THE SUNDAY SCHOOL.

LESSON XI, FIRST QUARTER, INTER-NATIONAL SERIES, MARCH 18.

Text of the Lesson, Gen. xvill, 17-21 (a Missionary Lesson)-Memory Verses, 17-19-Golden Text, Gen. xvili, 18-Commentary by the Rev. D. M. Stearns.

17. "And the Lord said, Shall I hide from Abraham that thing which I do!" As we have choice between a temperance and a ionary lesson, I unhesitatingly choose the latter, believing that the greater includes the less, and also firmly believing that if individual Christians and churches, societies and Sunday schools would only yield fully to the Lord that He might through them accomplish all His pleasure in preaching the gospel to every creature, not only would the Lord be greatly rejoiced, His elect church hastened to completion, but these same individual believers, churches, societies and Sunday schools would know the blessing of the Lord as never before. These five verses of this lesson are in connection with the visit of the Lord and the angels to Abraham under the oaks of Mamre and the approaching destruction of the cities of the plain. It is a most suggestive missionary topic, as the same Lord who said, "Shall I hide from Abraham that thing which I do?" said also some 1800 years later, when here on earth in His humiliation, "As it was in the days of Lot, they did eat, they drank, they bought, they sold, they planted, they builded, but the same day that Lot went out of Sodom it rained fire and brimstone from heaven and destroyed them all. Even thus shall it be in the day when the Son of man is revealed" (Luke xvii, 28-30), and now over 1800 years still later those who are Abraham's seed by faith in Christ-Jesus (Gal. iii, 20), with this thing not hid from them, are as indifferent to the impending storm that is surely coming and the welfare of people about them as if the Lord had never ut tered these words. Please do read Prov. xxiv. 11, 12; Ezek, xxxiii, 7-9.

18. "Seeing that Abraham shall surely become a great and mighty nation, and all the nations of the earth shall be blessed in him." As to the farreaching blessing, see chapters xii, 3, and xxii, 18. Although it was not fully revealed to Abraham just how this glorious result was to be accomplished, it is not hidden from us to whom has been given the New Covenant as well as the Old. The New opens with the statement that Jesus Christ is the son of David, the son of Abraham (Matt. i, 1), and goes on to show that He is the one of whom Moses in the law and the prophets did write that though he was rejected by Israel, to whom He specially came, yet He suffered and died and rose again according to the Scriptures; that while the kingdom is postponed because of the rejection of the King He is by the preaching of the gospel of His grace gathering from all nations an elect company who shall reign with Him as His bride when He shall bless all nations through His elect, restored and holy nation, Israel (Luke xxiv, 25-27; xix, 11; Acts iii, 19-21; xv, 14-17). The national conversion of Israel will be accomplished when they look upon Him whom they have pierced, as He shall return in power and glory, bringing His bride with Him; then shall they be smitten with true conviction of sin, like Saul on the way to Damascus, and shall welcome their rejected Messiah, saying: "This is Jehovah. We have waited for Him; we will be glad and oice in His salvation." Then shall Israel blossom and bud and fill the face of the world with fruit. See Zech. xii, 10; xiii, 1; Isa. xxv, 9; xxvii, 6.

19. "For I know him that he will command his children and his household after him, and they shall keep the way of the Lord, to do justice and judgment, that the Lord may bring upon Abraham that which He hath spoken of him." The Lord know-eth each of us thoroughly, even to our thoughts and imaginations (Ps. exxxix, 1-4; I Chron. xxviii, 9), and He knows what He can accomplish through us, and whether we will walk in His way or not. By disobedience we hinder Him from accomplishing His pleasure in and through us. If we were only willing and obedient we would in every true sense eat the good of the land and be filled with the fatness of His house (Isa. i, 19; Ps. lxxxi, 13, 16; xxxvi, 8). The way of the Lord is as high above our ways as heaven is above the earth (Isa. Iv, 8, 9), yet vain man clings to his own thoughts and ways, and thus knows neither the Lord's thoughts nor counsel (Mic. iv, 12). Much time and strength is thus wasted by individuals and churches by not knowing the Lord's way and purpose

