Look for film on your teeth-that's the cause. How to combat it

Look at your teeth. If dull,

cloudy, run your tongue across them. You will feel a film. That's the cause of the trouble. You must fight it. .Film is that viscous coat which you feel. It clings to

teeth, gets into crevices and stays. It hides the natural luster of your teeth. It also holds food substance which ferments and causes

acid. In contact with teeth, this acid invites decay. Millions of germs breed in it. And they, with tartar, are the chief cause of pyorrhea.

So dingy teeth mean more than loss of good appearance. They may indicate danger, grave danger to your teeth,

Now methods now that mean greater tooth beauty plus better protection from tooth troubles

Ordinary tooth pastes were unable to cope adequately with that film. Not one could effectively combat it. Harsh grit tended to injure the enamel. Soap and chalk were inadequate. Now modern dental science has found new combatants.

Their action is to curdle film and then harmlessly remove it. They are embodied in a new-type tooth paste called Pepsodent-a scientific method that is changing the tooth cleaning habits of some 50 different nations.

Don't you think it worth while to try it for 10 days; then to note results yourself?

Chronic coughs and persistent colds lead to serious lung trouble. You can stop them now with Creomulsion, an emulaified creosote that is pleasant to take. Creomulsion is a new medical discovery with twofold action; it soothes and heals the inflamed membranes and kills the germ.

Of all known drugs, creosote is recognized by the medical fraternity as the greatest healing agency for the treatment of chronic coughs and colds and other forms of throat and lung troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the atomach, is absorbed into the blood, attacks the seat of the trouble and destroys the germs that lead to consumption.
