

# NATIONAL MEDICAL COMPANY

LIQUID KOAL IS MANUFACTURED BY

E. L. Barragar, President.

Capital, One Quarter Million.

Principal Office: Sheldon, Iowa.

Branches: Minneapolis, Minnesota. Glendive, Montana. Lewiston, Idaho. York, Nebraska. Oklahoma, Oklahoma.

## Liquid Koal Used as a Lice Killer

When diluted with water in the proportion of one part Liquid Koal to fifty parts water it is the best Lice Killer on the market. It is not expensive to use because it forms a perfect emulsion with water when mixed in this proportion.

## Worms in Hogs

The hog is more infected with intestinal worms than any other domestic animal. These worms are created by impure accumulations along the intestinal track and generally produced by poorly digested food. The nature of the hog and his manner of eating renders him more susceptible of intestinal worms than any other animal. Under the present domesticated conditions he is not allowed the use of his natural instincts to obtain the necessary element that would destroy these intestinal parasites. Being shut up in a pen, he is not allowed to follow the dictates of his nature. The hog that is wormy can neither grow nor thrive, for the reason that the worms destroy all the effects of the nutrition furnished in the feed. Liquid Koal put in the drinking water in the proportion of one quart to a barrel and given them twice a week will destroy all intestinal worms and keep them free from their formation and multiplication. It strengthens the appetite and tones up the system.

## Something You Ought to Know

A parasite is an organism which, during its life, lives within or on the surface of an animal for the purpose of existence, and from which it receives its nutrition and nourishment. The state or condition in which the animal is kept either hastens or retards the multiplication of them. They are injurious in at least three ways:

- 1.—As direct agents of loss from animal economy.
- 2.—As carriers of other forms of parasites.
- 3.—As carriers of the micro-organisms of infectious diseases.

## Liquid Koal

LIQUID KOAL is a black, oily liquid. Liquid Koal is a liquid soap and will form a perfect emulsion with water.

LIQUID KOAL is endorsed by the leading veterinaries of the United States and by many of the State Agricultural Colleges and many of the Experimental Stations which are conducted by the government.

## Science

teaches that no medicine ever healed a wound; that nature performs the healing process and medicine can only assist nature in doing her work, not only in healing wounds but also in throwing off diseases.

Those versed in medicine are aware that three-fourths of the money spent for medicine is virtually thrown away, either because of the improper use or the purchase of an improper article. But in purchasing Liquid Koal from any of our dealers you take no chances. If for any reason it does not treat successfully the following list of diseases, just go back to the dealer and get the price you paid; there will be no questions asked. We stand the loss and it costs the dealer nothing.

Following is a list of the diseases that Liquid Koal cures:

Hog Cholera	Lung Worm	Swine Plague
Intestinal Worms	Cow Cholera	Tuberculosis
Anthrax	Black Leg	Abortion in Cows
Corn Stalk Disease	Colic	Glanders
Distemper	Pink Eye	Influenza
Foot Rot	Tape Worm	Lung Fever
Texas Fever	Poll Evil	Chicken Cholera
Roup	Thrush	Lock Jaw
Blind Staggers	Catarrh	Farcy
Mange	Bots	Scours
Nasal Gleet	Inflammation of Bowles	Scratches

LIQUID KOAL acts as an appetizer and vitalizer.

## Two Things to Remember

Use LIQUID KOAL to destroy parasites on the outside.

Use LIQUID KOAL to destroy parasites on the inside.

## \$500.00

deposited in the "Union Bank" at Sheldon, Iowa, to be paid anyone finding any of the testimonials we publish from time to time are not genuine.

## Hog Cholera

is a free germ disease, the germ being first found in the alimentary canal, and as long as it is kept in that organ it is comparatively harmless. When, however, it penetrates to lungs, liver and other organs, it causes fermentation, inflammation and destruction of live tissues furnishing food upon which it thrives and multiplies with rapidity, in some cases a generation an hour, causing death to the animal before the owner has discovered that it was diseased.

Thus, through reasoning, two facts stand out clearly: First, that hog cholera can not be treated successfully unless treatment is commenced before the germ has reached the period of rapid multiplication. Second, that a germicide must be administered, and therein lies the whole secret. As we pass down through the list of various germicides, we are compelled, one after another, to reject them, either because of inefficacy or inadaptability, until we reach LIQUID KOAL.

And why choose LIQUID KOAL? Because it is the only known germicide that will pass through the stomach to the intestines and from there to the blood, permeating the entire system, and still retain its germicide properties.

It is a compound embracing every practical germicide, antiseptic and disinfectant property found in coal, treated chemically, with an alkaline base, until every objectional feature is eliminated, being non-poisonous and harmless to animal economy.

It contains creosol and quaiacol. It is these hydro-carbon compounds found in smoke that cure a ham, destroying by their germicidal properties all germ life.

The reader may ask, if these properties come from coal, why not use coal? The answer is, because coal yields those properties only by distillation at about 350 degrees of heat and it is reasonable to assume that a hog's stomach could not generate that amount of heat without becoming roast pork, seasoned with fried germs.

We would also call the reader's attention to the fact that the gastric juice of the stomach being an acid, an alkali is required as a neutralizer when the acid too strongly predominates, as in the case of hog cholera. In addition it would be expensive, as the owner of the animal would be purchasing six dollars worth of coal to obtain one dollar's worth of Liquid Koal.

LIQUID KOAL is in general use by veterinary surgeons throughout the whole country, embodying a wider range of use than any other preparation known to science.

## How's Your Liver?

It will pay you to take good care of your liver, because, if you do, your liver will take good care of you.