20. "And the Lord said, Because the cry of Sodom and Gomorrah is great, and because their sin is very grievous." All sin cries unto God, and He hears the cry of all the oppressed. "The voice of thy brother's blood criest unto Me from the ground" (Gen. iv, 10). The cries of the oppressed reapers enter into the ears of the Lord of Hosts (Jas. v, 4). His eyes and ears are open to all things on earth, but because He is long suffering He tarries to the utmost if perchance He may lead men to repentance and deliver them from eternal loss (II Pet. iii, 9; Job xxxiii, 29, 30). And while judgment is restrained He gives us the privilege of interceding for men as Abraham did, and of beseeching men to be reconciled to God (II Cor. v, 20.)

21. "I will go down now and see whether they have done altogether according to the cry of it, which is come unto me, and if not I will know." He never punishes with out cause, nor without due and patient investigation. "Ye shall know that I have not done without cause all that I have done in it, saith the Lord God" (Ezek, xiv, 23) Before the Lord Jesus shall be revealed from heaven with His mighty angels in flaming fire, taking vengeance on them that know not God and that obey not the gospel of our Lord Jesus (II Thess. i, 7, 8), there will be a judgment of the saints for their service (Rom. xiv. 10; Il Cor. v, 10), and as there is a possibility of much work being burned up (I Cor. iii, 13-13), I for one desire to keep the way of the Lord and have Him work in me both to will and to do of His good pleasure (Phil. ii, 13).

A Marvelous Time Recorder. One of the most wonderful machines in these days of miraculous mechanism is the chronoscope. It took form under the skill-ful hands of Wheatstone, the mathematician, who needed an instrument to meanare smaller intervals of time than his lock or watch could indicate. Many imrevements have been made in the chronoscope since Wheatstone patented is in 1840, and now the machine is employed to measure the flight of projectiles from a and record a difference of time amounting to a millionth part of a second and, electricity being used in recording the pas-sage of a projectile, it is possible to detername to a very small fraction the rate of apsed with which a shot flies from a gun. —London Standard. HOW TO WASH GLASS.

A Subject With Which All Housekeepers

Are Not Familiar. For windows, mirrors, glassware and polished glass generally it is best not to use soap in cleaning and to employ only the softest and finest cloths. Polishing powders, polishing soaps and in fact anything barder than prepared chalk should not be used. A polish once given, whether the substance be glass or metal, cannot as a rule be improved by any ordinary rubbing. For bottles or other articles, where the appearance is of no consequence, pearline or soap may be used in combination with sand, etc.

For mirrors, fine glassware, etc., alcohol and water is probably the most convenient and safest liquid that can be used. In some cases a little acetic acid or lemon juice may be added with advantage. Upon windows, whiting or prepared chalk is frequently recommended, but the polish obtained in this way is inferior.

In cleaning common glass little attention may be paid to the preservation of the surface. It is possible to use the more powerful agents safely. For a strong corrosive lye, for cleaning dirty bottles, etc., dissolve an onnce of carbonate of soda-common salt soda-in 3 quarts of water and bring to a boil.

Slack an ounce of quicklime in a covered basin, and when thoroughly slacked add, little by little, to the boiling solution of soda, stirring frequently. This is very effectual in removing grease, but is so strong that the hands must be kept from coming in contact with it. Sand soap answers very well for articles in which the slight abrasion of the surface is not of much importance and when the dirt does not adhere tenaciously.

For sediment in the bottom or dirt clinging to the inside of the bottle, place a little rice or coarse ashes in the bottle, fill half full of the cleaning solution, shake thoroughly, and it will be quickly cleansed.

How the Sound of a Seashell at the Ear Is Accounted For.

