

A Noted Writer to Lecture at Chautauqua

Harold Morton Kramer knocked about as a cowboy, a lumber jack and a miner. His friends discovered that he had genius as a writer, so he went to school, secured an education, and became a newspaper man, later a successful novelist.

His platform work is highly successful and his time is much in demand at summer assemblies all over the land.

I. Weiss Egery Musicians

The leader is the most sensational and sympathetic violinist in America, and is as well known in the European music schools as in this country. The Chautauqua management can get no greater artist. Miss Tucker is a cellist of renown and Miss Dora Weiss is a "divina" pianist. At 32

CHAUTAUQUA

Prizes for Nebraska Flyers.

The aero club of Nebraska announces an amateur aviation contest in connection with the mid-west aviation meet to be held on a site near Omaha, July 9 to 14.

There are a good many people in Nebraska interested in aviation but it was not known anyone pretended to fly until the aero club announced enough amateur aviators had been found in Nebraska and western Iowa to have an amateur meet in connection with a big demonstration. Nine applications are now in for entries to this contest.

Professionals who will compete include Glenn M. Curtiss, who recently made the record breaking flight from Albany to New York City. Chas. K. Willard and C. J. Mars, both professionals in the heavier than air machines, are under contract to come.

What Everybody Ought to Know.

That Foley Kidney Pills contain just the ingredients necessary to ease, strengthen and regulate the action of the kidneys and bladder. A. McMillen.

Supt. Chas. W. Taylor reports a growing interest in the coming chautauqua. A limited number of season tickets have been placed on sale. When these are exhausted, the price will be 50c higher.

Seven great musical companies, a dozen lecturers and entertainers, besides many attractive and educational features, comprise the intellectual menu of the coming chautauqua, which opens at McCook on the 13th of July.

There are so many great attractions killed for the chautauqua, which begins July 13, that it is hard to pick out which is the most popular. The safest way to do is to arrange to attend the entire season.

COMPLAIN AGAINST RATES.

Lumber Dealers Appeal to Commerce Commission.
 Cambridge Nebr., June 11. — The Krotter Lumber Co., Barnett Lumber Co., J. S. Hatcher Co., Chicago Lumber Co., Perry & Bee Co., E. G. Caine & Co., Barr Lumber Co., De-May Lumber Co., A. W. Schroeder & Co., E. A. Pettygrove, Bullard Lumber Co., and Palisade Lumber Co., representing the lumber dealers of southwest Nebraska, have filed a complaint by Perry, Lambe & Butler, their attorneys, before the interstate commerce commission against the Chicago, Burlington & Quincy Railroad Company; Atchison, Topeka & Santa Fe Railroad Company; Chicago, Rock Island & Pacific Railway; Missouri, Kansas Texas Railway; Missouri Pacific Railway; St. Louis, Iron Mountain & Southern Railway; Kansas City Southern Railway Company; Kansas City, Fort Scott & Memphis Railway; St. Louis, San Francisco & Texas Railway; and the Chicago, Rock Island & Gulf Railway, alleging that these railroads are charging lumber dealers in Nebraska unjust, unfair, unreasonable, exorbitant, discriminatory and confiscatory rates as compared with rates charged for the same kind of shipments—yellow pine lumber from the south to points in Colorado, Kansas and Wyoming. The territory covered is that along the high line, from Holdrege to Venango, Nebraska; the main line of the C. B. & Q. from Holdrege to Haigler, including the Culbertson-Imperial branch and the Orleans-Saint Francis branch from Orleans to Danbury, Neb.

The petition alleges that the rate on yellow pine lumber to Marion, Nebraska, is 42 5-10 cents per hundred-weight in carload lots, while the same shipment, over the same road, when carried to Cedar Bluffs, Kansas, under the same and identical conditions is hauled for 36 5-10 cents, and from there on the scale of rates increases until Saint Francis, Kansas, where the rate is 37 cents, and this point is 78 miles farther on the same line, and must pass through Marion, Neb., to reach its destination, or that the Kansas dealers get their haul for 5 1-2 cents per hundredweight less. The same is true to Haigler, Neb., where the rate is 43 5-10 cents and the rate over the same road with the same and identical conditions to Laird, Colorado, ten miles farther to haul, is 37 cents; also the rate to Venango, Neb., is 45 2-10 cents, and the same line under the necessity of running 160 miles to Camp-stool, Wyo., makes the Wyoming town a rate of 40 cents per hundredweight.

The complaint prays that an order be made commanding the defendants to desist from these unjust and unfair rates, to restore rates in force and effect on and prior to January 1, 1908, when a more equitable rate was in force, and that the defendant carriers be ordered to restore all excessive freights and charges collected from the lumber dealers during that period.—Lincoln Journal.

