Augual Review of the American Agriculturalist.

A SHORTAGE IN NEARLY ALL CROPS

Home Consumption and an Increas Foreign Demand Expected to Yield an Average Return to the Farmer.

Dependant on Money.

New York, Aug. 22.—The following a summary of the American Agriculturist's anual review of the crop situation and of the agricultural year:

The harvest of 1893 in the United States is, in many respects, similar to that of three years ago, but with every prospect that home consump-tion and an increased foreign demand will so advance values as to yield as large a net return to farmers as on

the average of recent years.

The cotton crop will be harvested on fewer acres than last year. As large or a larger breadth was planted to this staple, but the inability of many planters to borrow money enough to work the crop, together with the drouth, floods and worms, and the still greater difficulty of get-ting money for picking, combine to seriously curtail production.

Present indications point to a crop of 1,750,000,000 bushels of corn, con-

trasted with 1,630,000,000 last year and over 2,000,000,000 bushels in the immense yield of two seasons previous. The wheat output will not exceed 443,000,000 bushels according to the

American Agriculturist's own reports

and its interpretations of government

to 614,00,000 as the average for the past two seasous and 400,000,000 bushels in 1890. Nearly 2,500,000 less acres were voted to wheat than last year, and the bulk of this decrease was in the surplus states, which bid fair to have 78,000,000 fewer bushels than last year, and 125,000,000 bushels under surplus states production of 1891. Available supplies of old wheat are 40,000 bushels greater than twelve months since, but all of that farmers also over hold 17,000,000 bushels more old wheat now than then. The total supplies of the ensuing year are only 500,000,000 bushels, or 117,000,000 less than the average of the two previous crops. Our home consumption has averaged 365,000,000 bushels an-nually, leaving an apparent export surplus of 135,000,000 bushels, against exports last year of 192,000,000, and the season before, 225,000,000.

This year's acreage of oats was never exceeded except in 1889, when over 750,000,000 bushels were grown on 27,460,000 acres, compared with 620,-000,000 bushels on a slightly smaller acreage this season. This is within 40,000,000 bashels of last year's out-turn and just about an average of the previous three crops. The usual quantity of rye, buckwheat and barley will be garnered.

The supply of hay (over 83,000,000 tons) and other forage is abundant, though mill feed and cottonseed meal

may be higher than last winter.

The wool clip is somewhat heavier than last year. Serious reduction in the supply of live stock is reflected in reduced arrivals at our domestic markets and decreased exports during the past seven months, with a very fair tendency to values.

The American Agriculturist notes an increased domestic crop of sugar, but a shortage in the world's protion of 300,000 long tons of sugar; but "prices are more likely to be affected by changes in legislation than by changes in production."

Potatoes have felt the drouth and

about 165,000,000 bushels are looked for-slightly more than last year, compared to 245,000,000 in the bountiful crop of two years ago.

Reviewing the financial situation from the farmers' standpoint, the American Agriculturist concludes that "the prospect for prices in the early future depends more upon the mone tary situation than upon natural conditions, all of which point to causes that should result in higher prices."

Stocks abroad are not materially larger than a year ago, so that the excess of 5 900,000 bushels in the United States stocks of old still leaves an indicated shortage in the bread crop of the (world of 100,000,000 bushels of wheat. This allows Russia as good a crop as last year. The European rye erop is hardly a fair average; oats are under average and potatoes are injured by 4routh.

With no extra surplus of the bread crops and an assured deficit of wheat, the United States is likely to be called upon to export as much wheat as last year if not more. Indeed, exports have been much heavier since July 1 than last season. "The conclusion is justifiable that present prices of grains are abnormally low, as there is little evidence of our ability to spare as much wheat as Europe wants unless a large underconsumption prevails in the United States.

FIVE INSTANTLY KILLED. 1 A Carriage Full of People Struck by Train at a Crossing.

LEROY, N. Y., Aug. 22.-An accident occurred here yesterday on the Lehigh Valley railroad crossing of Lake street, in which five people were instantly killed. Their names are: L. J. Bovee, Mrs. L. J. Speeches were made con demning congress and charging that not one law is or has been enacted by it in the interest of the poor man, and charging the dongressmen with being schemers and ready to pass any law fo money. The convention then passed resolutions stating that the citizens of Hooker county would work this land question alone, in that as substance, and would present to the people of the country a petition and asking their signatures to the same asking congress to give each settler 640 acres under the homestead law instead of 160. They will then ask each county to hold a mass meeting and pass such resolutions and sign such petitions as they see fit. and all will be sent to the representatives in congress, that they may k ow the wishes of the people in the sand hills country.

Cut 'Em Down. LINCOLN, Aug. 22.—Auditor Moore recently armed himself with a good sharp pruning knife and waded in Garneau vouchers clear up to the bridle reins. The first to meet disaster was the one for Seth P. Mobley's monthly salary of \$240. The knife sliced off \$115 of it. Similar cuts were made in many of the other vouchers for salaries, Heretofore Garneau has drawn the money and paid the salaries, but this time the salary warrants have been sent direct from the auditor's office. This action of the auditor is a new venture, al-though parties who have watched the case were sware that the auditor con-

templated taking a decisive step towards getting out of the dilemma. It is predicted that those affected will not ike this action one bit.

Омана, Aug. 22.—Saturday afternoon Va. A. Swift, alias Brown, secured a icense to marry Miss Annie Campbell. The wedding was to have taken place this morning, but in the light of developments it is proved impossible, and the bride that was to have been returned the license which Swift inturned to be keeping, to the county trusted to her for all this is that judge. The reason for all this is that Swift, in his efforts to revent publicity tore the stub out of the license. record. Judge Eller sent the sheriff after the man for mutilating a public document. Later the police discovered that Brown already had a wife, and this was his reason for wishing to avoid publicity. Miss Campbell is much worked up over the affair.

To Buy the Water Works Plant. NORFOLK, Neb., Aug. 22 .- The city council has passed an ordinance sub mitting the question of the issue of \$40,000 in 6 per cent bonds to the elec-tors for the purchase of the water works plant now in operation here. The plant was put in six years ago by A. L. Strang, who operated it for a while, but it has latterly been in the hands of a receiver. Private customers are now paying the operating ex-penses and the hydrant rental, \$60 per nydrant, which the city now pays, is good deal in excess of what the interest on the bonds will be, so there is little doubt that the proposition will
