

# The New Gateway to the Northwest

**O**MAHA and Nebraska congratulate the people of Yankton and their associates in giving to the northwest this splendid million dollar bridge, which marks the final connecting link between Canada and the Gulf of Mexico, and a new gateway to the great northwest.

This magnificent achievement will stand as a monument for all time to the spirit and progressiveness of the sturdy Dakotans. It means the dawn of a new era for the northwest; it marks the beginning of a closer and more in-

imate freindship and co-operation between Omaha and Yankton trade territory.

So we say "hats off" to these men whose untiring efforts have made the spanning of the old "muddy" a reality; these men who have given liberally of their money and time to bring this gigantic enterprise to successful completion.

Omaha and Nebraska share with Yankton and her aids in this splendid accomplishment. May it bring to these people the rich rewards of prosperity and greater progress in the future development of the great northwest.