Sick liver puts you all out of sorts, makes you pale, dizzy, sick at the stomach, gives you stomach ache, headache, malaria, etc. Well liver keeps you well, by purifying your blood and digesting your food.

There is only one safe, certain and reliable liver medicine, and that is

## Theford's Black-Draught

For over 60 years this wonderful vegetable remedy has been the standby in thousands of homes, and is today the favorite liver medicine in the world.

It acts gently on the liver and kidneys, and does not irritate the bowels. It cures constipation, relieves congestion, and purifies the system from an overflow of bile, thereby keeping the body in perfect health.  
Price 25c at all druggists and dealers.

## A Tree of Many Powers.

The ash tree is rich with superstition. The old charlatans of the middle ages used it in their love potions, and the damsels of ancient times believed that it would enable them to make their sweethearts true and help them to discover their future husbands. The inhabitants of Iceland still look with dread upon the use of mountain ash as fuel. Their belief that it will make enemies of all who gather round a hearthstone on which it burns is deep seated and was once almost universal in Europe.

Superstitious seekers after good luck may still be found invoking the spirit of the even leaved ash, after the manner of the ancient tree worshippers, with the verses:

Even ash, I do pluck thee,  
Hoping thus to meet good luck;  
If no luck I get from thee  
I shall wish thee on a tree.

## The Philosopher's Sport.

A balloon trip gives one a sense of utter and complete stillness and also a beautifully serene feeling of aloofness from men and tiresome matters, a contempt for the puniaeness of earth and an unbounded sense of sociability and camaraderie with those with whom one is basketed aloft in those few square feet of wicker. It is a philosopher's joy, ballooning, the sport of the scientific, and the idea that it provides a new thrill or curdles the blood of jaded and sinful butterflies may be good enough for the halfpenny press, but not for the wisecracks of the Aero club.—Bystander.

## Lucky Horseshoes.

There is a right way and a wrong in the picking up of a horseshoe. I was walking with a country bred boy along a Somerset lane and saw one lying in the crumbling summer rut. "There is a horseshoe," said I. The lad sprang forward, but stopped suddenly before his fingers touched the iron. "But I won't pick it up," said he, "or I shall spoil your luck." It may perhaps have been only a point of etiquette, but he assured me that a horseshoe of my finding could bring luck neither to him nor to me if he touched it before me.—London Standard.

## Which Was It?

The governor was puzzled. "Look here," he said, turning to his private secretary. "Can you tell me whether this note comes from my tailor or my legal adviser? They're both named Brown."

The note was as follows:  
I have begun your suit. Ready to be tried on Thursday. Come in. BROWN.  
—Toledo Blade.

## Male Vanity.

Man believes himself irresistible at all ages, and I believe that the older he grows the more fascinating he thinks himself.—London World.

## LIBRARY NOTES.

We are ready to loan the teachers of Red Willow County boxes of books.

There are some interesting articles which may be found in the October magazines at the Public Library.

"The Development of the Philippines," by Hamilton M. Wright. Americans building the railroads and handling the natives with tact—Modern industrial methods and government help steadily teaching the Filipinos the lesson of progress—The resources and the needs of the Islands—Observations of a 1,700-mile trip.

"The Stages of Vesuvius' Eruption," by Frank A. Perret.—Photographs which show the whole cause of the disturbance, one view after another as it occurred.

"Education in the New Japan," by Mary Crawford Fraser.—The difficulties of the schools under the new conditions—Ill-paid teachers—A great rush of pupils—Delicate social problems of the new order.

"The Russian Revolution in Process," by Isaac A. Houswick.—An orderly account of the awakening of the people against the autocracy—A real revolution which cannot go backward—A consecutive narrative from the point of view of a liberal Russian.

Library hours: mornings, 10:30 to 12:00 o'clock; afternoons, from 1:30 to 6:00 o'clock; evenings, from 7:00 to 9:00 o'clock; Sunday, 2:00 to 5:00 o'clock p. m.

## CHATTEL MORTGAGE SALE.

Notice is hereby given that by virtue of a chattel mortgage, made on the 21st day of June, 1905, by J. E. Lavethers to Reeves & Co., upon the following described property, to-wit:  
One No. 3383 Reeves 20 H. P. straw burner, jacketed engine, manufactured by Reeves & Co., with all fixtures and appendages with or belonging to same.  
One No. 3121 Reeves' 33x56 mammoth cylinder separator, manufactured by Reeves & Co., with all fixtures and appendages belonging to same.  
One No. 3454 Reeves' Farmer's Friend wind stacker, manufactured by Reeves & Co., with all fixtures and appendages belonging to same.  
One No. 1810 Parson's self feeder and band cutter.  
One No. 5475 Peoria double tub weigher.  
One No. 357 Reeves' engine tender.  
One 100-foot 8-inch 4-ply Gandy belt. One 21x30-foot 8-ounce tarpaulin. One No. 2 lifting Jack. One tank, pump and hose.  
Said Reeves & Co. will sell said property for cash to the highest bidder at public auction on the 5th day of November, 1906, on the farm of Henry S. Beck, situated in section 19, town 1, range 29 west, in Red Willow county, Nebraska, at 3 o'clock p. m. of said day.  
Said mortgage was filed in the office of the county clerk of Red Willow county, Nebraska, on the 24th day of June, 1905. There is now due on said mortgage and the notes, hereby secured, the sum of one thousand nine hundred forty-one and sixty-five one hundredths dollars (\$1,941.65); said mortgage has elected to declare the whole debt secured by said mortgage due, as by its terms and the terms of the notes secured thereby provided.  
No proceedings at law has been had for the collection of said debt or any part thereof.  
Dated this 9th day of October, 1906.—J. E. LAVETHERS & CO., Mortgagees.
