Real Estate, Giant of Investments, The Foundation of Wealth

There is not a dollar's worth of wealth in the world that is not founded on Real Estate.

If Real Estate were to disappear, there would be no factories, no farms, no stores, no banks, no crops, no railroads, no buildings, no property of any kind. They all depend upon Real Estate—it is their foundation.

Everything in the world, every form of wealth, depends upon Real Estate, and there will never be another square foot of it manufactured.

Populations will increase, thereby increasing the demand for real estate, but the supply of real estate cannot increase. Only the demand can increase.