K. of P. Memorial Day.
 Memorial Day for the 46th period of Pythianism was duly and appropriately observed, last Sunday, by the members of McCook lodge No. 12.

At two o'clock, the members assembled at their castle hall and from hence marched to the Methodist church, where they listened with appreciative attention to an excellent sermon by Sir Knight Rev. Bryant Howe, whose thought was along the line of encouragement as an expression of the passion of love. Solos by Lewis Ludwick and Joseph Moore and selections by the church choir were other features of the service.

After the church services the knights repaired to the cemeteries of the city and decorated the graves of deceased members of the order with floral emblems, with appropriate ritualistic expression.

The members of the McCook temple No. 24, Pythian Sisters, attended the services at both church and cemeteries in organization, adding materially to the occasion by their presence.

There were no new graves to decorate, this year.

Glad to Recommend Them.
 Mr. E. Weakley, Kokomo, Ind., says: "After taking Foley Kidney Pills, the severe backache left my kidneys became stronger, the secretions natural and my bladder no longer pained me. I am glad to recommend Foley Kidney Pills." In a yellow package. A. McMillen.

The Nebraska aero club has put up \$15,000 to secure these men and they will give a five days' demonstration on some site to be selected by Mr. Mars within a few days. Both Florence and Benson are bidders for the meet and it will be held some place about Omaha. Clarke Powell of Omaha is the secretary of the Nebraska club.

Rise to Fame of Clara Morris

ALTHOUGH it had been known for some time that Mrs. F. C. Harriott, better known as Clara Morris, was ill, the recent sudden turn in her condition came as a great shock to her friends and admirers the country over. Unexcelled in her time and in her field among American actresses, when she retired from the stage and took up literary work she showed the same fertile imagination, versatility of execution and industry of application that won her such historic honors.

Few if any great actresses have begun their careers in the face of such misfortune as darkened the early life of Clara Morris. Born in obscurity, without friends or influence, her father dead while she was yet a mere child and her mother eking out a precarious livelihood as a humble laborer, Clara Morris entered upon her career with no other capital than a trust in Providence, a strong will and a determination to be constant in every kind of effort. Even as a young girl she was not one of those who entertain the supposition that any real success in great things or small ever was or could be, ever will or can be wrested from fortune by fits or starts, and so she waited and watched and plodded on, conscious that some time and some-

CLARA MORRIS IN 1880.

where the walled up power within her would break through its barriers and bring its great reward.

The birthplace of Clara Morris was Toronto, but at an early age she was taken to Cleveland, and her earliest remembrances of home and childhood are remembrances of the drying up of every spring and fountain in her young heart. Poverty was her handmaid, and if she now and then enjoyed the cheap delights of life even they were bought and paid for by distressing toil. Her mother being employed in a subordinate position in John Elslser's Academy of Music in Cleveland, Clara also sought and found employment there, beginning her career as a ballet girl. She was at this time less than fourteen years of age.

It did not take long, however, for the old manager to discover that the little girl possessed precocious talent, and occasionally he gave her small speaking parts. They were so well performed that they grew in importance and promotion followed.

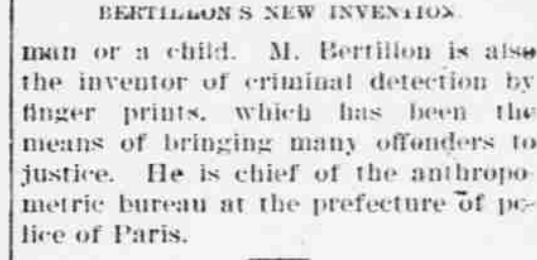

Conscious that a larger field was open before her and inspired by a laudable ambition to explore its possibilities, she now determined to go to New York, but there encountered obstacles, disappointments and setbacks. All this was disheartening and well calculated to appall an ordinary nature, but hers was of that india rubber quality which, most repressed, grows firmer with the opposing weight. At last Augustin Daly, who was then managing the Fifth Avenue theater and gathering around him a galaxy of talent, consented to give her a small position in his company. The first half of the season was nearly closed when she was cast for a minor part in "Man and Wife," but one night the leading actress was suddenly taken ill, and Clara Morris was called upon to play the role of Anne Sylvester. Her confidante in the company smiled contemptuously at the idea that this plain western girl could do more than walk through the part and, as it were, temporarily "fill the gap," and even Daly himself was nervous at the prospect of an experiment that might result in disaster. Predictions of the failure were heard on all sides, but to Clara Morris it was a golden opportunity. She knew it instinctively and marshaled all the forces within her for the ordeal. She rehearsed carefully, analyzed the character until every phase of it seemed like an open book and then prepared to throw into it all the intensity of her emotional nature.

