## The Real Sentiment of the South and West Boldly Expressed.

The Conspiracy of the Money Loaning and Manufacturing

States and the Rothschilds to Rob and Plunder the Producing States Exposed.

The Clergy Asked to Join in Denouncing the Crime-The Property of This

Country Fast Passing into the Hands of the Plutocracy-The Prophecy of Lincoln being Fulfilled.

A Dissolution of the Union Threatened -- Alliance with the South, Mexico and the Central

American Republics Hinted at-The Impeachment of Cleveland Demanded, The Greatest Arraignment

Of the Gold Conspirators Ever Made.

President of the Pan-American Si-Metallic Association before the American Si-Metallic League, Washington, D. C., February

(Continued from last week.)

I when this country discarded silver, India received a larger supply of it than ever before, and notwithstanding the alleged debasement of silver, its flow into India increased, and the prosperity which was wont to pervade this country, was transferred to the fields and factorice of India. Prior to that time, India was not a factor in the wheat trade, but as silver bullion declined, the trade of India increased, until it has now reached more than sixty million bushels for export each year. Had it not been for the emonetization of silver, the wheat trade with Iudia would never have begun, and Europe would have purchased of us in the last ten years, four hundred and fifty million bushels more of wheat than it did, and cotton and corn proporsionately, and would practically have paid the debt we owe them. We exported in 1892\$128,000,000 worth

of bread stuffs, and had it not been for the demonetization of silver, this would have netted the farmer about \$190,000,-000 and would have given us a market for the sixty million bushels which Europe purchased from India, which would have amounted to \$90,000,000 more, aggregating \$280,000,000 and in ten years would aggregate \$2,800,000,000, more than enough to pay the public debt.

dis was not a factor in the cotton trade, but now she practically controls the China market and enough cotton goes to London to force down the price of India now supplies more than \$100,000,000 worth of cotton annu-Silver has reached the lowest nt ever known and as silver decreases, the price of every product decreases in

Silver purchased in London at 83 cents and coined into rupees receives a purchasing power of \$1.37 with which they buy wheat, cotton and corn in India, and to that extent the price of all American products is decreased. An ounce of silver will buy just as much cotton, whest, orn and other farm products now as it ever did, and would buy just as much at 40 cents per ounce, as it would at \$1.29 per ounce; and were silver demonstized and its bullion value go to 40 cents on the dollar, wheat would not be worth more than 30 cents

per bushel in this country, nor cotton more than 3 cents per pound.

Those who are seeking to destroy the liberties of the American people, at-tempt to mislead them by every possible device. Sherman says that we ought to make money as dear as possible, so that the pension to the old soldier will lose none of its value, and that the deposits in the New England Savings Banks will lose none of its purchasing power. This is a special plea. Sherman cares nothing for the depositors in the savings banks, nor is he concerned for the old soldiers. He is not their agent. He is simply pleading their cause in the in-terest of the gold kings of the Old World, whose agent he is. The de-positors in the New England savings banks have been able to make these accumulations largely by reason of the fact that they purchased the products of the Western farmer products of the Western farmer for 60 per cent of its value. Why should we, therefore, be any more concerned for this class of our people than for the producers who by reason of the price of all their products being decreased 40 per cent, have no bank accounts, and whose stockings are also empty. The old soldiers have not forgotten that it was John Sherman who pressed the passage of the act repealing their arrearage of pensions, after July, 1880. The old soldier is a patriot, and those of us who followed that flag from 1861 to 1865, and upheld its authority until it is respected by every nation un-der the sun, and effsced from its escutcheon the foul blot of African elavery, have not become so debased that for a few paitry dollars they are willing to re-enslave the blacks and also enslave fifty million whites.

The bounty is a mere pittance, and is not one-tenth part enough to support the veterans, and the demonetization of aliver taxes them in the interests of those whom Sherman represents, unjustly every year, five times as much as all the bounty they receive. Give us free coinage of silver, and not only will the earnings of the depositors in the Eastern savings banks increase, but the value of the products of the labor of the old soldier, and the producing millions of this country, will so multiply, that they too will have something to deposit in the banks, By reason of the demonstration of

silver there are two million, two hun-dred and fifty thousand unemployed in Value of farm lands in 1890 \$560.1 this country, the aggregate wealth of decrease from 1880 \$115.416.607.

which, could they but had employment, would amount to \$1,500,000,000 yearly. This would swell the deposits in the banks, and also add to the comforts of many an old soldier. If we were to increase the price of our farm products \$1,250,000,000 which the demonstration of silver has decreased their value, and which compels the producers of this country to pay an enforced tax to the creditor classes, that would also add to the deposits in our banks.