The peculiar murmuring sound, not unlike the ripple of the waves on a still evening, which we hear on placing a shell or other hollow object to the ear, is due to the fact that the concave surface concentrates, and thus multiplies all the different sounds around us, so as to render them audible. The many sounds always present in the air are augmented by the resonant cavity of the shell. A goblet applied to the ear will produce the same effect.

How to Make Rose Potpourri.

Gather faded roses and any rose leaves that fall to the ground, prepare some earthen plates with white blotting paper over them, spread the rose leaves on the paper, throwing away the stems and seeds, and set them by a window where the sun will shine on them. Stir often till very dry. Sweet violets and other fragrant blossoms can be used with the roses, but should be dried separately. salt. Fill the jar with alternate layers of dried leaves and salt. Stand the jar on a shelf in a warm room for four or five weeks. Leave it uncovered and stir well every day. Then from a drug store get a little resemary, thyme and bay leaves, break up fine and mix with the rose leaves. Get also a mixture of powdered orris root, ground cloves, ambergris gum, cecia, patchouli and sandalwood, in all a half ounce. Sprinkle this mixture over a quart of rose leaves. grate in a little dried lemon peel and about 30 drops essence of jasmine and the same of attar of roses. Now cover the jar, and you will have a potpourri.

How to Clean Willow.

Willow chairs require only soap and water, with good scrubbrush, to make them look like new. Let the soap be good, the water warm, and give a good rinsing to remove all traces of soap. Do not dry, but leave in the air until well drained, then remove to their place in the house.

How to Make Deviled Chicken.

Chop very fine any pieces of cold cooked chicken that may be left. To every pint of this meat allow one-half pint of cream, a tablespoonful of butter, a tablespoonful of chopped parsley, 3 hard boiled eggs, 3 tablespoonfuis of bread crumbs, one-quarter nutmeg grated. Salt and cayenne to taste. Put the butter in a frying pan to melt; then add the bread crumbs, cream, chicken and seasoning. Stir over the fire until it boils; then add the hard boiled eggs chopped very fine. Fill paper cases or individual dishes with this mixture. sprinkle lightly with bread crumbs and brown in a quick oven.

How to Clean Drain Pipes. To clean the drain pipes dissolve a few cents' worth of copperas in a pail of hot water and pour a little of this into the pipes each day. It will keep them free from noxious odors and the grease that often clogs the pipes.

How to Find the Magnifying Power of a Compound Microscope.

The magnifying power of a microscope centers in the lens. This power of a lens depends upon its focal length, the object being, in fact, placed nearly in its principal focus, or so that the light which diverges from each point may, after refraction by the lens, proceed in parallel lines to the eye, or as nearly as is requisite for distinct vision. The focal length of the eye generally ranges from 6 to 14 inches, so that they assume 10 inches as near the true average. Thus a lens whose length is one-sixteenth of an inch is said to magnify 160 times.

How to Prevent Swellings After a Blow. To prevent swelling after a blow rub the part immediately with butter, or dip a handkerchief in cold water, roll it into a thick pad, press it to the part, and tie it on with a bandage antil other remedies can be obtained.

No. 53. - Double Diagonal. XxXxxxxx XXXXXXXX xxXxXxxx XXXXXXXX x x x x X x X x XXXXXXXX

The first diagonal of six represents the name of "a recess for books as in a library;" the second, "a military engagement in which the parties engaged are not armies;"

A STORY FROM NEW JERSEY WHICH WILL INTEREST EVERYONE.

A Man Who was Cured of Rheumatism and Paralysis After Suffering for Twenty-Six Years.

(From the Philadelphia Record.)

