**Black Navy Cocoa Rust**

All Sizes 16 to 38  
MAIL ORDERS FILLED

### The Danger Line cautions—"Safety First!"

SAFETY FIRST COMMITTEES have marked many Danger Lines to protect life and limb.

But there are other Danger Lines less recognized, yet just as menacing just as dangerous. Dentists have indicated such a Danger Line in pointing out those tiny V-shaped crevices where teeth meet gums.

For at The Danger Line on our teeth, food particles collect and ferment. Acids form and decay begins. Pyorrhea frequently develops. Loss of teeth, lowered vitality, heart and kidney disease—all may be the direct result from infection due to Acid Decay at The Danger Line.

For generations dentists have recommended milk of magnesia for counteracting the mouth acidity which causes decay. Squibb's Dental Cream is made with Squibb's Milk of Magnesia. It prevents decay by neutralizing acids as they form. It reduces the peril of Pyorrhea. It soothes and strengthens tender gums and relieves sensitive teeth. It cleans thoroughly, pleasantly.

To buy Squibb's Dental Cream is to make an investment for better teeth and gums. Its regular use not only prevents Acid Decay, but promotes the health of the entire mouth and acts as a safeguard against disease. It is best for the whole family. It cannot harm even baby's teeth and tender gums. Buy Squibb's Dental Cream made with Squibb's Milk of Magnesia—today!

Squibb's Milk of Magnesia useful in hyperacidity of the stomach and as an addition to milk for infants, may be obtained from your pharmacist.
