Liquid Koal Used as a Lice Killer

When diluted with water in the proportion of one part Liquid Koal to fifty parts water it is the best Lice Killer on the market. It is not expensive to use because it forms a perfect emulsion with water when mixed in this proportion.

Worms in Hogs

The hog is more infested with intestinal worms than any other domestic animal. These worms are created by impure accumulations along the intestinal track and generally produced by poorly digested food. The nature of the hog and his manner of eating renders him more susceptible of intestinal worms than any other animal. Under the present domesticated conditions he is not allowed the use of his natural instincts to obtain the necessary element that would destroy these intestinal parasites. Being shut up in a pen, he is not allowed to follow the dictates of his nature. The hog that is wormy can neither grow nor thrive, for the reason that the worms destroy all the effects of the nutrition furnished in the feed. Liquid Koal put in the drinking water in the proportion of one quart to a barrel and given them twice a week will destroy all intestinal worms and keep them free from their formation and multiplication. It strengthens the appetite and tones up the system.

Something You Ought to Know

A parasite is an organism which, during its life, lives within or on the surface of an animal for the purpose of existence, and from which it receives its nutrition and nourishment. The state or condition in which the animal is kept either hastens or retards the multiplication of them. They are injurious in at least three ways:

- 1.—As direct agents of loss from animal economy.
- 2.—As carriers of other forms of parasites.
- 3.—As carriers of the micro-organisms of infectious diseases.

Liquid Koal

LIQUID KOAL is a black, oily liquid. Liquid Koal is a liquid soap and will form a perfect emulsion with water.

LIQUID KOAL is endorsed by the leading veterinaries of the United States and by many of the State Agricultural Colleges and many of the Experimental Stations which are conducted by the government.

Science

teaches that no medicine ever healed a wound; that nature performs the healing process and medicine can only assist nature in doing her work, not only in healing wounds but also in throwing off diseases.

Those versed in medicine are aware that three-fourths of the money spent for medicine is virtually thrown away, either because of the improper use or the purchase of an improper article. But in purchasing Liquid Koal from any of our dealers you take no chances. If for any reason it does not treat successfully the following list of diseases, just go back to the dealer and get the price you paid; there will be no questions asked. We stand the loss and it costs the dealer nothing.

Following is a list of the diseases that Liquid Koal cures:

Hog Cholera	Lung Worm	Swine Plague
Intestinal Worms	Cow Cholera	Tuberculosis
Anthrax	Black Leg	Abortion in Cows
Corn Stalk Disease	Colic	Glanders
Distemper	Pink Eye	Influenza
Foot Rot	Tape Worm	Lung Fever
Texas Fever	Poll Evil	Chicken Cholera
Roup	Trush	Lock Jaw
Blind Staggers	Catarrh	Farcy
Mange	Bots	Scours
Nasal Gleet	Inflammation of Bowles	Scratches

LIQUID KOAL acts as an appetizer and vitalizer.

Two Things to Remember

Use LIQUID KOAL to destroy parasites on the outside.

Use LIQUID KOAL to destroy parasites on the inside.

Hog Cholera

is a free germ disease, the germ being first found in the alimentary canal, and as long as it is kept in that organ it is comparatively harmless. When, however, it penetrates to the lungs, liver and other organs, it causes fermentation, inflammation and destruction of live tissues furnishing food upon which it thrives and multiplies with rapidity, in some cases a generation an hour, causing death to the animal before the owner has discovered that it was diseased.

Thus, through reasoning, two facts stand out clearly: First, that hog cholera can not be treated successfully unless treatment is commenced before the germ has reached the period of rapid multiplication. Second, that a germicide must be administered, and therein lies the whole secret. As we pass down through the list of various germicides, we are compelled, one after another, to reject them, either because of inefficacy or inadaptability, until we reach LIQUID KOAL.

And why choose LIQUID KOAL? Because it is the only known germicide that will pass through the stomach to the intestines and from there to the blood, permeating the entire system, and still retain its germicide properties.

It is a compound embracing every practical germicide, antiseptic and disinfectant property found in coal, treated chemically, with an alkaline base, until every objectionable feature is eliminated, being non-poisonous and harmless to animal economy.

It contains creosol and quaiacol. It is these hydro-carbon compounds found in smoke that cure a ham, destroying by their germicidal properties all germ life.

The reader may ask, if these properties come from coal, why not use coal? The answer is, because coal yields those properties only by distillation at about 350 degrees of heat and it is reasonable to assume that a hog's stomach could not generate that amount of heat without becoming roast pork, seasoned with fried germs.

We would also call the reader's attention to the fact that the gastric juice of the stomach being an acid, an alkali is required as a neutralizer when the acid too strongly predominates, as in the case of hog cholera. In addition it would be expensive, as the owner of the animal would be purchasing six dollars worth of coal to obtain one dollar's worth of Liquid Koal.

LIQUID KOAL is in general use by veterinary surgeons throughout the whole country, embodying a wider range of use than any other preparation known to science.