A very interesting story comes from Caps May C. H., N. J. The chief character in the story is John L. Steel, who has lived in that town for thirty years, and is one of the best known men in Cape May County To a reporter, Mr. Steel said: "Certainly, I'll tell you the story. I am 54 years old and was first attacked with the rheundism twenty-six years ago. I suffered all that mortal man could stand. The medicite and the doctoring I have had has cost me at the very least \$2,500, but they were all like so much water in my

"One day, in 1882, I was taken with a chill up and down the back, my leg gave out at the knee and I fell like a log-Never shall I forget the agony I suffered. I thought I would go crazy. I could not walk, and my legs were all drawn up at the knee and feltas if dead if was without feeling and without power. I called in Dr. Alexander Young, one of our town physicians. He cupped and blistered me without success. I went to Dr. Downs, a physician of the old school. Dr. Downs took my leg and pulled it out straight, then he laid it over the arm of the sofa on which I was reclining, and from it suspended two bricks. The plan was almost unbearable. The battery was applied, and the result was that I was just as bad as ever. As a last recourse I went to the late Dr. Pancoast, then of Jefferson College. He pronounced my case chronic rheumatism, and said that he could relieve the pain but could not cure me. He gave me sarsaparilla and iodide of potassium, of which I had already taken a quantity. I felt that I was going from bad to worse. The pains were growing more intense, my body was growing weaker and I had to crawl up stairs on my hands and knees. I was as white as a sheet, and at times nearly frozen to des.h. I slept under enough covering to crush me, and was cold then. I had to lift my leg around wherever I wanted it, but at night it would twitch and jerk as though possessed by some fiendish

"Well, to cut a long story short, I read in the Philadelphia Record of a man who had been cured by Dr. Williams' Pink Pinls for Pale People. story appeared to be an authentic ac-count, and with a ray of hope I sent for two boxes of Pink Pills. This was about six months ago. As soon as I began to take them they began to do me good. I felt as though I had been given fresh blood and new muscles. When the two boxes were finished I sent for six more, and under this treatment continued to improve. I began to regain the use of my limbs and I could soon get around with the aid of a crutch and cane. Now I have discarded the crutch. I have an excellent appetite and feel first-class all over.

"Why Pink Pills have done more for me than all the rest of the medicine and doctors put together, and my recovery is due soiely to them. I have taken in all twenty boxes of Pink Pills and you can see for yourself what they have accomplished."

Suiting the action to the words Mr Steele placed his cane over his shoulder and wasked off like a man who had never had an hour's sickness in his life. Some idea of the severity of his case can be had from the fact that his left leg has been shortened nearly an inch by the ravages of the disease. The fol lowing affidavit was made before John Spaulding, Justice of the Peace, who has known Mr. Steel during his entire illness.

Sworn and subscribed before me this 26th day of May, A. D. 1893.

JOHN SPALDING, Justice of the Peace. Dr. Williams' Pink Pills are not a patent mediuine in the sense that name

implies. They were first compounded as a prescription, and used as such in general practice by an eminent physi-cian. So great was their efficacy that it was deemed wise to place them with-in the reach of all. They are now maoufactured by the Dr. Williams' Medicine Company, Schenectady. N Y., and Brockville, Ont., and are sold in boxes never in loose form by the dizen or hundred, and the public are caution d against numerous imitations old in this hape) at 50 ceuts a b x, or six boxes for \$2 50, and may be had of all druggists or direct by mail from Dr. Willia us Medicine Co., from ei her address The price at which these pills are sold makes a course of treatment inexpensive *s compared with other remedies or medical treatment.

King Lo Bengula Dead.

CAPETOWN, March 6 .- King Lo Bengula, it is now stated, died on January 23. The Matabeles are hurrying into Buluwayo with the intention of surrendering and are very anxious to know where they are going to live and who is to support the wives and children of the late King Lo Bengula.

From Hebrew to Baptist. CINCINNATI, Ohio, March 6 .- Dr. E. John Kauffman, the first husband of Minnie Seligman, the actress, and a prominent Jewish physician, last night abandoned the Hebrew faith and publicly joined the Baptist church. His present wife was baptised with