They also tell us that to restore silver would cause an outflow of our gold. If that is true, how does it happen that from 1878 to 1890, the time we are coining \$2,000,000 a month under the Bland law, that gold increased in this country nearly three hundred per cent? These gold standard fiends know very well that the less money we have in this country, the greater will be the outflow of gold. Suppose silver was remone-tized, the value of the crops of this country would increase \$1,250,000,000 yearly; our exports would largely in-crease in quantity, and the value of our products would correspondingly increase until the balance of trade in our favor would double, treble and quadruple, and the inflow of gold into this country would be a natural consequence. Gold would flow into this country with free coinage in the same proportion as our exports increased and prices advanced, and it would take only a few years until the balance of trade would be so great in our favor that we could easily liqui-date all our foreign debt, the very thing Rothschilds is endeavoring to prevent.

It is of far greater importance that we should preserve the equity of the con-tract between the producing and debtor millions of our own people, who imports no foreign goods, than that we should retain gold for the benefit of the few importers. With free coinage and Treasury notes receivable for custom dues, no damage could possibly result from any attempt to corner gold. The concern of the Shylocks of Wall street is not that gold will leave the country, but that it will not leave the country, is

their concern.
The Southern and Western States will appreciate the blessing that the Eastern or manufacturing States have been to them when we consider that it was through their sinister manipulation of the money volume which forced down the products of the producers of this country more than forty per cent., and which transferred about one-third of all the profits of the Southern and Western States to the Eastern or manufacturing States, and that they have selfishly entered into a conspiracy with the plutoc-racy of the old world, to rob the farmers of the West and the planters of the South of every dollar of their profits, receiving themselves one third as a rew or their treachery, and transferring two-thirds to the plutocracy of the old world.

The bieseings of high tariff and the single standard are emphasized when we consider that the little State of Massa chusetts of 8,300 square miles, with a population in 1890 of 1,783,000, and an sessed valuation of \$1,584,756,802, inreased in wealth \$569,377,824; while the States in North Carolina, Georgia, Alabama, Louisiana, Nebraska, Iowa, Illi-nois and Indiana, with a total area of 486,000 square miles of land, a population of 13,500,000, inpressed in value \$559,441.974. The great factors in production are capital, land and labor. The producing States possess these factors over Massachusetts, in land fifty to one, labor seven to one, capital two to one; yet, under the systems which have grown and Wall street, in ten years the State of Massachusetts increased in wealth more by ten millions of dollars than all the great producing States I have named.

This is true of all the Eastern or manufacturing States. Instead of being a part of this great nation interested in our common prosperty and glory, they have se-ceded, so far as common interest or common decency is concerned, from every tie that should bind them to the producing States of the West and Soutn; there is nothing in common between them. Like a set of cormorants, they have joined the gold kings of the Old World, to rob and pillage all the great Western and Southern States, which produce the wealth of this nation, and which is absorbed by the Eastern or manufacturing States and the Old World. It is a base conspiracy and ought to be denounced by the civilized world.

I could take every Eastern or manufacturing State with the same result, but I will give just one more, the great State in which Wall street is situated. and which Grover Cleveland claims as his home. Nebraska, Kansas, Iowa, Illinois, Indiana, Kentucky, Virginia, West Virginia, North Carolina, Tennessee, Georgia, Alabama, Mississippi, Louisiana and Florida, fifteen of the most productive States in the Union, with an area of 776,480 square miles. Let us compare them with the State of New York, with an area of 49,170 square miles, about sixteen to one. These fifteen States, in 1880, had a population of about 20,000,000. New York 5,000,000. Four to one. The assessed valuation of these fifteen States, in 1880, was \$4,000,-000.000. New York \$2,650,000,000. The tifteen States gained in wealth in ten years, from 1880 to 1890, \$1,117,188,213. New York gained, in the same time, \$1,123,386,932. One State, one-sixteenth the size, tar less productive in soil, gained \$6,000,000 more than the fifteen.

