked by polite but emphatic language, set forth the Russian point of view on Russo-American relations and, according to the interpretation placed upon his declarations by many persons here, held out the olive branch to the United States.

Compromise Desired.

"From the fact that the soviet government serves the interests of the laboring masses and the government of Secretary Hughes serves the interests of American capitalists," M. Tchitcherin said, "it does not follow that a compromise between the two governments is not possible. On the contrary, all the facts indicate that such a compromise is to be desired and that it is quite within reach."

Concerning Russia's debt to the United States, the Russian foreign minister declared that his government had already offered to negotiate with Washington respecting this question. He cited the recently concluded Anglo-Russian treaty as showing that "it is quite possible to make indemnity agreements with other states which will prove profitable to both sides."

### JAPAN REFUSES TO SIGN ARMS PACT

By International News Service.

Geneva, Sept. 26.—Japan today refused to sign the arbitration protocol proposed by the league of nations. The arbitration agreement was to be part of the general disarmament scheme fostered by Premier MacDonald of England and Premier Edouard Herriot of France.

France wished arbitration to be arbitrary.

It was drawn along that line. Nearly all nations intimated their willingness to accept the arbitration protocol. The action by Japan came as a surprise, therefore.

Three league of nations commissions were authorized to make preparations for a disarmament conference and to draw up the arbitration protocol. While Japan has refused to sign the protocol, it is believed she will participate in the disarmament meeting next year. Whether or not the United States will take part has not yet been revealed.

JUMP FROM PLANE BREAKS MAN'S BACK

Welch, W. Va., Sept. 26.—Edward Dagnell, a "stunt" aviator of Knoxville, Tenn., suffered a broken back while making a parachute jump from an airplane Wednesday. After jumping from the fast-moving plane Dagnell's parachute was caught in the limbs of a tree. He dropped 80 feet to the ground and then rolled down a steep bank. His condition was described at the hospital as critical.

### Dawes Rips Up 'Bob's' Candidacy

General Declares La Follette Attacks Constitution in Court Platform.

By Associated Press.

Minneapolis, Sept. 26.—Charles G. Dawes, republican candidate for vice president conferred with state leaders of his party and rested here today before turning northward on his three-day swing through Minnesota.

Leaving here shortly before noon, Mr. Dawes was to make a rear platform speech at Anoka and he will speak in the St. Cloud armory tonight.

The day as planned was the least strenuous of the republican vice presidential nominee's Minnesota tour and it was his purpose to obtain as much rest as possible after yesterday's vigorous campaigning and in preparation for the 11 speeches planned tomorrow on the return trip from St. Cloud to Chicago.

Addressing his inquisitor here last night as to specific instances of an attack by Mr. La Follette on the constitution Mr. Dawes read the La Follette platform declaring in favor of the constitution and added: "You may not be able to understand that but 'Cheers from the audience drowned out whatever else Mr. Dawes might have intended to say on that point."

He previously had denounced this La Follette platform declaration as "an assault on the constitution" which he said Senator La Follette had made in order to obtain socialist support for his candidacy.