As she swept with her peculiar grace from point to point through the scenes not an eye in the great audience but followed every motion, not a face but was turned to catch every accent that fell from her lips. When the curtain rang down that night Clara Morris had won her victory and Augustin Daly had discovered a phenomenon. The hitherto repressed and neglected genius went home crowned with laurels and from that hour wore them unchallenged during her stage career.

Some New Inventions Talked About

BERTILLOD is a name known and feared by lawbreakers the world over. His wonderful system of identifying criminals by means of measurements proved to be so successful in Paris that all other continental countries adopted it, and now he has invented a dynamometric apparatus intended for the detection of burglaries. The apparatus will register the expenditure of muscular effort during a burglary and will thus, he claims, make it possible for the police to reconstitute with sufficient exactitude the scene during the burglary.

It is stated that the invention is so delicately adjusted that it will be possible to discover whether a robbery has been committed by a man, a wo-

BERTILLOD'S NEW INVENTION.

man or a child. M. Bertillon is also the inventor of criminal detection by finger prints, which has been the means of bringing many offenders to justice. He is chief of the anthropometric bureau at the prefecture of police of Paris.

No longer will the deep sea diver go below the water to be at the mercy of the first hungry shark or dangerous swordfish that comes along. Herefore they have carried only a knife with which to protect themselves from the denizens of the deep, but now a real weapon has been invented for them. This is a submarine rifle that can put a ball through a heavy armor plate.

CAPTAIN GROBLE'S GUN FOR DIVERS.

It did not take long, however, for the old manager to discover that the little girl possessed precocious talent, and occasionally he gave her small speaking parts. They were so well performed that they grew in importance and promotion followed.

Conscious that a larger field was open before her and inspired by a laudable ambition to explore its possibilities, she now determined to go to New York, but there encountered obstacles, disappointments and setbacks. All this was disheartening and well calculated to appall an ordinary nature, but hers was of that india rubber quality which, most repressed, grows firmer with the opposing weight. At last Augustin Daly, who was then managing the Fifth Avenue theater and gathering around him a galaxy of talent, consented to give her a small position in his company. The first half of the season was nearly closed when she was cast for a minor part in "Man and Wife," but one night the leading actress was suddenly taken ill, and Clara Morris was called upon to play the role of Anne Sylvester. Predictions of the failure were heard on all sides, but to Clara Morris it was a golden opportunity. She knew it instinctively and marshaled all the forces within her for the ordeal. She rehearsed carefully, analyzed the character until every phase of it seemed like an open book and then prepared to throw into it all the intensity of her emotional nature.

Municipal authorities the world over are much interested in the novel street cleaning machine just invented by a civil engineer of Vienna which does away with all the disagreeable effects of sweeping, etc., and saves labor. The machine contains a revolving brush which sweeps up the dust. This, however, is not left on the street in order to be collected by human sweepers. It is caught in a large funnel and sucked up and finally deposited in large boxes by a ventilator. The wagon contains two such boxes, which can be removed and emptied easily by means of simple contrivances.

A STREET CLEANING AUTOMOBILE.

Only one man, the driver, is necessary to do all the work except the unloading. The wagon is an ordinary 25-32 horsepower auto truck. It cleans easily eleven miles of street per hour. Each dust box has a capacity of fifteen cubic feet. By having empty boxes stationed at certain points along the route of the wagon to be exchanged for the filled ones, which can be collected later, the work can proceed uninterrupted.

THE HORN MAN

Will lecture at Chautauqua

Advertised List.

The following letters, cards and packages remain uncalled for at the McCook postoffice, June 10, 1910:

Letters—	Honel in, Mr. Roy
Foote, R. H.	Shaw, Mr. A. B.
O'Brien, C. J.	Walters, Miss Katherine
Walters, Miss Katherine	
Cards—	
Emberly, Ed	Fosler, Dr. J. J.
Johnson, Mr. Ward	Lafrantz, Mr. Henry
Hoheng, Mr. Herman	Mishler, Mr. Sam (2)
Miller, Mr. Geo. H.	MacDonald, Mrs. Bruce
Smith, Mr. B. H.	

When calling for these, please say they were advertised.

LON CONE, Postmaster.

What a Summer Cold May Do.
 A summer cold if neglected is just as apt to develop into bronchitis or pneumonia as at any other season. Do not neglect it. Take Foley's Honey and Tar promptly. It loosens the cough, soothes and heals the inflamed air passages, and expels the cold from the system. A. McMillen.