The assessed valuation of real estate in 1890 in Ittinois, Iowa, Missouri, Kansas and Nebraska aggregated \$2,465,000,-000 and the recorded mortgages aggregated \$1,200,000,000. The chattel mortgages in these five states amount to \$800,000,000 making a total debt of nearly the entire assessed valuation of the real estate. During 1890 there was was foreclosed in Nebraska 2,100 mortgages on real estate, and these foreclosures are increa ing yearly.

The Bankers Monthly states that the amount of mortgage indebtedness on Indiana homes is \$650,000,000. The annual interest on this amounts to about \$60,000,000. In 1892 there were placed on Indians farms, \$50,000,000, the interest of which amounts to more than the

earnings of a thousand farmers. The wheat crop of Indiana for 1891 was fifty million bushels and in 1892 less than forty millions. The tax gatherers of Indiana will collect in taxes, fees, and salaries no less than forty-five million dollars. The value of the wheat crop at 60 cents per bushel would amount to \$24,000,000. \$21,000,000 in taxes and saleries more than the value of the wheat

Crop.

The value of real estate in Ohio in 1890, shows an average value per acre in 1880 of \$27, in 1890 of \$22.08, a decrease of \$4.92. The aggregate value of real estate in 1890 is equalized by the board \$1,140,135,496. In 1880 1,075.509,-830. Increase over 1880 of \$42,625,666. Value of farm lands in 1890 \$560,361,909, decrease from 1880 \$115,416,607. Value

of real estate in towns and cities in 1890, \$570,773.587. Value in 1880, \$412,583.314. An increase over 1880 of \$158,190,273. The increase in real property in Ohio for the ten years is less than four per cent. On farms the loss is seventeen per cent, while the mortgages increase, he value of the farms decreases.

A sad commentary on the average in elligence of the members of the Ohio ogislature, with a knowledge of these acts, to re-elect to the senste of the United States, the man who is responsi-ble for this condition of affairs, unless his election is more profitable to the members of the legislature than the farm crops of the State. As the gold dollar increases in value, real estate and other commodity values, corresponding. y decrease. These mortgages have now become so burdensome that the farmer san no longer pay the interest, and un-less relief comes speedily, the farms of this country will all pass under fore-closure from the present owners.

There are about 150,000,000 people liv-ing under governments that make gold the only legal tender. About 210,000,000 who use silver alone and 875,000,000 who

who use silver alone, and 875,000,000 who use both gold and silver. There is a trifle less than \$4,000,000,000 silver money in the world, and probably \$3,500,000,000 of gold. If silver is demonstrated one-half of the weights by which we value all property will be wiped out, and the result will be that those whose wealth is in houses, lands and merchandise, will find it decreased one half, and those who owe debts will owe double the amount they now owe, and those who hold our obligations will have double the value of their wealth. No one will be benefited excepting those who already have too much.

The creditors talk of a 60 cent dollar; but they never mention a two hundred cent dollar, which the gold dollar will be worth when silver is demonstized. Two dollars worth of property on a bi-metallic basis will be sold to obtain a gold dollar on a single standard and we must come to a gold basis if we do not

return to free coinage of silver.

They talk of good times. Yes, good times for the money lenders, but how about the dollar that the farmer buys with his corn, wheat and cotton, which costs him two and a half times as much as it did, and should.

The great loan companies of the East which represent foreign capital, and many which do not, demand that the mortgages they receive shall be paid principal and interest in gold. Every Western and Southern State should at once enact a law prohibiting this outrage, and making it a penal offense.

They should also enact a law that the rate of interest should not exceed two per cent, and make it a crime for any! one to lend or perrow for a higher rate. The business of the country does not justify a higher rate, and money loaning at that rate would be the most profitable business in any of the Southern or Western States to day. They ought also to enact a law regulating the commission of money brokers, restricting them to one-half of one per cent on loans. The money brokers of course would tell us that we would get no more money. Suppose we don't. We don't want it, if we have to borrow it at a loss, as we are now doing. I am opposed to paying ten per cent or any other per cent for the money they have robbed us of. If we had free coinage, we would ourselves have money to loan and in a few years would own our own breweries. our own mortgages, our own farms, our own homes, and our own mines.

