He resickness are not due to any actual dis- viewed at length the tariff legislation Dr. Coit. ease, but simply to a constipated condi-tion of the system, which the pleasant application to the sugar and other manufacturing interests of the day. "The Possibilities of Nebraska" was

ably treated by R. M. Allen, president of the association. The experience of Nebraska as a sugar-producing state was compared with other states and countries, showing that they did not always meet with success. The crop in Europe was very rich. Their beets are firmer and contain more sugar than is possible in this country, which may be due to climatic conditions and to seed. Germany can produce four and a half more tons of beets to the acre, with 2 per cent more in raw sugar than is possible here. In Russia the indusfertile soil, cheap fuel and low priced labor. Beets have been tested with as that we need protection. We want a duty on sugar that is fair; not an exacting one. Mr. Allen gave his hearers an insight of all sugar-producing countries the world over and also as to the yield. Here in Nebraska we have a good field, the right altitude, rien soil. and with skilled labor and a study of this subject we may be able to save much which is now lost, and make discoveries of vast benefit to beet culture. J. S. Hoagland addressed the association on state legislation. If the bounty law only tended to the enrichment of the manufacturer it should be voted down, but if it was a source of revenue and made the state prosperous it should be sustained. He referred to school taxes and the wolf scalo bounty and proved that the law was beneficial. When the industry is established it will enhance the value of land and prop-

trict factories and county associations. Hon. W. G. Whitemore of Valley read a paper on the subject "What Now?" has been introduced in Germany-a fan He regarded this convention as the deftly concealing a tiny trumpet in its most important of any that has convened in this state since that which prepared our constitution. We may large European cities. Only thirtywell congratulate ourselves and return to our homes with this sentiment, "Nebraska is the place and sugar beets the stuff." Men differ because the facts which form the basis of their judgment buildings are comfortable and education are not understood by them alike. He failed to see how those people who

kick because the company refused to take beets which did not reach that standard. He did not believe that the Oxnards would pursue a course which must inevitably lead to failure, and the kicking of certain parties he ascribed to the old tendency which began in the Garden of Eden. The other felarisen here, he felt sure, would reconcile the differences existing between the producer and manufacturer. He ascribed the failure of the Valley beet syndicate to the fact that their beets did not ripen, and that the land was not in the best condition for their growth and development of their sugar qualities. The convention was unanimous on one question. That was that Nebraska is naturally and peremptorily adapted to the beet sugar industry. We want having the analysis made by state chemists, who are in nowise interested in the factories. When this is accomplished, and the farmer has the same degree of confidence when he that he will receive the fair treatment he would receive were he to take a load of corn to an elevator then the

industry would advance. E. M. Norion, state weighmaster of from his heels to his hat. process, intended for small factories the production of the Norfolk factory. for reducing the crop to raw sugar for | Since the factory has been in operation it has paid for beets the sum of \$492, 427. It has paid to employes \$74,600, ceived for the sugar it has manufactured is \$886,623, which, after paying for coal, coke and lime and other supplies, does not leave a very large margin of profit, though it shows that the

M. A. Lunn of the Beet Sugar industry addressed the convention on how to secure factories. His talk was relative cure eastern capital to erect them with no subsidy other than the land on which the factory was built. They would do nothing without a guarantee of acreage. Mr. Lunn reviewed the ground covered by other speakers and told his
