Good buying of oats continued with prices finished in higher ground. The movement of outs from the farms while in excess of last year, showed some for the showard and cession from the past week. Cash demand is active enough and the basis is well held on spot.

Export buying of rye futures attracted more speculative support and this grain more speculative support and this grain advanced well. Rye is regarded as in an extremely strong condition, taking world news into consideration, and very high prices are predicted.

Provisions were active and strong, Lard was 15 to 17 ½c higher and ribs were unchanged.

Pit Notes.

Chicago, Sept. 27.—Seldom has the world wheat situation at this time of the year been so strong. The world requirements will hardly be filled this year without difficulty. It is this fact, backed up by daily heavy taking of American wheat by Europe that has crystallized builish sentiment in the local trade. The domestic situation is also encouraging and the large visible supplies at the moment are being carried with ease by the broadening speculative and cash inquiry.

The run of spring wheat continues fairly large, but mostly to the Duluth market. The run of spring wheat continues fairly large, but mostly to the Duluth market. The reason for this is the excellent eastern shipping demand for the cash article northwest and Duluth is shipping it dut the lakes at a rapid rate.

Minneapolis interests were heavy buyers of wheat in the local market the past few days. This certainly indicates that there is little hope of accumulating supplies of any great amount in the northwest. Buyers of cash wheat are well alive to the supply and demand situation the world over at this time, and the result is that they are "coming after" the grain as fast as possible.

The foreign grain crops, and also the potato crop, are poor. In fact, weather developments over western Europe the past few weeks at harvest time are estimated to have cut supplies at least 10 per cent. This may or may not be true, but Europe is anxious not only for wheat out rye and barley in North America and at time when native more and the cities. By Universal Service.