Notwithstanding, the wealth of the extent ransferred unjustly to the Eastern States and the money centers, it does not enrich the many, but goes to swell the bank accounts of the few. In New York with its two million inhabitants, only thirteen thousand own their own homes. In Chicago, with a population of one and a half millions, less than 214 per cent own all the real estate. The producers increased the wealth of the country 50 per cent, from 1880 to 1890, from \$44,000,000,000 to \$66,000,000,000. Of this \$66,000,000,000, thirty thousand people possess \$40,000,000,000, leaving the \$26,000,000,000 for the remaining sixty-five million people. The farmers and toilers produce the wealth which Rothschilds, Sherman & Company transfer by vicious legislation into the

pockets of the few. The mortgaged debts of the country are \$40,000,000,000. The wealth, \$66,000,-000,000. Increase of values yearly, \$2,100,000,000. Interest on the debt yearly at 10 per cent, \$4,000,000,000; leaving the country worse off every year by \$1,900,000,000. And still the gold trust says we are a prosperous people. At this rate, how long will it take the country to go into absolute insolvency? It is prosperous for the manufacturing States that absorb the wealth of the toilers of governing motive. But if he persists in the producing States. But the industrious, honest American citizen who toils early and late in a country marvelously rich in resources and blessed by nature, is leaving the heritage of billions in mortgaged debts every year, the benafits of which are unjustly and unlawfully transferred to the bank accounts of the parasites of civilization.

The increase of interest over that of wealth in the producing States is much larger in proportion than for the whole country. In fact, so large, that in a few years more practically all the property of the producing States will have changed ownership by mortgage foreclosures. In 1840 the farmers owned ninety per cent. of the wealth of this country. In 1890 they owned less than twenty per cent., and unless relief comes by restoring silver, in three years more they will be homeless and like those of other gold standard countries, will flee to lands less oppress

The immigration from the gold and silver standard countries is an object esson, and I refer to them as showing the prosperity and contentment in the single and double standard countries. Great Britain, single standard, population 34,000,000, had an immigration to the United States from 1885 to 1891 of 964,000. Germany, single standard, population 46,000,000, the immigration to this country was, in the same period, 730,000. existence with lightning rapidity, a party France, double standard, population 38,-000,000, immigration to this country in the same period was only 37,000. Belgium, double standard, population 5,800,-000, immigration in this country in the same period was 17,000. Ireland, single standard, population 5,175,000, immigration to this country in the same period was 517,000. If nothing else was ever said or written on this subject, this would be a sufficient answer to all pleas made in the interest of the gold standard by the hired minions of Rothchilds. The population of Prussia is 30,000,000, and less than two and a half millions possess an income equalling \$225 in our

noney. In 1890, when the present law was

the country to prevent free coinage, the price of silver went rapidly from 91 cents to \$1.21, wheat from 85 cents to \$1.10 81 10 and cotton from 9 cents to 13 cents. To defeat these results, England issued paper rupees redeemable in silver, and paid them out to buy wheat and cotton in India, and through these expedients, she succeeded in again forcing down the price of silver, wheat, cotton, corn and other farm products, having an agreement with her agents in this country that the Sherman law should be repealed, thereby forcing down the price of silver to forty or fifty cents.

The proposition of Rothschilds at Brussels was to make the Sherman law international. That was, no doubt, the object of the conference. This throws back a flood of reflected light upon the anti-silver crusade in this country, and no unprejudiced mind can longer doubt, that Sherman, the recognized governor of gold trust legislation in this country, received all his inspirations at the hands of these London Jews. The authenticity of the Hazzard circular is now fully established. The proposed buying and storing of silver to cheapen commodities, and render a resumption of its use as money impossible, is now apparent; equally so is the fact that the Sherman law and all the monetary legislation of this country, and of the world, is in-spired by the Rothschilds.

If this Congress does not give the people relief by restoring silver, the Trans-Mississippi Congress, which will be camposed of representatives from all the Trans-Mississippi States, convenes in Ogden, Utah on the 24th of April next, and in all probabilities, if we are unable to get any relief from the general govern-ment, some measures will be introduced into that Congress, looking to an alliance with old Mexico and the silver using countries of South and Central America; and although these Congresses have heretofore been composed of delegates only from the Trans Mississippi States, if silver is not restored, all of the Southern States and the corn and wheat growing states of the West will be invited to participate in its deliberations. Rothschilds is welcome to the Eastern States so far as we are concerned; if they want to live under his dominion, they can; but we do not, and will not. This President of the God of mammon, wields more power than every monarch of Europe. His dictum enslaved the laborers of the old world, and his purpose is that the producers of this republic shall share a like fate, by compelling them to pay a bounty of forty or fifty per cent on

everything they produce. Early last spring a bargain was made between Depew and the Rothschilds on cehalf of the Republicans, and Whitney and Belmont on behalf of the Democrats; so that no matter what Congress might do silver would receive its death blow at the hands of the executive; it therefore made no difference to Rothschilds which side succeeded. Harrison was repudiated at the polls, and Cleveland elected, not because any great number wanted him, but like the man fleeing from danger knoweth not what he does, blindly voted the Democratic ticket, because the party was pledged to give them relief. Cleveland was repudiated by his own

State at the Chicago convention, but Rothschilds agent was there and the magic wand of gold in the hands of Whitney was more powerful than the revolt of his own State and the honest sentiment of his party; and the millions were po The press of the country is subsi-dized, all the great trusts and combines the telegraphs and railroads, Congress is debauched and the President is hyp-

notized by the magic wand of gold, and like a bird under the charm of a serpent droops its wings and walks into the poisonous jaws of the insatiable mon-The New York Sun and the National

Democratic committee are authority for the statement that Whitney paid \$300,000 for Cleveland's nomination, while Depew paid a like amount for Harrison's. There was more than \$2.-000,000 - paid out by the Democratic committee in the States York, Indiana, of New York, Indiana, Con-necticut, Alabama and Delaware. Elections are more profitable in these States than the wheat crops of the West and cotton crops of the South. Cleveland has practically never been beyond the confines of his own State, knows absolutely nothing about the wants of this great Republic, and is as ignorant of them as a child. He has one idea, and that is to pay his obligations to the Rothschilds for nominating and electing him President of the United States. That appears to be his carrying his bargain into execution, he will not serve his time out as President of this Republic; the western and southern half of this great Republic would not and could not remain a part of the United States for four years under a single standard. A pretty spectacle, the President, supposed to be a ser vant of the people, using all his patronage and power to enslave the people of the nation. The gold trust furnishes money to nominate Presidents, to make platforms, to elect candidates, cobinet officers and all the appointees of the government; and all the official patronage is dictated from Wall street and the national treasury is used to convince the consciences and understandings of

I rode in the Republican charget for more than thirty years; I am walking now. I served for more than four year in the Union army, and assisted in up holding the dignity of our flag so that it shall be respected and honored wherever unfurled, but I am now engaged in a holier cause. I have enlisted during the war or until the enslavement of fifty millions of white and black, Jew and Gentile, in this land shall be averted. and the rule of the gold kings de

throned. The last battle between the Democratic and Republican parties has been fought. There is now crystallizing into of freedom and a party of greed. party bent on enslaving the toiling millions of this country in the interest of the crowned heads of the old world, and a party struggling to throw off the shackles of financial bondage and penal servitude. Think of it. A government speculating directly off the hard earnings of the producers of precious metals, compelling the miner to pay a direct tax to the government of forty per cent. of his earnings, while the privileged class, those with incomes of millions yearly, are protected by law and do not pay one dollar of taxes. Free country indeed. Humane and just government. No won der the Americans love the American

[To be continued in next week's bout ]

Why? Why is Strictly Pure White Lead the best paint? Because it will outlast all other paints, give a handsomer finish, better protection to the wood, and the first cost will be less. If Barytes and other adulterants of white lead are "just as good" as Strictly Pure White Lead, why are all the adulterated white leads always

# "Strictly Pure White Lead?"

This Barytes is a heavy white powder (ground stone), having the appearance of white lead, worthless as a paint, costing only about a cent a pound, and is only used to cheapen the mixture. What shoddy is to cloth, Barytes is to paint. Be careful to use only old and standard brands of white lead. "Southern" "Collier" "Red Seal"

are strictly pure, "Old Dutch" process brands, established by a lifetime of use. For colors use National Lead Co.'s Pure White Lead Tinting Colors with Strictly Pure White Lead.

For sale by the most reliable dealers in paints everywhere.

If you are going to paint, it will pay you to send to us for a book containing information that may save you many a dollar; it will only cost you a postal card to do so.
